Proceedings of the 2022 3rd International Conference on Modern Education and Information Management (ICMEIM 2022)

Vishalache Balakrishnan,Intakhab Alam Khan,Mehmet Cüneyt Birkök,2023-02-10 This is an open access book. As the process of social modernization continues to advance, people realize that the key to social modernization is the modernization of people, and the modernization of people is inseparable from the modernization of education. It can be seen that education modernization is the foundation of social modernization. Education modernization is an important reform direction of education development, including modernization of education concept, modernization of education content, modernization of education equipment, modernization of teachers and modernization of education management. And information management is one of the important methods to realize education modernization Information management is the social activity of planning, organizing, leading and controlling information resources by means of modern information technology in order to effectively develop and utilize information resources. Simply put, information management is the management of information resources and information activities by human beings. Information management is a general term for the information that people collect, process and input and output in the whole management process. The process of information management includes information collection, information transmission, information processing and information storage. Using the new generation of information management technology to enhance the digitalization, networking and intelligence of education management, promote the transformation of education decision-making from experience-driven to data-driven, education management from one-way management to collaborative governance, education service from passive response to active service, and support the modernization of education governance system and governance capacity with information technology. Focusing on education and information management with modernization, this conference provides a platform for scholars in related fields to exchange and share information, discuss how the two affect each other, and: Promote the modernization of education by studying certain educational issues that exist. Open up new perspectives, broaden horizons, and examine the issues under discussion

by participants. Create a forum for sharing, research and exchange at an international level, where participants will be informed of the latest research directions, results and content in different fields, thus inspiring them to come up with new research ideas. For those who cannot attend the conference, papers in the social sciences and humanities will be accepted and published in the form of conference proceedings.

Smart Education and e-Learning 2018 Vladimir L. Uskov, Robert J. Howlett, Lakhmi C. Jain, Ljubo Vlacic, 2018-05-28 This book features the contributions presented at the 5th International KES Conference on Smart Education and e-Learning, which took place in Gold Coast, Australia, June 20–22, 2018. The peer-reviewed papers are grouped into several interconnected parts: Part 1 – Smart Education: Systems and Technology, Part 2 – Smart Pedagogy, Part 3 – Smart Education: Case Studies and Research, and Part 4: Sustainable Learning Technologies: Smart Higher Education Futures. Smart education and smart e-learning are emerging and rapidly growing areas with the potential to transform existing teaching strategies, learning environments, and educational activities and technology in the classroom. Smart education and smart e-learning focus on enabling instructors to develop new ways of achieving excellence in teaching in highly technological smart classrooms, and providing students with new opportunities to maximize their success and select the best options for their education, location and learning style, as well as the mode of content delivery. This book serves as a useful source of research data and valuable information on current research projects, best practices and case studies for faculty, scholars, Ph.D. students, administrators, and practitioners – all those who are interested in smart education and smart e-learning.

Understanding Traumatic Brain Injury Harvey Levin, David Shum, Raymond Chan, 2014-01-28 This timely book reports recent progress in research on traumatic brain injury (TBI) by leading investigators encompassing translational and clinical studies. The text covers epidemiology, pathophysiology, brain imaging, cognition, behavioral sequelae, and clinical trials of innovative treatments, including new approaches to rehabilitation. The range of TBI mechanisms represented in this cutting-edge book includes closed head trauma and blast-related injury, and the spectrum of TBI severity. Chapters offer a developmental perspective, including the effects of TBI on cognitive development in children and outcome studies in adults. Contributors from various countries provide a global perspective on this worldwide health problem. The editors have synthesized the contents in a concluding chapter. Researchers and clinicians will find this volume to be an informative, authoritative reference for current TBI research.

Maximum Climbing Eric Horst, 2010-04-23 The definitive resource to brain-training for climbing—by an internationally recognized expert As physical as climbing is, it is even more mental. Ultimately, people climb with their minds—hands and feet are merely extensions of their thoughts and will. Becoming a master climber requires that you first master your mind. In Maximum Climbing, America's best-selling author on climbing performance presents a climber's guide to the software of the brain—one that will prove invaluable whether one's preference is bouldering, sport climbing, traditional climbing, alpine climbing, or mountaineering. Eric Hörst brings unprecedented clarity to the many cognitive and neurophysical aspects of climbing and dovetails this information into a

complete program, setting forth three stages of mental training that correspond to beginner, intermediate, and elite levels of experience and commitment—the ideal template to build upon to personalize one's goals through years of climbing to come.

Understanding Traumatic Brain Injury Harvey S. Levin, David Shum, Raymond C. K. Chan, 2014 Progress in research on traumatic brain injury is presented in this book encompassing translational and clinical investigations. Observational and interventional studies are discussed by leading investigators of TBI in adults and children. Contributors from various countries provide a global perspective on this worldwide health problem.

Disruptive Artificial Intelligence and Sustainable Human Resource Management Anamika Pandey, Balamurugan Balusamy, Naveen Chilamkurti, 2023-12-14 It is well-established that every organization is founded with a specific purpose and goals. Virtually all business organizations obtain measurements and metrics dealing with outcomes and results. However, what is reflected on the balance sheet does not necessarily show the actual worth of the organizations and ensure their survival and sustainability. Thus, the question arises, what exactly makes the organizations sustainable and thriving in an ever-changing environment? There are several examples of companies like Faber-Castell, Bank of Ireland, Chivas, DuPont and many more which have been able to sustain and survive over more than 200 years and still have a successful existence in the present era. Thus, it is important for the organization to pay equal attention to its three bottom lines, i.e., people, profit and planet for its sustainability, which not only meet the needs of the present generation but should have a futuristic approach as well. In the present era, organizations are adopting a new normal working dynamic and coping with the post-pandemic situations to sustain themselves in the business environment. Technology plays a significant role in this new working dynamic, and cutting-edge technologies like machine learning, artificial intelligence, blockchain, ChatGPT, Internet of Things, and much more effectively facilitate human functioning at work. The book aims to contribute to understanding and developing sustainable human resource management processes and practices aligned with recent technologies. It highlights the interconnection among the three bottom-line sustainable approaches for the growth and development of the organization. Topics discussed in this book include: • Disruptive Technologies and HR Sustainability • Convergence of Innovative Technologies, HR and Organizational Growth • Triple bottom-line Sustainability for HRM • Business-oriented Talent analytics and HR Sustainability • Role of Leadership in sustainable HRM practices.

Biomechanical Principles and Applications in Sports Jani Macari Pallis, Jill L. McNitt-Gray, George K. Hung, 2019-09-11 This book provides an overview of biomedical applications in sports, including reviews of the current state-of-the-art methodologies and research areas. Basic principles with specific case studies from different types of sports as well as suggested student activities and homework problems are included. Equipment design and manufacturing, quantitative evaluation methods, and sports medicine are given special focus. *Biomechanical Principles and Applications in Sports* can be used as a textbook in a sports technology or sports engineering program, and is also ideal for graduate students and researchers in biomedical engineering, physics, and sports physiology. It can also serve as a useful reference for professional athletes and coaches interested in gaining a deeper understanding of biomechanics and exercise physiology to improve athletic performance.

Business Intelligence and Modelling Damianos P. Sakas,Dimitrios K. Nasiopoulos,Yulia Taratuhina,2021-01-31 This book highlights interdisciplinary insights, latest research results, and technological trends in Business Intelligence and Modelling in fields such as: Business Intelligence, Business Transformation, Knowledge Dissemination & Implementation, Modeling for Logistics, Business Informatics, Business Model Innovation, Simulation Modelling, E-Business, Enterprise & Conceptual Modelling, etc. The book is divided into eight sections, grouping emerging marketing technologies together in a close examination of practices, problems and trends. The chapters have been written by researchers and practitioners that demonstrate a special orientation in Strategic Marketing and Business Intelligence. This volume shares their recent contributions to the field and showcases their exchange of insights.

Social and Communication Disorders Following Traumatic Brain Injury Skye McDonald,Leanne Togher,Chris Code,2013-12-04 Traumatic brain injury (TBI) can seriously disrupt the social and communication skills that are basic requirements for everyday life. It is the loss of these interpersonal skills that can be the most devastating for people with TBI and their families. Although there are many books that focus upon TBI, none focus on communication and communication skills specifically. This book fills this important gap in the literature and provides information ranging from a broad overview of the nature of pathology following TBI and its effects on cognition and behaviour, through to the latest evidence about ways to assess and treat social and communication disorders. Much has changed in the field of communication disorders and TBI since the first edition of this book was published in 1999. There have been advances in neuroimaging, providing more accurate understanding of how the brain is damaged in TBI and also insights into its repair. There has been a burgeoning interest in social cognition, and advances in how communication is conceptualized, with a particular focus on the role of how context facilitates or impedes communicative ability. Most importantly, much has changed in the arena of rehabilitation. There is now a growing evidence base of treatments aimed at improving communication problems following TBI, new resources for accessing this information and renewed interest in different kinds of methods for demonstrating treatment effects. Bringing together a range of expert international researchers interested in understanding the nature and treatment of TBI this book covers topics from understanding how the brain damage occurs, how it affects social and communication skills and how these problems might be treated. As such it will be of great interest to clinicians, postgraduate and undergraduate students and researchers in neuropsychology, speech and language pathology.

The 30-Minute Runner Duncan Larkin,2018-01-02 The 30-Minute Runner takes a simplified approach to training, which is to break

down everything into one thirty-minute session per day—a manageable segment for first-time runners and those who may be in decent shape but lead incredibly busy lives. Everything in the book—including training schedules, techniques, and tips—is put forth purely in terms of minutes spent running, without any goal paces to worry about, mileage to keep track of, or anything to measure other than time spent out on the roads and trails. The book focuses on how to maximize those thirty critical minutes in order to achieve two primary goals: shedding extra pounds and completing a 5K race. Author Duncan Larkin, a certified Army Master Fitness Trainer, also covers topics like running for new moms, single-parent training, how to prepare to run your first race, race-day tips, how to train while on business travel, and taking it to the next level—running forty-five and sixty minutes a day (10K and half-marathon schedules). In addition to the running-based guidelines, *The 30-Minute Runner* also offers nutritional advice and core exercises that complement the thirty-minute runs.

The Potential of Wearable Technology in Amateur Football. A qualitative study Moritz Zieglmeier, 2017-03-07 This book provides a comparison of different wearable technology systems used in professional football. Furthermore, it includes a qualitative study about the possibilities of amateur football clubs to use said devices or similar ones and to see if it makes sense to use wearable technology in amateur football.
