Anglo-American Approaches to Alliance Security, 1955-60 W. Rees,1996-02-05 This book looks at the attitudes and policies of the United States and United Kingdom, in the late 1950s, towards the three major alliances in Europe, the Middle East and South East Asia. Drawing upon a wealth of archival material, it analyses both the military relationship between the US and UK and the extent to which these two countries were prepared to cooperate with their allies in countering the threats to Western security.

Conscription and Democracy George Q. Flynn,2001-12-30 Finding the manpower to defend democracy has been a recurring problem. Russell Weigley writes: The

historic preoccupation of the Army's thought in peacetime has been the manpower question: how, in an unmilitary nation, to muster adequate numbers of capable soldiers quickly should war occur. When the nature of modern warfare made an all-volunteer army inadequate, the major Western democracies confronted the dilemma of involuntary military service in a free society. The core of this manuscript concerns methods by which France, Great Britain, and the United States solved the problem and why some solutions were more lasting and effective than others. Flynn challenges conventional wisdom that suggests that conscription was inefficient and that it promoted inequality of sacrifice. Sharing similar but not identical diplomatic outlooks, the three countries discussed here were allies in world wars and in the Cold War, and they also confronted the problem of using conscripts to defend colonial interests in an age of decolonization. These societies rest upon democratic principles, and operating a draft in a democracy raises several unique problems. A particular tension develops as a result of adopting forced military service in a polity based on concepts of individual rights and freedoms. Despite the protest and inconsistencies, the criticism and waste, Flynn reveals that conscription served the three Western democracies well in an historical context, proving effective in gathering fighting men and allowing a flexibility to cope and change as problems arose.

British Railways 1948-73 T. R. Gourvish,N. Blake,1986 Originally published in 1986, this is a business history of the first twenty-five years of nationalised railways in Britain. Commissioned by the British Railways Board and based on the Board's extensive archives, it fully analyses the dynamics of nationalised industry management and the complexities of the vital relationship with government. After exploring the origins of nationalisation, the book deals with the organisation, financial performance, investment and commercial policies of the British Transport Commission (1948-2), Railway Executive (1948-53) and British Railways Board (1963-73). Calculations of profit and loss, investment, and productivity are provided on a consistent basis for 1948-73. This business history thus represents a major contribution not only to the debate about the role of the railways in a modern economy but also to that concerning the nationalised industries, which have proved to be one of the most enduring problems of the British economy since the war.

Making Republicans Liberal Kristoffer Smemo,2024-10-08 As poor and working people organized themselves on the job, in the streets, and at the polls during the mid-twentieth century, they forced Republicans to reckon with new demands for political and social citizenship in big cities across the Northeast, Midwest, and Pacific Coast. While rightwing Republicans mobilized to crush those movements, *Making Republicans Liberal* explores how another wing of the party responded to intensifying mass movement pressure. Beginning in the 1930s, Republican governors such as Earl Warren of California, George Romney of Michigan, and Nelson Rockefeller of New York spent the next four

decades articulating their own vision of liberalism. These Republican liberals believed that strategically they could not win elections and govern in places where unions, civil rights groups, and other social movements organized voters. What may have begun as an opportunistic strategy soon mutated into an ideological commitment to use state power to realize working people's demands for a greater say, and stake, in the decisions governing their lives. Republican liberals accepted labor's right to organize, legislated antidiscrimination laws, and legalized abortion. Yet at the same time, each of those policies proved weaker than the alternatives supported by organized labor or mainline civil rights groups and paled in comparison to what people on strike and on the march really wanted. Kristoffer Smemo shows how this was the contradiction of Republican liberalism as a policy program and as an ideology. The reforms it ushered in at once asked too much from core, conservative Republican constituencies and offered too little to the movements struggling for change. As the movements making Republicans compromise fragmented and collapsed in the late twentieth century, so too did the material foundation for Republican liberalism.
