Aerosol Pollution Impact on Precipitation Zev Levin,William R. Cotton,2008-09-30 Life on Earth is critically dependent upon the continuous cycling of water between oceans, continents and the atmosphere. Precipitation (including rain, snow, and hail) is the primary mechanism for transporting water from the atmosphere back to the Earth's surface. It is also the key physical process that links aspects of climate, weather, and the global hydrological cycle. Changes in precipitation regimes and the frequency of extreme weather events, such as floods, droughts, severe ice/snow storms, monsoon fluctuations and hurricanes are of great potential importance to life on the planet. One of the factors that could contribute to precipitation modification is aerosol pollution from various sources such as urban air pollution and biomass burning. Natural and anthropogenic changes in atmospheric aerosols might have important implications for precipitation by influencing the hydrological cycle, which in turn could feed back to climate changes. From an Earth Science perspective, a key question is how changes expected in climate will translate into changes in the hydrological cycle, and what trends may be expected in the future. We require a much better understanding and hence predictive capability of the moisture and energy storages and exchanges among the Earth's atmosphere, oceans, continents and biological systems. This book is a review of our knowledge of the relationship between aerosols and precipitation reaching the Earth's surface and it includes a list of recommendations that could help to advance our knowledge in this area.

Cabling Andrew Oliviero,Bill Woodward,2009-07-06 Two books in one! Complete coverage of data cabling and fiber optics makes this the most comprehensive cabling book on the market With the growing demand for fiber optics in large-scale communications networks, network professionals need complete, up-to-the-minute information. The fourth edition of this popular guide provides you with the latest on copper and fiber-optic networking. It is particularly useful for those studying for the Fiber Optics Installer or Fiber Optics Technician certifications. Part I covers the basics of cabling, while Part II is devoted to in-depth information on fiber optics, allowing you to stay up to speed on all aspects of the field. Demonstrates how to work with all of the various types of cables-from those used to network desktops to hubs and switches up to those used by major telecommunications carriers Appeals to anyone who plans, builds, and maintains a network Offers a solid foundation in fiber optics As the industry transitions from copper cabling to fiber optics, Cabling: The Complete Guide to Copper and Fiber-Optic Networking, Fourth Edition is a vital tool for network administrators and technicians.

Void Xiyun Liu,2015-01-13 An incomplete online chatting record shows that a 16-year-old boy gets completely tired of life owing to his own view of the world, calling it all a distortion yet daring not to commit suicide due to his incapability to disprove a religious doctrine that a suicide's soul goes to hell. To kill time, he arranges a trip to Bermuda to search for the No Man's Land with his friends and meanwhile feeds them with his view that what he calls the Universitus Absolutus is essentially composed of carriers and information, and that the fragmentation of carriers leads to the distortion of information. Not long after he and his friends set foot on Bermuda did he get drawn into a mysterious battle...

Managing Smoke at the Wildland-urban Interface Dale D. Wade,2007 When prescribed burning is conducted at the wildland-urban interface (WUI), the smoke that is produced can sometimes inconvenience people, but it can also cause more serious health and safety problems. The public is unlikely to continue to tolerate the use of prescribed fire, regardless of the benefits, if burn managers cannot keep smoke out of smoke-sensitive areas. In the South, forest management organizations commonly require that plans for prescribed burns pass a smoke screening review and some States require such a review before they will authorize a burn. Current screening systems, however, do not incorporate criteria for use at the WUI. This guide describes modifications to the Southern Smoke Screening System for burns at the WUI. These modifications couple new research findings with the collective experience of burners who have extensively used the 1976 Southern Smoke Screening System. This new smoke screening system is designed for use on burns less than 50 acres in size and has undergone several years of successful field testing in Florida.

Fast Processes in Large-Scale Atmospheric Models Yangang Liu,Pavlos Kollias,2023-12-11 Improving weather and climate prediction with better representation of fast processes in atmospheric models Many atmospheric processes that influence Earth's weather and climate occur at spatiotemporal scales that are too small to be resolved in large scale models. They must be parameterized, which means approximately representing them by variables that can be resolved by model grids. Fast Processes in Large-Scale Atmospheric Models: Progress, Challenges and Opportunities explores ways to better investigate and represent multiple parameterized processes in models and thus improve their ability to make accurate climate and weather predictions. Volume highlights include: Historical development of the parameterization of fast processes in numerical models Different types of major sub-grid processes and their parameterizations Efforts to unify the treatment of individual processes and their interactions Top-down versus bottom-up approaches across multiple scales Measurement techniques, observational studies, and frameworks for model evaluation Emerging challenges, new opportunities, and future research directions The American Geophysical Union promotes discovery in Earth and space science for the benefit of humanity. Its publications disseminate scientific knowledge and provide resources for researchers, students, and professionals.

Our Punitive Society Randall G. Shelden,Morghana Vélez Young,2020-12-10 This reader-friendly exploration of the primary forces relevant to punishment—poverty and political powerlessness—highlights the necessity for humane alternatives to our current incarceration binge. This provocative overview looks at the business of punishment and at the historical patterns of control regarding slavery, the death penalty, women, the LGBTQ community, juveniles, and supervision. The United States has the world's highest rate of incarceration—a form of punishment that

separates the least privileged from the rest of society, creating populations of damaged lives. All of society pays the price for overly punitive sanctions. Equal justice is not possible in an unequal society. Up-to-date statistics illustrate the race, class, and gender inequalities in the criminal justice system. The criminal justice system has expanded for half a century. Will challenges to policing succeed in narrowing the net of social control? Will the cost of maintaining a massive system stimulate a transformation, or will stakeholders support minimal reforms that do not threaten their interests? The public is largely unaware of most of the workings of the criminal justice system. Through this engaging text, the authors hope to provide insights that encourage readers to examine the collateral effects of policies to address crime and the role of punishment.
