Short Message Service (SMS) Friedhelm Hillebrand,2010-01-21 Contributions from Finn Trosby, Kevin Holley, Ian Harris Written to celebrate the 25th anniversary of SMS standardization by the people who produced the standards, Short Message Service (SMS): The Creation of Personal Text Messaging, describes the development of the SMS standard and its ongoing evolution. The standardization of SMS started in February 1985 as a part of the creation of the second generation digital cellular system GSM, and the 25th anniversary of the first work on SMS provides an opportunity to review and understand how this service was developed. The book also looks to the future, as a large number of new GSM and evolved GSM phones will support SMS as a mass market high availability messaging service, a new simple Multimedia Messaging Service (MMS) suitable for use by everyone and for implementation in every new terminal is proposed. One of the only books which covers the complete SMS genesis from concept ideas to standardization of a first technical solution and its evolution to the present day. Describes the service concept including the limitation of the message length to 160 characters and explains the rationale behind the concept. Based on existing and newly retrieved documentation. Concludes that SMS has a long future since most future GSM phones will support SMS as the only messaging service, and so an SMS evolution is put forward.

IBM Content Manager OnDemand Guide Zhu Wei-Dong,Jim Ilardi,Deborah Matamoros,Trina D Morgans,Paula Muir,Hassan A Shazly,Edward E Stonesifer,Vanessa T Stonesifer,Sebastian Welter,IBM Redbooks,2016-05-04 This IBM® Redbooks® publication provides a practical guide to the design, installation, configuration, and maintenance of IBM Content Manager OnDemand Version 9.5. Content Manager OnDemand manages the high-volume storage and retrieval of electronic statements and provides efficient enterprise report management. Content Manager OnDemand transforms formatted computer output and printed reports, such as statements and invoices, into electronic information for easy report management. Content Manager OnDemand helps eliminate costly, high-volume print output by capturing, indexing, archiving, and presenting electronic information for improved customer service. This publication covers the key areas of Content Manager OnDemand, some of which might not be known to the Content Manager OnDemand community or are misunderstood. The book covers various topics, including basic information in administration, database structure, storage management, and security. In addition, the book covers data indexing, loading, conversion, and expiration. Other topics include user exits, performance, retention management, records management, and many more. Because many other resources are available that address subjects on different platforms, this publication is not intended as a comprehensive guide for Content Manager OnDemand. Rather, it is intended to complement the existing Content Manager OnDemand documentation and provide insight into the issues that might be encountered in the setup and use of Content Manager OnDemand. This book is intended for individuals who need to design, install, configure, and maintain Content Manager OnDemand.

Archiving Strategies for Evolutionary Multi-objective Optimization Algorithms Oliver Schütze,Carlos Hernández,2021-01-04 This book presents an overview of archiving strategies developed over the last years by the authors that deal with suitable approximations of the sets of optimal and nearly optimal solutions of multi-objective optimization problems by means of stochastic search algorithms. All presented archivers are analyzed with respect to the approximation qualities of the limit archives that they generate and the upper bounds of the archive sizes. The convergence analysis will be done using a very broad framework that involves all existing stochastic search algorithms and that will only use minimal assumptions on the process to generate new candidate solutions. All of the presented archivers can effortlessly be coupled with any set-based multi-objective search algorithm such as multi-objective evolutionary algorithms, and the resulting hybrid method takes over the convergence properties of the chosen archiver. This book hence targets at all algorithm designers and practitioners in the field of multi-objective optimization.

Scapa 1919 Innes McCartney,2019-05-30 The German High Seas Fleet was one of the most powerful naval forces in the world, and had fought the pride of the Royal Navy to a stalemate at the battle of Jutland in 1916. After the armistice was signed, ending fighting in World War I, it surrendered to the British and was interned in Scapa Flow pending the outcome of the Treaty of Versailles. In June 1919, the entire fleet attempted to sink itself in the Flow to prevent it being broken up as war prizes. Of the 74 ships present, 52 sunk and 22 were prevented from doing so by circumstance and British intervention. Marine archaeologist and historian Dr Innes McCartney reveals for the first time what became of the warships that were scuttled, examining the circumstances behind the loss of each ship and reconciling what was known at the time to what the archaeology is telling us today. This fascinating study reveals a fleet lost for nearly a century beneath the waves.

EVOLVE - A Bridge between Probability, Set Oriented Numerics, and Evolutionary Computation II Oliver Schütze,Carlos A. Coello Coello,Alexandru-Adrian Tantar,Emilia Tantar,Pascal Bouvry,Pierre Del Moral,Pierrick Legrand,2012-08-14 This book comprises a selection of papers from the EVOLVE 2012 held in Mexico City, Mexico. The aim of the EVOLVE is to build a bridge between probability, set oriented numerics and evolutionary computing, as to identify new common and challenging research aspects. The conference is also intended to foster a growing interest for robust and efficient methods with a sound theoretical background. EVOLVE is intended to unify theory-inspired methods and cutting-edge techniques ensuring performance guarantee factors. By gathering researchers with different backgrounds, a unified view and vocabulary can emerge where the theoretical advancements may echo in different domains. Summarizing, the EVOLVE focuses on challenging aspects arising at the passage from theory to new paradigms and aims to provide a unified view while raising questions related to reliability, performance guarantees and modeling. The papers of the EVOLVE 2012 make a contribution to this goal.

Absent Presences in the Colonial Archive Irene Hilden,2022-10-17 The Berlin Sound Archive (Lautarchiv) consists of an extensive collection of sound recordings, compiled for scientific purposes in the first half of the 20th century. Recorded on shellac are stories and songs, personal testimonies and poems, glossaries and numbers. This book engages with the archive by consistently focusing on recordings produced under colonial conditions. With a firm commitment to postcolonial scholarship, Absent Presences in the Colonial Archive is a historical ethnography of a metropolitan institution that participated in the production and preservation of colonial structures of power and knowledge. The book examines sound objects and listening practices that render the coloniality of

knowledge fragile and inconsistent, revealing the absent presences of colonial subjects who are given little or no place in established national narratives and collective memories.

Towards Teracomputing - Proceedings Of The Eighth Ecmwf Workshop On The Use Of Parallel Processors In Meteorology Walter Zwiefelhofer, Norbert Kreitz, 1999-09-29 The demand for more and more computer power in numerical weather prediction and meteorological research is as strong as ever. Previously, the world meteorological community tried to meet this demand by exploiting parallelism. In this field, the European Centre for Medium-Range Weather Forecasts has established itself as the central venue for bringing together operational weather forecasters, climate researchers and parallel computer manufacturers to share their experiences through a series of workshops held every other year. This book reports on the latest such workshop. It gives an excellent overview of the latest achievements in this field. The demand for and the developments towards Teracomputing, the next order of magnitude in meteorological supercomputing, are given particular attention.

Nuns Across the Orange Michael Sparrow, 2021-04-21 When Sister Emma and the five women who accompanied her from England crossed the Orange River early in 1874, they exchanged the comfortable mainstream of Anglican Church life for the rigours of pioneering new works in an undeveloped country. Living conditions were primitive, travel was hard, and money was always in short supply. The newly-formed Community of St Michael and All Angels opened the first girls' schools north of the Orange and the first hospital in the Free State. At Kimberley, Sister Henrietta achieved a world first through her successful campaign for the State Registration of nurses. Four Sisters were besieged in Kimberley during the Anglo-Boer War, and in Bloemfontein their Mother House became a military hospital. By faith and determination the Community recovered. St Michael's School was raised to new standards of excellence, while the Sisters expanded their mission to include Lesotho and the eastern Free State. Decades of work with Bloemfontein's sick and deprived led to Sister Enid becoming known as Ma Mohau (Mother of Mercy), and to national acclaim in the 1970s as South Africa's Mother Teresa.
