**Artificial Intelligence in Medicine** Silvia Miksch,Jim Hunter,Elpida Keravnou,2005-07-14 This book constitutes the refereed proceedings of the 10th Conference on Artificial Intelligence in Medicine in Europe, AIME 2005, held in Aberdeen, UK in July 2005. The 35 revised full papers and 34 revised short papers presented together with 2 invited contributions were carefully reviewed and selected from 148 submissions. The papers are organized in topical sections on temporal representation and reasoning, decision support systems, clinical guidelines and protocols, ontology and terminology, case-based reasoning, signal interpretation, visual mining, computer vision and imaging, knowledge management, machine learning, knowledge discovery, and data mining.

*MHealth in Practice* Jonathan Donner,Patricia Mechael,2013-01-17 Leading researchers and practitioners identify the best practices in using mobile technologies to promote healthy behaviours and reduce unhealthy ones, placing a special focus on developing countries.

*Behavioural Insights and Public Policy Lessons from Around the World* OECD,2017-03-01 This report discusses the use and reach of behavioural insights, drawing on a comprehensive collection of over 100 applications across the world and policy sectors.

**Consumer Health Informatics** Thomas Wetter,2015-08-11 This book offers demographic analysis, client appraisal, trial design, etc along with many examples to inform the conception and critical evaluation of consumer health informatics services. Patient safety, legal and ethical appraisal, and business models add to the systematic coverage. Regarding longevity and increase of chronic diseases traditional medical care faces tremendous financial and human resource problems. Is self-service medicine as follow up of traditional care or as an approach in its own right the answer? Are internet and app stores the place where self

service medicine takes place? The book distinguishes stages of such an endeavour.

**Without Precedent** Anna R. Hayes, 2009-06-01 The first woman judge in the state of North Carolina and the first woman in the United States to be elected chief justice of a state supreme court, Susie Marshall Sharp (1907-1996) broke new ground for women in the legal profession. When she retired in 1979, she left a legacy burnished by her tireless pursuit of lucidity in the law, honesty in judges, and humane conditions in prisons. Anna Hayes presents Sharp's career as an attorney, distinguished judge, and politician within the context of the social mores, the legal profession, and the political battles of her day, illuminated by a careful and revealing examination of Sharp's family background, private life, and personality. Judge Sharp was viewed by contemporaries as the quintessential spinster, who had sacrificed marriage and family life for a successful career. The letters and journals she wrote throughout her life, however, reveal that Sharp led a rich private life in which her love affairs occupied a major place, unsuspected by the public or even her closest friends and family. With unrestricted access to Sharp's abundant journals, papers, and notes, Anna Hayes uncovers the story of a brilliant woman who transcended the limits of her times, who opened the way for women who followed her, and who improved the quality of justice for the citizens of her state. Without

Precedent also tells the story of a complicated woman, at once deeply conservative and startlingly modern, whose intriguing self-contradictions reflect the complexity of human nature.

*Behavioral Healthcare and Technology* Lisa A. Marsch, Sarah Elizabeth Lord, Jesse Dallery, 2015 In recent years, there has been an explosion of research focused on using technology in healthcare, including web- and mobile- health assessment and intervention tools, as well as smartphone sensors and smart environments for monitoring and promoting health behavior. This work has shown that technology-based therapeutic tools offer considerable promise for monitoring and responding to individuals' health behavior in real-time. They may also function as important clinician-extendors or stand-alone tools, may be cost-effective and may offer countless opportunities for tailoring behavioral monitoring and intervention delivery in a manner that is optimally responsive to each individual's profile and health behavior trajectory over time. Additionally, informational and communication technologies may be used in the context of decision support tools to help individuals better understand and access treatment. Technology may enable entirely new models of healthcare both within and outside of formal systems of care and thus offers the opportunity to revolutionize healthcare delivery. This edited book defines the state of scientific research related to the development, experimental evaluation, and effective dissemination of technology-based therapeutic tools targeting behavioral health. *Behavioral Healthcare and Technology* provides an overview of current evidence-based approaches to leverage technology to promote behavioral health, including management of substance use, mental health, diet/exercise, medication adherence, as well as chronic disease self-management. Additionally, the book defines the state of implementation research examining models for deploying technology-based behavioral healthcare systems and integrating them into various care settings to increase the quality and reach

of evidence-based behavioral healthcare while reducing costs.

**The Handheld Library** Thomas A. Peters, Lori A.

Bell, 2013-04-01 Covering topics such as mobile reference, eBooks, mobile websites, and QR codes, this book examines the effects of the global mobile revolution on libraries and library users—critical information all librarians need. *The Handheld Library: Mobile Technology and the Librarian* provides the information and guidance librarians need to adapt themselves and their facilities to the mobile revolution—the fastest, most diffuse worldwide technological innovation in human history. The book provides an up-to-date survey of how mobile technologies are affecting library use, library services, library systems, librarians, and library users at various types of libraries. The authors cover core topics related to mobile libraries, including mobile reference, eBooks, mobile websites, and QR codes, and address aspects of the mobile revolution less frequently covered in the literature, such as mobile health information services, the use of mobile technologies on archival work, the impact of the mobile revolution on physical libraries, and the ways in which new mobile technologies are creating professional development opportunities within the profession. While this resource is specifically targeted toward librarians who plan and provide services using mobile technologies, academic, public, and other librarians will also find the ideas and information within useful.

**Sexually Transmitted Infections - E-book** Bhushan

Kumar, Somesh Gupta, 2014-02-10 Covers all aspects (historical, epidemiological, diagnostic, clinical, preventative, public health and medico-legal) of STIs in complete detail with a special emphasis on STIs in special groups—migrants, homosexuals, and sexually abused. Covers basic and laboratory sciences extensively to blend with the basics required by the clinician for proper understanding of the disease process. Clinical photographs, illustrations, photographs of specimens and cultures, histopathology, flow charts and line diagrams are given

extensively throughout the text to make relevant clinical situation self-explanatory. Has very useful and practical information for even the clinician in the periphery, where the investigative component is either non-existent or very basic and many new drugs are not available or unaffordable. Management of HIV in adults and children in resource-poor countries has been covered extensively along with syndromic management of STIs. This enables a physician to choose from approaches in a particular situation depending upon the available means—laboratory or therapeutic. Covers sexual dysfunction in both men and women and the basics of human sexual behavior and sexual health. Section Editors and Contributors from all continents of the world have made this a truly global reference book. It is a useful reference text for epidemiologists, public health experts, clinicians, microbiologists, health workers, social organizations and counselors working in the field of STIs, sexual health, and HIV.

Nursing Informatics 2016 W. Sermeus, P.M. Procter, P. Weber, 2016-07-21 As the importance of electronic and digital devices in the provision of healthcare increases, so does the need for interdisciplinary collaboration to make the most of the new technical possibilities which have become available. This book presents the proceedings of the 13th International Conference on Nursing Informatics, held in Geneva, Switzerland, in June 2016. This biennial international conference provides one of the most important opportunities for healthcare professionals from around the world to gather and exchange expertise in the research and practice of both basic and applied nursing informatics. The theme of this 13th conference is eHealth for All: Every Level Collaboration - From Project to Realization. The book includes all full papers, as well as workshops, panels and poster summaries from the conference. Subjects covered include a wide range of topics, from robotic assistance in managing medication to intelligent wardrobes, and from low-cost wearables for fatigue

and back stress management to big data analytics for optimizing work processes, and the book will be of interest to all those working in the design and provision of healthcare today.

**Adaptive Treatment Strategies in Practice: Planning Trials and Analyzing Data for Personalized Medicine**

Michael R. Kosorok, Erica E. M. Moodie, 2015-12-08 Personalized medicine is a medical paradigm that emphasizes systematic use of individual patient information to optimize that patient's health care, particularly in managing chronic conditions and treating cancer. In the statistical literature, sequential decision making is known as an adaptive treatment strategy (ATS) or a dynamic treatment regime (DTR). The field of DTRs emerges at the interface of statistics, machine learning, and biomedical science to provide a data-driven framework for precision medicine. The authors provide a learning-by-seeing approach to the development of ATSs, aimed at a broad audience of health researchers. All estimation procedures used are described in sufficient heuristic and technical detail so that less quantitative readers can understand the broad principles underlying the approaches. At the same time, more quantitative readers can implement these practices. This book provides the most up-to-date summary of the current state of the statistical research in personalized medicine; contains chapters by leaders in the area

from both the statistics and computer sciences fields; and also contains a range of practical advice, introductory and expository materials, and case studies.

**Encyclopedia of Mobile Phone Behavior** Yan,

Zheng, 2015-03-31 The rise of mobile phones has brought about a new era of technological attachment as an increasing number of people rely on their personal mobile devices to conduct their daily activities. Due to the ubiquitous nature of mobile phones, the impact of these devices on human behavior, interaction, and cognition has become a widely studied topic. The Encyclopedia of Mobile Phone Behavior is an authoritative source for scholarly research on the use of mobile phones and how these devices are revolutionizing the way individuals learn, work, and interact with one another. Featuring exhaustive coverage on a variety of topics relating to mobile phone use, behavior, and the impact of mobile devices on society and human interaction, this multi-volume encyclopedia is an essential reference source for students, researchers, IT specialists, and professionals seeking current research on the use and impact of mobile technologies on contemporary culture.

Research Methodology for Beginners DR. ASHOK

YAKKALDEVI, 2022-12-02 Research is defined as “the creation of new knowledge and/or the use of existing knowledge in a new and creative way so as to generate new concepts, methodologies and understandings Research is not only to develop the process or to find a formula as we do in the science. But in the field of social science the research work is oriented towards the solution of a problem or to seek an answer of a question. The first step of a research process is to identify a problem. The selection of a problem is governed by reflective thinking. Unthinking activity is governed too completely by tradition or by emotion. Primitive life was largely without effective reflective thought, until some intelligent individual conceived of a new solution for an old problem. Therefore. upper educational groups ever do much

Careful ordered thinking. The normal human mind thinking may be classified into four categories: convergent, divergent, reflective and scientific thinking. In reflective thinking, individual conceived for a new solution for an old problem, but scientific thinking is in terms of carefully organized reflection.

**Africa Renewal, April 2011** United Nations Department of Public Information, 2011-04-30 The Africa Renewal magazine examines the many issues that confront the people of Africa, its leaders and its international partners: sustainable development goals, economic reform, debt, education, health, women's empowerment, conflict and civil strife, democratization, investment, trade, regional integration and many other topics. It tracks policy debates. It provides expert analysis and on-the-spot reporting to show how those policies affect people on the ground. And, it highlights the views of policy-makers, non-governmental leaders and others actively involved in efforts to transform Africa and improve its prospects in the world today. The magazine also reports on and examines the many different aspects of the United Nations' involvement in Africa, especially within the framework of the New Partnership for Africa's Development (NEPAD).

**Accelerating Strategic Changes for Digital Transformation in the Healthcare Industry** Patricia Ordonez de Pablos, Xi Zhang, 2023-05-30 Accelerating Strategic Changes for Digital Transformation in the Healthcare Industry discusses innovative conceptual frameworks, tools and solutions to tackle the challenges of mitigating major disruption caused by COVID-19 in the healthcare sector and society. It emphasizes global case studies and empirical studies, providing a comprehensive view of best lessons on digital tools to manage the health crisis. The book focuses on the role of advances in digital and collaborative technologies to offer rapid and effective tools for better health solutions for new and emerging health problems. Researchers, students, policymakers and members of the biomedical and medical fields will find this information

invaluable. Specially, it pays attention to how information technologies help us in the current global health emergency and the coronavirus epidemic response, gaining more understanding of the new coronavirus and helping to contain the outbreak. In addition, it explores how these new tools and digital health solutions can support the economic and social recovery in the post-pandemic world. Discusses best experiences, tools and solutions provided by IT to solve the global disruption caused by the COVID-19 pandemic in societies, healthcare infrastructures and health workers Presents case studies with experiences of applications of digital healthcare solutions from around the world Encompasses the point of views of renown researchers and academics globally that are working collaboratively to explore new views and frameworks to develop solutions for emergent problems in the healthcare sector

Evaluating Public Communication Jim Macnamara, 2017-09-05  
Evaluating Public Communication addresses the widely reported lack of rigorous outcome and impact-oriented evaluation in advertising; public relations; corporate, government, political and organizational communication and specialist fields, such as health communication. This transdisciplinary analysis integrates research literature from each of these fields of practice, as well as interviews, content analysis and ethnography, to identify the latest models and approaches. Chapters feature: • a review of 30 frameworks and models that inform processes for evaluation in communication, including the latest recommendations of industry bodies, evaluation councils and research institutes in several countries; • recommendations for standards based on contemporary social science research and industry initiatives, such as the IPR Task Force on Standards and the Coalition for Public Relations Research Standards; • an assessment of metrics that can inform evaluation, including digital and social media metrics, 10 informal research methods and over 30 formal research methods for evaluating public communication; •

evaluation of public communication campaigns and projects in 12 contemporary case studies. Evaluating Public Communication provides clear guidance on theory and practice for students, researchers and professionals in PR, advertising and all fields of communication.

**Boom Country?** Alan Rosling, 2017-05-20 In Boom Country?, Alan Rosling, entrepreneur and strategic advisor in India for over 35 years, explores an unmistakable and profound change that is underway in the Indian business landscape. A fresh wave of enterprise and start-ups; rapid advancements in technology; government reform; and recently developed pools of risk capital, he holds, are contributing increasingly to a massive expansion in new business ? all of it underpinned by a deep social change, a willingness to `do things differently?', especially among the young. Drawing upon his own experiences and more than 100 interviews with Indian entrepreneurs ? representing traditional leading business houses (Tata, Mahindra and Godrej), established first-generation entrepreneurs (Sunil Mittal, Kishore Biyani and Narayana Murthy, among others) and new-generation start-ups (including Sachin Bansal, Bhavish Aggarwal and Vijay Shekhar Sharma) ? as well as forces of the government, Rosling provides an incisive and in-depth analysis of the opportunities and challenges, both traditional and contemporary, of doing business in India. Yet, the growing uncertainty of global trends and India?s own record of under-performing despite its massive potential, lead him to one vital question: Can the current upsurge in entrepreneurial activity ? imperfect and early as it may be ? really reshape India?s economy and propel it towards becoming a true boom country for new enterprise?
