SMS Communication Louise-Amélie Cougnon,Cédrick Fairon,2014-07-15 The media often point an accusatory finger at new technologies; they suggest that there is always a loss of information or

quality, or even that computer-mediated communication is destroying language. Most linguists, on the contrary, are firmly convinced that it is better to consider language as an evolving and changing entity. From this point of view, language is a social tool that has to be studied in-depth through the prism of objectivity, as a process in motion which is influenced by new social and technological stakes, rather than as a fading organism. In this volume we study and describe the societal phenomenon of SMS writing in its full complexity. The aim of this volume is threefold: to present recent linguistic research in the field of SMS communication; to inform the reader about existing large SMS corpora and processing tools and, finally, to display the many linguistic aspects that can be studied via a corpus of text messages. These articles were previously published in Lingvisticae Investigationes Vol. 35:2 (2012).

Email, SMS, MMS Carmen Frehner,2008 Are email and SMS forms of writing or speech? This question cannot be answered easily because their registers are hybrid; they make use of both orality and literacy. This book offers an accurate placement of emails and text messages along the written/spoken continuum. Emails and text messages are also compared to letters and phone calls while a closer comparison of SMS and telegrams shows how far text messaging can be regarded as a renaissance of telegrams. Attention is further paid to multimedia messaging and questions concerning the proportion of image to text, picture categories as well as MMS dialogues are approached. The book finally comments on linguistic changes and deals with the German language community's concern with regard to the increasing use of Anglicisms.
