**Mobile Telecommunication Customer Loyalty in Nigeria: Determining Factors** Olayiwola Bello,2012-11 With the increasing competition on the market, customer loyalty has become a decisive factor for long-term business profits. At its high, customer loyalty connotes the high entry barriers the competitor faces when entering the market, and it contributes significantly to a reduction of marketing costs. To attract new customers, companies are required to invest a lot of time and money which can result in uncertainties and risks over

longer periods of time. The number of loyal customers as a sign of market share is more significant than the total number of customers. More loyal customers translate to high profits. Loyal customers will continue to purchase or receive the product or service from the same enterprises, and they will be willing to pay higher prices for the quality products and first-class services, thereby increasing sales revenue. Consequently, the focus of many enterprise managers at this point is on marketing management aspects to improve customer loyalty in order to gain the competitive advantage in the face of fierce competition. The importance of customer loyalty has been identified by many researchers and academics in the past years. This importance is also predominant in the telecommunication industry and, consequently, the Nigerian telecom industry. This book attempts to assess and analyze the variables that influence a mobile phone subscriber's loyalty and how Nigerian service providers can enhance this loyalty. The study is based on a survey that uses the quantitative approach. A structured questionnaire was developed and personally administered to a sample of University of Ilorin students across four major GSM operators in the country. Four hundred (400) respondents were sampled through a stratified random sampling. Out of this, three hundred and forty-eight (348) copies of the questionnaire, constituting an 87% response rate, could be used for the analysis. Of the eleven (11) operational factors that were used to assess loyalty of customers in the Nigeria Mobile Telecoms industry, all variables except Brand Image and Service Centre Quality were found to be capable of influencing customer loyalty and also considered as the most important loyalty variables in the industry. The unavailability of Mobile Number Portability was found to be a prominent factor in tying consumers down to service providers, while the generally low satisfaction with

the present state of service delivery in the industry also plays a role. Therefore, the retention which the service providers were able to enjoy can be described as circumstantial. The given recommendations include that the service providers embark upon drives that will reduce dropped calls to a bare minimum, that they improve call quality, and that they develop SMS delivery standards.

*Administering SMS* Mark Wilkins, 2000 This handbook is aimed at administrators working with SMS on large-scale Microsoft networks. It offers task-by-task instructions and other essential tasks in detail, aiming to get the administrator quickly up to speed and on to the next job.

**Future Information Technology** James J. (Jong Hyuk) Park, Laurence T. Yang, Changhoon Lee, 2011-06-28 This two-volume-set constitutes the refereed proceedings of the 6th International Conference on Future Information Technology, FutureTech 2011, held in Crete, Greece, in June 2011. The 123 revised full papers presented in both volumes were carefully reviewed and selected from numerous submissions. The papers are organized in topical sections on future information technology, IT service and cloud computing; social computing, network, and services; forensics for future generation communication environments; intelligent transportation systems and applications; multimedia and semantic technologies; information science and technology.

**Soft Computing Evaluation Logic** Jozo Dujmovic, 2018-10-16 A novel approach to decision engineering, with a verified framework for modeling human reasoning Soft Computing Evaluation Logic provides an in-depth examination of evaluation decision problems and presents comprehensive guidance toward the use of the Logic Scoring of Preference (LSP) method in modeling complex decision criteria.

Fully aligned with current developments in computational intelligence, the discussion covers the design and use of LSP criteria for evaluation and comparison in diverse areas, such as search engines, medical conditions, real estate, space management, habitat mitigation projects in ecology, and land use and residential development suitability maps, with versatile transfer to other similar decision-modeling contexts. Human decision making is rife with fuzziness, imprecision, uncertainty, and half-truths—yet humans make evaluation decisions every day. In this book, such decision processes are observed, analyzed, and modeled. The result is graded logic, a soft computing mathematical infrastructure that provides both formal logic and semantic generalizations of classical Boolean logic. Graded logic is used for logic aggregation in the context of evaluation models consistent with observable properties of human reasoning. The LSP method, based on graded logic and logic aggregation, is a vital component of an industrial-strength decision engineering framework. Thus, the book:

- Provides detailed theoretical background for graded logic
- Provides a theory of logic aggregators
- Explains the LSP method for designing complex evaluation criteria and their use
- Shows techniques for evaluation, comparison, and selection of complex systems, as well as the cost/suitability analysis, optimization, sensitivity analysis, tradeoff analysis, and missingness-tolerant aggregation
- Includes a survey of available LSP software tools, including ISEE, ANSY and LSP.NT.

With quantitative modeling of human reasoning, novel approaches to modeling decision criteria, and a verified decision engineering framework applicable to a broad array of applications, this book is an invaluable resource for graduate students, researchers, and practitioners working within the decision engineering realm.
