Treatment Adherence in Dermatology Steven R. Feldman,Abigail Cline,Adrian Pona,Sree S. Kolli,2019-10-16 Patient adherence to a given treatment plan directly correlates to the quality of disease outcome. In looking at the how and why behind patient adherence and non-adherence to a treatment regimen, understanding realistic expectations of a patient can provide a beneficial guide towards providing optimal healthcare. Treatment Adherence in Dermatology offers insight and strategies for understanding and promoting treatment adherence with a focus on dermatological conditions, specifically psoriasis, atopic dermatitis, and acne. Reasons for non-adherence are investigated particularly in populations such as children and patients with multiple co-morbidities. The proposed text provides patient and physician-centered strategies alongside technological advancements to promote adherence. Written for the practicing dermatologist, this title will find audience with primary care physicians, students, residents, and other practicing doctors alike.

Agricultural extension in times of crisis and emergent threats: Effectiveness of a fall armyworm information intervention in Myanmar Author Goeb, Joseph,Maredia, Mywish K.,Herrington, Caitlin,Zu, A Myint,2023-07-28 Agricultural extension can have important impacts on vulnerable populations by increasing food production, which improves both rural incomes and urban food security. Yet, crises induced by violent conflict or disease outbreaks can sever the connections between extension agents and farmers. Understanding how agricultural extension systems can safely and effectively reach farmers in times of crisis could help stabilize agri-food systems in fragile states. In the context of COVID-19, a military coup, and an emergent threat of fall armyworm in Myanmar, this paper uses a randomized controlled trial to test the effectiveness of two cellphone-based extension interventions — a direct-to-farmer and a lead farmer intervention — for fall armyworm control in maize. Despite low compliance, both interventions caused knowledge improvements. However, damage control estimates show that the lead-farmer group used pesticides most effectively. Similar cellphone-based lead-farmer programs could be an effective tool in fragile states and when faced with emergent threats to agriculture.

Distance Education Technologies in Asia Jon Baggaley,Tian Belawati,2010-11-10 In Asia, Distance Education (DE) is providing major solutions in the areas of education and training. DE methods that are standard in other parts of the world, however, have yet to demonstrate their full potential in Asia. Covering nine DE projects by 39 researchers from 13 countries, this book analyses the DE scenario in Asia, the successes, the failures and the reasons behind them. This book is a unique collation of the results of studies of educational technologies across an extensive network of Asian countries. It also provides a useful snapshot of DE's development in Asia in the early years of the 21st century. The surveys reported cover different DE contexts, methodologies, and levels of generalisability, and add to the existing scholarship on the subject by providing previously unavailable, firm evidence about DE's prospects in Asia. The contributors give important recommendations that can be translated into practical and political actions to help solve critical socio-economic problems of Asia as well as other parts of the world.

Practical Airport Operations, Safety, and Emergency Management Jeffrey Price,Jeffrey Forrest,2016-02-09 Practical Airport Operations, Safety, and Emergency Management: Protocols for Today and the Future focuses on the airport itself, not the aircraft, manufacturers, designers, or even the pilots. The book explores the safety of what's been called 'the most expensive piece of pavement in any city'— the facility that operates, maintains, and ensures the safety of millions of air passengers every year. The book is organized into three helpful sections, each focusing on one of the sectors described in the title. Section One: Airport Safety, explores the airport environment, then delves into safety management systems. Section Two: Airport Operations, continues the conversation on safety management systems before outlining airside and landside operations in depth, while Section Three: Airport Emergency Management, is a careful, detailed exploration of the topic, ending with a chapter on the operational challenges airport operations managers can expect to face in the future. Written by trusted experts in the field, users will find this book to be a vital resource that provides airport operations managers and students with the information, protocols, and strategies they need to meet the unique challenges associated with running an airport. Addresses the four areas of airport management: safety, operations, emergency management, and future challenges together in one book Written by leading professionals in the field with extensive training, teaching, and practical experience in airport operations Includes section on future challenges, including spaceport, unmanned aerial vehicles, and integrated incident command Ancillary materials for readers to reinforce concepts and instructors teaching operations courses Focuses on the topics of safety, operations, emergency management, and what personnel and students studying the topic can expect to face in the future

Advances in Clinical Child Psychology Benjamin Lahey,2012-12-06 Advances in Clinical Child Psychology is a serial publication designed to bring together original summaries of the most important new develop ments in the field of clinical psychology and its related disciplines. Each chapter is written by a key figure in an

innovative area of research or by an individual who is particularly well qualified to comment on a topic of major contemporary importance. These chapters provide convenient, concise explorations of empirical and clinical advances in the fields of clinical child psychology, child psychiatry, and related disciplines. The chapter topics are chosen by the editors and are based on sug gestions by the advisory editors, unsolicited suggestions provided by colleagues, and all of our reading of the latest published empirical and theoretical works. They reflect our collective perception of the leading trends in the field of clinical child psychology. The contents of Volume 10 reflect multiple themes. Two chapters focus on different aspects of the child's family: the home and family environment associated with childhood psychopathology and the characteristics of parents whose parenting has become twisted into the abuse or neglect of their own children. The key topics of aggression and stealing are dealt with in two chapters, and five chapters deal with the variety of topics that were formerly under the umbrella concept of minimal brain dysfunction.

Quantitative Methods for HIV/AIDS Research Cliburn Chan,Michael G. Hudgens,Shein-Chung Chow,2017-08-07 Quantitative Methods in HIV/AIDS Research provides a comprehensive discussion of modern statistical approaches for the analysis of HIV/AIDS data. The first section focuses on statistical issues in clinical trials and epidemiology that are unique to or particularly challenging in HIV/AIDS research; the second section focuses on the analysis of laboratory data used for immune monitoring, biomarker discovery and vaccine development; the final section focuses on statistical issues in the mathematical modeling of HIV/AIDS pathogenesis, treatment and epidemiology. This book brings together a broad perspective of new quantitative methods in HIV/AIDS research, contributed by statisticians and mathematicians immersed in HIV research, many of whom are current or previous leaders of CFAR quantitative cores. It is the editors' hope that the work will inspire more statisticians, mathematicians and computer scientists to collaborate and contribute to the interdisciplinary challenges of understanding and addressing the AIDS pandemic.

SMS 2003 Recipes Greg Ramsey,Warren Byle,2007-02-01 SMS 2003 Networking Recipes provides hundreds of quick-reference solutions for the Windows administrator. The book addresses a wide range of problems that all levels of SMS administrators have reported to our authors in the course of their real-world jobs. Some are simple, beginning implementation solutions, while others address high-end automation techniques. The recipes in this book were not selected whimsically, nor on the basis of what the authors found cool or interesting, but rather on the frequency and importance of complaints experienced by the authors in practical business environments.

Biomarkers and Immunotherapy of Hepatic-Biliary-Pancreatic Cancers Yunfei Xu,Hongda Liu,Xuexong Gu,Zheng Gong,2024-02-29 Hepatic-biliary-pancreatic cancers, mainly including hepatocellular carcinoma, cholangiocarcinoma, gallbladder cancer, are highly aggressive malignancies with few treatment options and poor prognoses. Effects of the traditional systemic treatments such as chemotherapy and radiotherapy, are quite limited to hepatic-biliary-pancreatic cancers. For the patients who suffer from hepatic-biliary-pancreatic cancer and lose the opportunity of radical surgery, few targeted drugs are available. Even for the drugs in clinical trial, potential drug targets and prognostic biomarkers for hepatic-biliary-pancreatic cancer are less studied compared to other common cancers such as lung cancer. Prognostic biomarker study is the initiation to explore new drug targets and revelation of the underlying mechanisms of tumor progression.

Handbook of Research on Holistic Perspectives in Gamification for Clinical Practice Novák, Daniel,2015-09-14 Over the past decade, the healthcare industry has adopted games as a powerful tool for promoting personal health and wellness. Utilizing principles of gamification to engage patients with positive reinforcement, these games promote stronger attention to clinical and self-care guidelines, and offer exciting possibilities for primary prevention. Targeting an audience of academics, researchers, practitioners, healthcare professionals, and even patients, the Handbook of Research on Holistic Perspectives in Gamification for Clinical Practices reviews current studies and empirical evidence, highlights critical principles of gamification, and fosters the increasing application of games at the practical, clinical level.

Does mHealth contribute to improved care for people with non-communicable diseases in developing countries? Stephani, Victor,Opoku, Daniel,Quentin, Wilm,2015-06-02 Background: mHealth refers to the use of mobile phones for health care and public health practice. The reasons of deaths in developing countries are shifting from communicable diseases towards non-communicable diseases (NCDs). We review studies assessing the health-related impacts of mobile health (mHealth) on NCDs in low- and middle- income countries (LAMICs) with the aim of giving recommendations for their further development. Methods: A systematic literature search of three major databases was performed in order to identify randomized controlled trials (RCTs) of mHealth interventions. Identified RCTs were reviewed concerning effects of the interventions on health-related outcomes. Results: The search algorithms retrieved 733 titles. 6 RCTs were included in the review, including a total of 1850 participants. MHealth was found to have positively influenced clinical outcomes, compliance rates, as well as quality of life related aspects. Furthermore, other outcomes such as patients' anxiety or patient-physician trust improved significantly. We also found that tailored interventions using a single service for the transmission (e.?g. only SMS) showed the most positive effect. Limiting factors of the evaluation however, were the few numbers of RCTs, the heterogeneity of outcome measures and the fact that all included studies were conducted in middle income countries and mostly in urban areas. Conclusions: Although mHealth is still in its infancy, it can emerge as an important tool for fighting NCDs in LAMICs. Therefore, further support by governmental institutions for coordinating and promoting the development of the required tools, as well as further research especially in low-income economies, with a focus on the evaluation of the long-term effects of mHealth

is needed. Hintergrund: Die Todesursachen in Entwicklungsländern verschieben sich kontinuierlich von übertragbaren hin zu nicht-übertragbaren Krankheiten (NCDs). Deshalb werden in diesem systematischen Review gesundheitsbezogene Einflüsse von mobile Health (mHealth) Interventionen zur Bekämpfung von NCDs in Entwicklungs- und Schwellenländern (LAMICs) untersucht, um Einschätzungen zur bisherigen und Empfehlungen zur weiteren Entwicklung zu geben. Methode: Eine systematische Literatursuche in drei großen Datenbanken wurde durchgeführt um randomisiert-kontrollierte Studien (RCTs) von mHealth Interventionen in LAMICs zu identifizieren. Die ermittelten RCTs wurden hinsichtlich der Effekte von mHealth Interventionen auf gesundheitsbezogene Parameter ausgewertet. Resultate: Von insgesamt 733 erfassten Titeln wurden 6 RCTs mit 1850 Teilnehmern einbezogen. Es wurde festgestellt, dass mHealth einen positiven Einfluss auf klinische Resultate, Compliance-Raten, sowie Lebensqualitäts-bezogene Aspekte hat. Zudem verbesserten sich im Rahmen der Interventionen weitere Faktoren wie das Vertrauen zwischen Patient und Arzt oder Ängste der Patienten. Ferner wurde festgestellt, dass individualisierte Interventionen bessere Resultate als generalisierte Interventionen erzielen. Limitierende Faktoren bei diesem Review waren die geringe Anzahl an RCTs, die Heterogenität der evaluierten Parameter und der Umstand, dass fast alle inkludierten Studien in urbanen Gebieten von Schwellenländern durchgeführt worden sind. Schlussfolgerung: mHealth kann zu einem wichtigen Instrument bei der Bekämpfung von NCDs in LAMICs heranwachsen. Dazu ist jedoch eine stärkere Unterstützung insbesondere von staatlichen Institutionen unumgänglich. Zudem müssen zukünftige Forschungen einen Fokus auf Langzeit-Effekte insbesondere in einkommensschwachen Ländern haben.

Information Technologies and Economic Development in Latin America Alberto Chong,Mónica Yáñez-Pagans,2020-02-29 Information Technologies and Economic Development in Latin America provides a collection of rigorous empirical studies that contributes to a better understanding of the role and impact of old and new information technologies on Latin American economic development. It provides evidence using randomized and quasi-experimental designed studies for different information and communication technologies interventions. In evaluating their development impact a critical concern has been to contribute to the little existing evidence. In fact, whereas many ICT projects in the developing world have been promoted by multilateral organizations, bilateral aid agencies and nongovernmental organizations in recent years, the extent to which these interventions and policies actually contribute to the development of the region is unclear. The book provides evidence on what works and what does not.

What Works in Executive Coaching Erik de Haan,2021-04-06 This book reviews the full coaching outcome research literature to examine the arguments and evidence behind the use of executive coaching. Erik de Haan presents the definitive guide to what works in coaching and what changes coaching brings about, both for individual coaches and for organisations and commissioners. Accessibly written and based on contemporary quantitative research into coaching effectiveness, this book considers whether we know that coaching works, and, if so, whom it works for, and what it offers to those involved. What Works in Executive Coaching considers the entire body of academic literature on quantitative research in executive and workplace coaching, assessing the significant results and explaining how to apply them. Each chapter contains direct applications to coaching practice and clearly evaluates the evidence, defining what really works in executive coaching. Alongside its companion volume Critical Moments in Executive Coaching, this book is an essential guide to evidence-based effectiveness in coaching. It will be a key text for all coaching practitioners, including those in training.

Improving Motor Carrier Safety Measurement National Academies of Sciences, Engineering, and Medicine,Transportation Research Board,Division of Behavioral and Social Sciences and Education,Committee on National Statistics,Panel on the Review of the Compliance, Safety, and Accountability (CSA) Program of the Federal Motor Carrier Safety Administration,2017-08-31 Every year roughly 100,000 fatal and injury crashes occur in the United States involving large trucks and buses. The Federal Motor Carrier Safety Administration (FMCSA) in the U.S. Department of Transportation works to reduce crashes, injuries, and fatalities involving large trucks and buses. FMCSA uses information that is collected on the frequency of approximately 900 different violations of safety regulations discovered during (mainly) roadside inspections to assess motor carriers' compliance with Federal Motor Carrier Safety Regulations, as well as to evaluate their compliance in comparison with their peers. Through use of this information, FMCSA's Safety Measurement System (SMS) identifies carriers to receive its available interventions in order to reduce the risk of crashes across all carriers. Improving Motor Carrier Safety Measurement examines the effectiveness of the use of the percentile ranks produced by SMS for identifying high-risk carriers, and if not, what alternatives might be preferred. In addition, this report evaluates the accuracy and sufficiency of the data used by SMS, to assess whether other approaches to identifying unsafe carriers would identify high-risk carriers more effectively, and to reflect on how members of the public use the SMS and what effect making the SMS information public has had on reducing crashes.

The Effect of Information Technology on Business and Marketing Intelligence Systems Muhammad Alshurideh,Barween Hikmat Al Kurdi,Ra'ed Masa'deh,Haitham M. Alzoubi,Said Salloum,2023-03-12 Business shapes have been changed these days. Change is the main dominant fact that change the way of business operations running. Topics such as innovation, entrepreneurship, leadership, blockchain, mobile business, social media, e-learning, machine learning, and artificial intelligence become essential to be considered by each institution within the technology era. This book tries to give additional views on how technologies influence business and marketing operations for insuring successful institutions survival. The world needs to develop management and intelligent business scenario plans that suite a variety of crisis appears these days. Also, business and marketing intelligence should meet government priorities in individual countries and minimise the risk of business disruptions. Business intelligence - the strategies and technology companies that use it to collect, interpret, and benefit from data - play a key role in informing company strategies, functions, and efficiency. However, being essential to the success, many companies are not taking advantage of tools that can improve their business intelligence efforts. Information technology become a core stone in business. For example, the combination of machine learning and business intelligence can have a far-reaching impact on the insights the company gets from its available data to improve productivity, quality, customer service and more. This book is important because it introduces a large number of chapters that discussed the implications of different Information technology applications in business. Chain and AI, 8- Marketing Mix, Services and Branding.

Current Trends in Caucasian, East European, and Inner Asian Linguistics Dee Ann Holisky,Kevin Tuite,2003-01-01 This volume is a collection of seventeen papers, on languages of all three indigenous Caucasian families as well as other languages spoken in the territory of the former Soviet Union. Several papers are concerned with diachronic questions, either within individual families, or at deeper time depths. Some authors utilize their field data to address problems of general linguistic interest, such as reflexivization. A number of papers look at the evidence for contact-induced change in multilingual areas. Some of the most exciting contributions to the collection represent significant advances in the reconstruction of the prehistory of such understudied language families as Northeast Caucasian, Tungusic and the baffling isolate Ket. This book will be of interest not only to specialists in the indigenous languages of the former USSR, but also to historical and synchronic linguists seeking to familiarize themselves with the fascinating, typologically diverse languages from the interior of the Eurasian continent. Dee Ann Holisky is Professor of English and Linguistics, and Associate Dean for Academic Programs of the College of Arts & Sciences at George Mason University. She is the author of Aspect and Georgian Medial Verbs (Caravan Books, 1981) and of numerous articles on Georgian and Kartvelian linguistics. Kevin Tuite is Professor of Anthropology at the Université de Montréal. Among his books are An Anthology of Georgian Folk Poetry (Fairleigh Dickinson University Press, 1994) and Ethnolinguistics and Anthropological Theory (co-edited with Christine Jourdan; Montréal: Éditions Fides, 2003).

Consumer Health Informatics Thomas Wetter,2015-08-11 This book offers demographic analysis, client appraisal, trial design, etc along with many examples to inform the conception and critical evaluation of consumer health informatics services. Patient safety, legal and ethical appraisal, and business models add to the systematic coverage. Regarding longevity and increase of chronic diseases traditional medical care faces tremendous financial and human resource problems. Is self-service medicine as follow up of traditional care or as an approach in its own right the answer? Are internet and app stores the place where self service medicine takes place? The book distinguishes stages of such an endeavour.
