The Inside Text R. Harper,L. Palen,A. Taylor,2005-03-21 SMS or Text is one of the most popular forms of messaging. Yet, despite its immense popularity, SMS has remained unexamined by science. Not only that, but the commercial organisations, who have been forced to offer SMS by a demanding public, have had very little idea why it has been successful. Indeed, they have, until very recently, planned to replace SMS with other messaging services such as MMS. This book is the first to bring together scientific studies into the values that ‘texting’ provides, examining both cultural variation in countries as different as the Philippines and Germany, as well as the differences between SMS and other communications channels like Instant Messaging and the traditional letter. It presents usability and design research which explores how SMS will evolve and what is likely to be the pattern of person-to-person messaging in the future. In short, The Inside Text is a fundamental resource for anyone interested in mobile communications at the start of the 21st Century.

Innovating Strategy Processes Steven W. Floyd,Johan Roos,Claus D. Jacobs,Franz W. Kellermanns,2009-02-09 Innovating Strategy Process presents a series of reflective essays by established and emerging scholars on the subject of innovation, considering it both as an outcome of strategy and as a process in itself. Contains new ideas and rich case descriptions that will trigger creative thinking about how to design a more innovative strategy process. Offers new conceptual frameworks for analyzing and designing strategy process. Addresses cutting-edge topics, such as play as the means and art as the impetus for strategy-making; the role of emotion in new venture decision-making; and science and entrepreneurship as a source of innovative strategies. Signals the future direction of the field.

Mobile Technologies for Conflict Management Marta Poblet, 2011-06-22 Mobile phones are the most ubiquitous communications technology in the world. Besides transforming the way in which we communicate, they can also be used as a powerful tool for conflict prevention and management. This book presents innovative uses of mobile technologies in the areas of early warning, disaster and humanitarian relief, governance, citizens' participation, etc. and cuts across different regions. The book brings together experts and practitioners from different fields—mobile technologies, information systems, computer sciences, online dispute resolution, law, etc.—to reflect on present experiences and to explore new areas for research on conflict management and online dispute resolution (ODR). It also reflects on the transition from present ODR to future mobile Dispute Resolution and discusses key privacy issues. The book is addressed to anyone involved in conflict prevention and dispute management aiming to learn how mobile technologies can play a disruptive role in the way we deal with conflict.

Anaesthesia, Pain, Intensive Care and Emergency Medicine - A.P.I.C.E. A. Gullo, 2007-12-14 Progress in the field of medicine over the last 50 years has led to important results for society, both in terms of prevention and in the treatment of single or variously associated pathologies. The main objective of modern medicine has been the acquisition of increased skills and highly specialised knowledge in the various disciplines. At the same time, there has been a progressive multidisciplinary and multi-professional interest in acute disease conditions that place the patient in potential or real life-threatening situations. The state of the art of intensive medicine comprises a wide range of sophisticated interventions and collaboration between different medical disciplines, both of which give the patient access to the most advanced forms of treatment that are currently available.

Email, SMS, MMS Carmen Frehner, 2008 Are email and SMS forms of writing or speech? This question cannot be answered easily because their registers are hybrid; they make use of both orality and literacy. This book offers an accurate placement of emails and text messages along the written/spoken continuum. Emails and text messages are also compared to letters and phone calls while a closer comparison of SMS and telegrams shows how far text messaging can be regarded as a renaissance of telegrams. Attention is further paid to multimedia messaging and questions concerning the proportion of image to text, picture categories as well as MMS dialogues are approached. The book finally comments on linguistic changes and deals with the German language community's concern with regard to the increasing use of Anglicisms.

On the Move Wanjira Kinuthia, Stewart Marshall, 2013-04-01 This book integrates research, action research, best practice and case studies detailing how some educators have embraced the opportunities afforded by mobile learning.
