Discourse of Text Messaging Caroline Tagg,2012-05-17 Reveals the depth and complexity of the language used in SMS text communication, and how it exploits various linguistic resources to create identities.

SMS Communication Louise-Amélie Cougnon,Cédrick Fairon,2014-07-15 The media often point an accusatory finger at new technologies; they suggest that there is always a loss of information or quality, or even that computer-mediated communication is destroying language. Most linguists, on the contrary, are firmly convinced that it is better to consider language as an evolving and changing entity. From this point of view, language is a social tool that has to be studied in-depth through the prism of objectivity, as a process in motion which is influenced by new social and technological stakes, rather than as a fading organism. In this volume we study and describe the societal phenomenon of SMS writing in its full complexity. The aim of this volume is threefold: to present recent linguistic research in the field of SMS communication; to inform the reader about existing large SMS corpora and processing tools and, finally, to display the many linguistic aspects that can be studied via a corpus of text messages. These articles were previously published in Lingvisticae Investigationes Vol. 35:2 (2012).

Always On Naomi S. Baron,2010-03-03 In Always On, Naomi S. Baron reveals that online and mobile technologies--including instant messaging, cell phones, multitasking, Facebook, blogs, and wikis--are profoundly influencing how we read and write, speak and listen, but not in the ways we might suppose. Baron draws on a decade of research to provide an eye-opening look at language in an online and mobile world. She reveals for instance that email, IM, and text messaging have had surprisingly little impact on student writing. Electronic media has magnified the laid-back whatever attitude toward formal writing that young people everywhere have embraced, but it is not a cause of it. A more troubling trend, according to Baron, is the myriad ways in which we block incoming IMs, camouflage ourselves on Facebook, and use ring tones or caller ID to screen incoming calls on our mobile phones. Our ability to decide who to talk to, she argues, is likely to be among the most lasting influences that information technology has upon the ways we communicate with one another. Moreover, as more and more people are always on one technology or another--whether communicating, working, or just surfing the web or playing games--we have to ask what kind of people do we become, as individuals and as family members or friends, if the relationships we form must increasingly compete for our attention with digital media? Our 300-year-old written culture is on the verge of redefinition, Baron notes. It's up to us to determine how and when we use language technologies, and to weigh the personal and social benefits--and costs--of being always on. This engaging and lucidly-crafted book gives us the tools for taking on these challenges.

Mobile Messaging Technologies and Services Gwenaël Le Bodic,2003-06-13 Mobile messaging is practically the first data communication service in the wireless domain. It is a major advance on the conventional practice of providing only voice communication service over the wireless interface. Thus, mobile messaging is the initial step to bring the Internet to wireless terminals and has considerable importance both for mobile communication and the Internet. Mobile Messaging provides an in-depth description of messaging technologies supported by mobile networks. It covers the Short Message Service (SMS), Enhanced Messaging Service (EMS) through to the more complex and emerging Multimedia Messaging Service (MMS). The Short Message System (SMS) has proved to be incredibly popular and is supported by most GSM, TDMA and CDMA mobile networks. This volume focuses on the Short Message Service introduced by the European Telecommunications Standard Institute (ETSI) for GSM and GPRS networks. On the basis of ETSI standard, the 3rd Generation Partnership Project (3GPP) is currently the organisation responsible for maintaining the SMS technical specifications. In its most basic form, the Short Messaging Service allows users to exchange short messages composed of a limited amount of text and it is expected that up to 100 Billion short messages could be exchanged monthly by the end of 2002. The Enhanced Message Service (EMS), an application-level extension of SMS, supersedes basic SMS features by allowing elements such as images, animations, formatted text and monophonic melodies to be inserted in short or concatenated messages. Recently, the 3GPP has been focusing

on the development of the Multimedia Message Service (MMS). MMS features include the exchange of messages containing polyphonic melodies, large images, video elements sometimes organised with a multimedia presentation language such as SMIL or xHTML. MMS will be supported by 2.5 G and 3G networks. MMS specifications have reached a fairly mature stage and MMS commercial solutions are appearing on the market. Unlike EMS, MMS has been specified by the 3GPP as a service independent from the underlying network technologies. In parallel to the 3GPP standardisation process, other organisations have specified network-specific implementations of MMS such as the WAP implementation defined by the WAP Forum. In order to develop applications using Short, Enhanced and Multimedia messaging technologies, engineers have to become familiar with the use of technical specifications produced by various standard development organisations such as the 3GPP, the WAP Forum and the IETF and this is the first book to pull this vast array of material together. * Provides an in depth description of the different messaging services and messaging technologies * Presents an introduction to mobile networks * Features numerous practical implementation examples * Provides a unique easy-to-follow presentation of messaging services and mobile networks within a single publication Essential reading for content providers, service providers, network operators and telecommunications manufacturers, researchers, postgraduate students, marketing and standardisation personnel.

User Perception and Influencing Factors of Technology in Everyday Life Mesquita, Anabela,2012-08-31 An increasing amount of research is being developed in the area where technology and humans meet. The success or failure of technologies and the question whether technology helps humans to fulfill their goals or whether it hinders them is in most cases not a technical one. User Perception and Influencing Factors of Technology in Everyday Life addresses issues of human and technology interaction. The research in this work is interdisciplinary, ranging from more technical subjects such as computer science, engineering, and information systems, to non-technical descriptions of technology and human interaction from the point of view of sociology or philosophy. This book is perfect for academics, researchers, and professionals alike as it presents a set of theories that allow us to understand the interaction of technology and humans and to put it to practical use.

Digilect Ágnes Veszelszki,2017-06-26 The high degree of internet penetration and its social (and linguistic) effects evidently influence how people, and especially the highly susceptible younger generations, use language. The primary aim of the book is not only to identify the characteristic features of the digital language variety (this has already been done by several works) but to examine

how digital communication affects the language of other mediums of communication: orality, handwritten texts, digitally created but not digitally perceived, that is printed texts, including in particular advertisements (which quickly respond to linguistic change). Naturally, the book presents the characteristics of the digital language variety (and coins the term digilect) but only to give a framework to the impact analysis. It is important to document changes in progress and thus direct attention to potential outcomes. The current linguistic change is different from previous ones primarily in its speed and form of spreading, and it not only brings innovative grammatical forms and writing/spelling solutions but may also have far-reaching cultural and educational consequences in the long run.

Communication Sandra Cleary,2008-03 Book & CD. The ability to communicate well is a key marker of success in any environment, particularly in the world of work. This book is based on the widely used and respected The Communication Handbook, written by a team of dedicated communicators and higher education specialists. Although the material has been substantially reworked and expanded, the focus remains on different forms of communication. The emphasis is placed on writing as a communication tool, particularly within the business environment. To support this, each chapter contains numerous exercises to enable the student to practise the skills learnt. An exciting addition to this text is the inclusion of online interactive exercises for students. The drilling exercises will enable students to reinforce the principles that have been explained and tested in the book, but in a fun, interactive and learning-enabled way. Lecturers can use the range of exercises to ensure that students are prepared before class and to reinforce the theories and techniques taught in the classroom. (The package is being piloted at a major South African university). The authors draw from substantial experience in the classroom and from close contact with business and industry. For that reason a student working through this book will be well prepared to communicate with success in the business environment.

Pre-Commerce Bob Pearson,2011-02-08 Ideas for leaders to engage directly with customers to shape their brand and marketplace success Since its debut E-commerce has been centered on the transaction, which represents less than one percent of the time we spend online. Now, we are entering the era of Pre-Commerce where customers make their own decision to buy or support a brand before the transaction. Pre-Commerce explains how the exploding use of social media channels has fundamentally changed the way customers go about making their purchasing decisions, how they educate themselves and why they choose to support certain brands above others. It shows what executives must do to re-create the way their companies interact with and learn from their customers, employees and competitors. It includes exclusive interviews and anecdotes Pearson has conducted or experienced with numerous influential C-suite executives during his time as leader of Dell's global social media team and as a consultant to Fortune 1000 companies, worldwide. Offers a step-by-step process for leaders to apply this knowledge to begin transforming their companies, right now Begins with a foreword from Mark Addicks, Chief Marketing Officer, General Mills Over 25 Fortune 500 executives interviewed, including special side-bar interviews with Michael Dell and Marc Benioff Explores the concept of Pre-commerce--the customer's decision making happens well before a transaction takes place and continues after the transaction, representing 99% of time spent online, often outside a company's reach today Shows how to build internal employee networks and how to take your first and most important steps to integrate social media throughout your company. Pearson reveals that the best ideas are often free and the technology needed is rarely a cost-issue. Instead, it's a matter of the top executive deciding to adopt a new way of engaging directly with its customers.
