L2 Collaborative Writing in Diverse Learning Contexts Mimi Li,Meixiu Zhang,2023-08-15 This book is the first edited volume to compile up-to-date scholarship that discusses frontier knowledge on second language (L2) collaborative writing (CW) and highlights technology-mediated solutions to it. The volume consists of conceptual papers and empirical studies that explore theoretical, methodological, and pedagogical approaches to CW in face-to-face, online, and hybrid learning contexts. The ten chapters of the book are divided into three sections: (1) theoretical perspectives and a methodological review of CW; (2) empirical research addressing the processes, products, and effects pertaining to CW; (3) pedagogical aspects relevant to CW, namely task design, technology use, and assessment. By examining the implementation of various CW tasks across modes, genres, and L2 learning settings, this book re-evaluates the practices of CW and illustrates how diverse forms of CW can facilitate students' L2 learning and writing development.

More Texts from the Archive of Socrates Mohamed Gaber El-Maghrabi,Cornelia Römer,2021-07-05 This volume contains editions of 35 texts, which have been excavated nearly 100 years ago in the ancient Egyptian village of Karanis, and which were still waiting publication. As all texts written on papyrus from the Egyptian countryside, these texts give a new insight into the life of the people who dwelled in a typical village of the Roman period in Egypt. The texts show the cultural diversity of those who cohabitated, whether they had Greek or Egyptian names, whether their main gods were the crocodiles or Zeus. In the lives of all of them tax-paying played an important role, as well as caring for their cattle and fields, doing business, and fulfilling the obligations of the Roman government. In particular interesting is the personage of Socrates the tax-collector. Since the ruins of Karanis are still standing (and worth a visit) with two nearly intact temples from the period of the texts, a more complete image of village life emerges from texts and the archaeology behind them. Papyrologists welcome every newly published text as a further stone of the mosaic image that they try to create of the past.

Greek and Demotic Texts from the Zenon Archive P.W. Pestman,2020-02-10

Texts from the "Archive" of Socrates, the Tax Collector, and Other Contexts at Karanis Mohamed Gaber El-Maghrabi,Cornelia Römer,2014-12-16 This volume of Papyri contains a selection of 25 pieces which were excavated in the village of Karanis in the north-eastern Fayum (Egypt) by American archaeologists between 1924 and 1926. Many of the texts published here come from the archive of a well known figure in the village life of Karanis in the 2nd century AD: Socrates, son of Sarapion, was a tax collector here for many years, serving the Roman Empire collecting taxes due in money and in kind. Besides his successful economic activities - Socrates certainly belonged to the upper stratum of society in Karanis - the tax collector was a lover of Greek literature; for sure, he did not venture into high philosophy and the like, but he read Homer, comedies, and tried to be up to date about mythology in plays. Half of the new texts published here are literary, mostly from Socrates' library; other texts were found in the immediate neighbourhood of where Socrates lived, such as a surgical treatise about remedies of shoulder dislocations, which perhaps belonged to a doctor. The other half of the papyrus texts in this volume are documents that can shed new light on the activities of the tax collector, or of other inhabitants of Karanis. Altogether they give us a vivid picture of village life in Graeco/Roman Egypt in the 2nd century AD.

Short Message Service (SMS) Friedhelm Hillebrand,2010-01-21 Contributions from Finn Trosby, Kevin Holley, Ian Harris Written to celebrate the 25th anniversary of SMS standardization by the people who produced the standards, Short Message Service (SMS): The Creation of Personal Text Messaging, describes the development of the SMS standard and its ongoing evolution. The standardization of SMS started in February 1985 as a part of the creation of the second generation digital cellular system GSM, and the 25th anniversary of the first work on SMS provides an opportunity to review and understand how this service was developed. The book also looks to the future, as a large number of new GSM and evolved GSM phones will support SMS as a mass market high availability messaging service, a new simple Multimedia Messaging Service (MMS) suitable for use by everyone and for implementation in every new terminal is proposed. One of the only books which covers the complete SMS genesis from concept ideas to standardization of a first technical solution and its evolution to the present day. Describes the service concept including the limitation of the message length to 160 characters and explains the rationale behind the concept. Based on existing and newly retrieved documentation. Concludes that SMS has a long future since most future GSM phones will support SMS as the only messaging service, and so an SMS evolution is put forward.

Manuscripts and Archives Alessandro Bausi,Christian Brockmann,Michael Friedrich,Sabine Kienitz,2018-02-19 Archives are considered to be collections of administrative, legal, commercial and other records or the actual place where they are located. They have become ubiquitous in the modern world, but emerged not much later than the invention of writing. Following Foucault, who first used the word archive in a metaphorical sense as the general system of the formation and transformation of statements in his *Archaeology of Knowledge* (1969), postmodern theorists have tried to exploit the potential of this concept and initiated the archival turn. In recent years, however, archives have attracted the attention of anthropologists and historians of different denominations regarding them as historical objects and grounding them again in real institutions. The papers in this volume explore the complex topic of the archive in a historical, systematic and comparative context and view it in the broader context of manuscript cultures by addressing questions like how, by whom and for which purpose were archival records produced, and if they differ from literary manuscripts regarding materials, formats, and producers (scribes).

Neo-Babylonian Court Procedure Shalom E. Holtz,2009 Even though scholars have known of Neo-Babylonian legal texts almost since Assyriology's very beginnings, no comprehensive study of court procedure has been undertaken. This lack is particularly glaring in light of studies of court procedure in earlier periods of Mesopotamian history. With these studies as a model, this book begins by presenting a comprehensive classification of the text-types that made up the tablet trail of records of the adjudication of legal disputes in the Neo-Babylonian period. In presenting this text-typology, it considers the texts' legal function within the adjudicatory process. Based on this, the book describes the adjudicatory process as it is attested in private records as well as in records from the Eanna at Uruk.

The Archive of the Theban Choachyte Petebaste Son of Peteamunip (Floruit 7th Century BCE) Koenraad Donker Van Heel,2021-05-12 This book is the first ever edition of an abnormal hieratic business archive from the Louvre of a mortuary priest in 7th century BCE Thebes (Egypt), discussing points of history, law, economics, religion, grammar, chronology and abnormal hieratic palaeography.

The House of the Father As Fact and Symbol J. David Schloen,2018-07-17 The first two volumes on patrimonialism in Ugarit and the ancient Near East, this book opens with a lengthy introduction on the interpretation of social action and households in the ancient world. Following this foundation, Schloen embarks on a societal and domestic study of the Late Bronze Age kingdom of Ugarit in its wider Near Eastern context.

A Companion to the Achaemenid Persian Empire, 2 Volume Set Bruno Jacobs,Robert Rollinger,2021-08-31 A COMPANION TO THE ACHAEMENID PERSIAN EMPIRE A comprehensive review of the political, cultural, social, economic and religious history of the Achaemenid Empire Often called the first world empire, the Achaemenid Empire is rooted in older Near Eastern traditions. A Companion to the Achaemenid Persian Empire offers a perspective in which the history of the empire is embedded in the preceding and subsequent epochs. In this way, the traditions that shaped the Achaemenid Empire become as visible as the powerful impact it had on further historical development. But the work does not only break new ground in this respect, but also in the fact that, in addition to written testimonies of all kinds, it also considers material tradition as an equal factor in historical reconstruction. This comprehensive two-volume set features contributions by internationally-recognized experts that offer balanced coverage of the whole of the empire from Anatolia and Egypt across western Asia to northern India and Central Asia. Comprehensive in scope, the Companion provides readers with a panoramic view of the diversity, richness, and complexity of the Achaemenid Empire, dealing with all the many aspects of history, event history, administration, economy, society, communication, art, science and religion, illustrating the multifaceted nature of the first true empire. A unique historical account presented in its multiregional dimensions, this important resource deals with many aspects of history, administration, economy, society, communication, art, science and religion it deals with topics that have only recently attracted interest such as court life, leisure activities, gender roles, and more examines a variety of available sources to consider those predecessors who influenced Achaemenid structure, ideology, and self-expression contains the study of Nachleben and the history of perception up to the present day offers a spectrum of opinions in disputed fields of research, such as the interpretation of the imagery of Achaemenid art, or questions of religion includes extensive bibliographies in each chapter for use as starting points for further research devotes special interest to the east of the empire, which is often neglected in comparison to the western territories Part of the acclaimed Blackwell Companions to the Ancient World series, A Companion to the Achaemenid Persian Empire is an indispensable work for students, instructors, and scholars of Persian and ancient world history, particularly the First Persian Empire.

Fault, Responsibility, and Administrative Law in Late Babylonian Legal Texts F. Rachel Magdalene,Cornelia Wunsch,Bruce Wells,2020-01-10 This book presents a reassessment of the governmental systems of the Late Babylonian period—specifically those of the Neo-Babylonian and early Persian empires—and provides evidence demonstrating that these are among the first to have developed an early form of administrative law. The present study revolves around a particular expression that, in its most common form, reads *hītu ša šarri išaddad* and can be translated as “he will be guilty (of an offense) against the king.” The authors analyze ninety-six documents, thirty-two of which have not been previously published, discussing each text in detail, including the syntax of this clause and its legal consequences, which involve the delegation of responsibility in an administrative context. Placing these documents in their historical and institutional contexts, and drawing from the theories of Max Weber and S. N. Eisenstadt, the authors aim to show that the administrative bureaucracy underlying these documents was a more complex, systematized, and rational system than has previously been recognized. Accompanied by extensive indexes, as well as transcriptions and translations of each text analyzed here, this book breaks new ground in the study of ancient legal systems.

Archival Historiography in Jewish Antiquity Laura Carlson Hasler,2020 If history is narrative, than Ezra-Nehemiah is only partly history. Well over half of Ezra-Nehemiah is not a narrative but rather a patchwork of cited texts that are frequently intervening in the story. The capacity of citations in Ezra-Nehemiah to offend the historiographical, aesthetic, and theological sensibilities of scholars in the last century invites us to renew the question of what citation accomplishes in this context. In this book, I label the citation style in Ezra-Nehemiah, archival historiography. I argue that the act of citation in Ezra-Nehemiah forms an alternative site of archiving in Ezra-Nehemiah and this hybrid literary form prioritizes the assembly and organization of documents over the production of a seamless narrative. I begin this argument by comparing this literary form with archival institutions and practices across the landscape of the ancient Near East, contending that Ezra-Nehemiah adapts the symbolic power of these ancient collections. I then identify the role of the imperial archive within the narrative of Ezra-Nehemiah, where it surfaces as an axial and ambivalent source of political power. By reviewing the cited documents in Ezra-Nehemiah, this book argues that the act of citation is not, as has been commonly argued, solely or even primarily in the business of authorizing this account or symbolizing the fulfillment of prophetic promises. Rather, citation in Ezra-Nehemiah is aimed at reestablishing a community by organizing memory into retrievable texts. Archival historiography thus constitutes an essential act of communal recovery. Creating an archive within the pages of Ezra-Nehemiah represents the cultural vitality of the Judean community after the losses of exile and while living in the long shadow of imperial rule. --

Tablets from the Iri-saġrig Archive Marcel Sigrist,Tohru Ozaki,2021-06-21 While each of the previously known archives from the Third Dynasty of Ur has provided distinct views of Sumerian society, those from Iri-Saġrig present an extraordinary range of new sources, depicting a cosmopolitan Sumerian/Akkadian city unlike any other from this period. In this publication, Marcel Sigrist and Tohru Ozaki present more than two thousand newly identified tablets, mostly from Iri-Saġrig. This unique and extensive corpus elucidates the importance that Iri-Saġrig represented politically, militarily, and culturally in Sumer. Although these tablets were not able to be cleaned, baked, or photographed, the authors’ transliterations are based on the original tablets, often after repeated collations. Moreover, access to so many well-preserved tablets made it possible to improve upon the readings and interpretations offered in previous publications. Volume 1 contains a catalog and classification of the texts by provenance, a list of month names and year formulas, another of inscriptions, a chronological listing of the texts, and extensive indexes of personal names, deities, toponyms, and selected words and phrases. Volume 2 presents the texts in transliteration with substantial commentary. This two-volume publication preserves and makes available to the scholarly community a significant segment of Iraq’s cultural legacy that otherwise might have been ignored or even lost. It will augment and enhance our understanding of the unique civilization of Mesopotamia in the late third millennium BCE.

The Materiality of the Archive Sue Breakell,Wendy Russell,2023-10-30 The Materiality of the Archive is the first volume to bring together a range of methodological approaches to the materiality of archives, as a framework for their engagement, analysis and interpretation. Focusing on the archives of creative practices, the book reaches between and across existing bodies of knowledge in this field, including material culture, art history and literary studies, unified by an interest in archives as material deposits and aggregations, in both analogue and digital forms, as well as the material encounter. Connecting a breadth of disciplinary interests in the archive with expanding discourses in materiality, contributors address the potential of a material engagement to animate archival content. Analysing the systems, processes and actions that constitute

the shapes, forms and structures in which individual archival objects accumulate, and the underpinnings which may hold them in place as an archival body, the book considers ways in which the inexorable move to the digital affects traditional theories of the physical archival object. It also considers how stewardship practices such as description and metadata creation can accommodate these changes. The Materiality of the Archive unifies theory and practice and brings together professional and academic perspectives. The book is essential reading for academics, researchers and postgraduate students working in the fields of archive studies, museology, art history and material culture.
