Social Perception M.D. Rutherford, Valerie A.

Kuhlmeier, 2013-08-30 An interdisciplinary exploration of perceptual and cognitive processes underlying the ability to perceive social information, drawing on current research and new experimental techniques. As we enter a room full of people, we instantly have a number of social perceptions. We have an automatic perception of others as subjective agents with their own points of view, thoughts, and goals, and we can quickly interpret minimal visual information to infer that something is animate. This book explores the perceptual and cognitive processes that allow humans to perceive and understand this social information quickly and apparently effortlessly. Top researchers in fields ranging from developmental psychology to vision science consider the perception of biological and animate motion, inferences based on this motion, and the early development of these abilities. These innovative contributions reflect a recent renewal of interest in the attribution of agency and the understanding of goal-directed behavior, which has been accompanied by a rapid increase in empirical discoveries enabled by such new experimental techniques as brain imaging. The research presented in *Social Perception* suggests that an intuitive understanding of others is an integral part of human psychology, develops early, relies on a network of brain regions, and may be compromised in autism. PEDAGOGY OF SOCIAL SCIENCES MANGAL, S. K.,MANGAL,

UMA,2018-01-01 Written in an easy-to-understand style, the text has been thoroughly revised in tune with the spirit and need of the new nomenclature Pedagogy of Social Sciences in place of the old

designation Teaching of Social Studies. It reflects on the theoretical knowledge and practical skills required to teach Social Sciences in an effective manner. Introducing new chapters, the second edition of the book mainly focuses on improving the methodological concepts of the Social Sciences teachers. In doing so, it covers various strategies and devices of teaching Social Sciences, e-learning in Social Sciences, e-learning resources in Social Sciences, and professional growth of the Social Sciences teacher. Besides, the chapters of the previous edition have been updated, with the required information given in various new sections. This book is suitable for a course on 'Pedagogy of Social Sciences' for the students of B.Ed. and M.A. (Education). It can also be used for the in-service teacher education programmes organized by the Central and State education boards.

NEW TO THE SECOND EDITION ☐ In addition to the four new chapters, the book now incorporates several new sections: • Concept and meaning of the term Social Sciences; distinguishing the subject Social Sciences from Natural Sciences and the subject Social Studies; justification for using the term teaching/pedagogy of Social Sciences in place of teaching/pedagogy of Social Studies (Chapter 1) • Bloom's revised taxonomy, 2001 (Chapter 4) • Views of NCF and Focus Group (NCERT) about curriculum at the various stages of school education (Chapter 5) • Survey method and cooperative learning method for the teaching of Social Sciences (Chapter 7) • Reference books in Social Sciences (Chapter 9) • Atlases, newspapers, digital audio recorders and players and documentaries as instructional material or teaching aids (Chapter 11) • Question banks, grading system, open book examinations and use of rubrics as the means and ways for improving the evaluation programmes in Social Sciences (Chapter 23) ☐ Also, the chapter on 'Relationship of Social Studies with other Subjects' has been replaced with a more

comprehensive and detailed chapter on ‘Correlation in Social Sciences’ (Chapter 6). KEY FEATURES ☐ Chapter-end summary and study questions to help readers review the important topics and drill the concept discussed, respectively. ☐ Numerous figures and tables to facilitate easy understanding of the concepts. ☐ References and Suggested Readings to provide scope for further reading.

How Civic Action Works Paul Lichterman, 2020-12-15 The ways that social advocates organize to fight unaffordable housing and homelessness in Los Angeles, illuminated by a new conceptual framework for studying collective action How Civic Action Works renews the tradition of inquiry into collective, social problem solving. Paul Lichterman follows grassroots activists, nonprofit organization staff, and community service volunteers in three coalitions and twelve organizations in Los Angeles as they campaign for affordable housing, develop new housing, or address homelessness. Lichterman shows that to understand how social advocates build their campaigns, craft claims, and choose goals, we need to move beyond well-established thinking about what is strategic. Lichterman presents a pragmatist-inspired sociological framework that illuminates core tasks of social problem solving, both contentious and noncontentious, by grassroots and professional advocates alike. He reveals that advocates’ distinct styles of collective action produce different understandings of what is strategic, and generate different dilemmas for advocates because each style accommodates varying social and institutional pressures. We see, too, how patterns of interaction create a cultural filter that welcomes some claims about housing problems while subordinating or delegitimizing others. These cultural patterns help solve conceptual and practical puzzles, such as why coalitions fragment when members agree on many things, and what makes advocacy

campaigns separate housing from homelessness or affordability from environmental sustainability. Lichterman concludes by turning this action-centered framework toward improving dialogue between social advocates and researchers. Using extensive ethnography enriched by archival evidence, *How Civic Action Works* explains how advocates meet the relational and rhetorical challenges of collective action.

Raspberry Pi 3 Projects for Java Programmers Pradeeka

Seneviratne, John Sirach, 2017-05-31 Learn the art of building enticing projects by unleashing the potential of Raspberry Pi 3 using Java About This Book Explore the small yet powerful mini computer in order to run java applications Leverage Java libraries to build exciting projects on home automation, IoT, and Robotics by leveraging Java libraries Get acquainted with connecting electronic sensors to your Raspberry Pi 3 using Java APIs. Who This Book Is For The book is aimed at Java programmers who are eager to get their hands-on Raspberry Pi and build interesting projects using java. They have a very basic knowledge of Raspberry Pi. What You Will Learn Use presence detection using the integrated bluetooth chip Automatic light switch using presence detection Use a centralized IoT service to publish data using RPC Control a robot by driving motors using PWM Create a small web service capable of performing actions on the Raspberry Pi and supply readings Image capture using Java together with the OpenCV framework In Detail Raspberry Pi is a small, low cost and yet very powerful development platform. It is used to interact with attached electronics by the use of it's GPIO pins for multiple use cases, mainly Home Automation and Robotics. Our book is a project-based guide that will show you how to utilize the Raspberry Pi's GPIO with Java and how you can leverage this

utilization with your knowledge of Java. You will start with installing and setting up the necessary hardware to create a seamless development platform. You will then straightaway start by building a project that will utilize light for presence detection. Next, you will program the application, capable of handling real time data using MQTT and utilize RPC to publish data to adafruit.io. Further, you will build a wireless robot on top of the zuma chassis with the Raspberry Pi as the main controller. Lastly, you will end the book with advanced projects that will help you to create a multi-purpose IoT controller along with building a security camera that will perform image capture and recognize faces with the help of notifications. By the end of the book, you will be able to build your own real world usable projects not limited to Home Automation, IoT and/or Robotics utilizing logic, user and web interfaces. Style and approach The book will contain projects that ensure a java programmer gets started with building interesting projects using the small yet powerful Raspberry Pi 3. We will start with brushing up your Raspberry Pi skills followed by building 5-6 projects

Slideshow M. Darsie Alexander, Charles Harrison, Robert Storr, 2005 Since the 1960s, an international group of artists has embraced slide projection as a dynamic alternative to the tradition of painting, blending aspects of photography, film, and installation art. Slide Show is the first in-depth examination of how slides evolved into one of the most exciting art forms of our time. Essays by leading scholars and 200 color illustrations provide visual, historical, and critical insight into this unique medium.

Digital Culture & Society (DCS) Ramón Reichert, Annika

Richterich,Pablo Abend,Mathias Fuchs,Karin Wenz,2016-12-31

»Digital Culture & Society« is a refereed, international journal, fostering discussion about the ways in which digital technologies, platforms and applications reconfigure daily lives and practices. It offers a forum for critical analysis and inquiries into digital media theory and provides a publication environment for interdisciplinary research approaches, contemporary theory developments and methodological innovation. The third issue »Politics of Big Data« edited by Mark Coté, Paolo Gerbaudo, and Jennifer Pybus, critically examines the political and economic dimensions of Big Data and thus details its contestation. The contributions focus on the materialities and processes which manifest Big Data and explore forms of value beyond the state and capital. These range from open data initiatives, social media metrics, machine learning algorithms, data visualisation to data dashboards, critical data analysis, and new modes of data action research and practice.

The Adobe Photoshop Lightroom 5 Book Martin

Evening,2013-07-02 Adobe Photoshop Lightroom was designed from the ground up with digital photographers in mind, offering powerful editing features in a streamlined interface that lets photographers import, sort, and organize images. In this completely updated bestseller, author Martin Evening describes features in Lightroom 5 in detail from a photographer's perspective. As an established commercial and fashion photographer, Martin knows firsthand what photographers need for an efficient workflow. He has been working with Lightroom from the beginning, monitoring the product's development and providing valued feedback to Adobe. As a result, Martin knows the software inside and out, from image selection to image editing and image management. In this book he'll teach you how to: Work efficiently with images shot in raw or JPEG formats

Import photographs with ease and sort them according to your workflow Create and manage a personal image and video library Quickly apply tonal adjustments to multiple images Integrate Lightroom with Adobe Photoshop Export images for print or Web as digital contact sheets or personal portfolios Make the most of new features in Lightroom 5, such as extended spot removal, Upright™ corrections, and Smart Previews Photographers will find Lightroom 5—and The Adobe Photoshop Lightroom 5 Book—indispensable tools in their digital darkrooms. “With Martin’s expert guidance, you’ll soon find that you have precisely the tools you need to turn your concentration back where it belongs—on making better pictures!” —George Jardine, digital photography consultant “As a photographer himself, Martin Evening knows what tools photographers need to realize their creative vision. In this book, he shows not only how Adobe Photoshop Lightroom works but also why it will become an essential part of any photographer’s workflow.” —Greg Gorman, photographer

Better Presentations Jonathan Schwabish, 2016-11-15 Whether you are a university professor, researcher at a think tank, graduate student, or analyst at a private firm, chances are that at some point you have presented your work in front of an audience. Most of us approach this task by converting a written document into slides, but the result is often a text-heavy presentation saddled with bullet points, stock images, and graphs too complex for an audience to decipher—much less understand. Presenting is fundamentally different from writing, and with only a little more time, a little more effort, and a little more planning, you can communicate your work with force and clarity. Designed for presenters of scholarly or data-intensive content, **Better Presentations** details essential strategies for developing clear, sophisticated, and visually captivating presentations. Following three core principles—visualize, unify, and focus—**Better Presentations** describes how to visualize data effectively, find and use images appropriately, choose sensible fonts and colors, edit text for powerful delivery, and restructure a written argument for maximum engagement and persuasion. With a range of clear examples for what to do (and what not to do), the practical package offered in **Better Presentations** shares the best techniques to display work and the best tactics for winning over audiences. It pushes presenters past the frustration and intimidation of the process to more effective,

memorable, and persuasive presentations.

digitalSTS Janet Vertesi,David Ribes,2019-05-07 New perspectives on digital scholarship that speak to today's computational realities. Scholars across the humanities, social sciences, and information sciences are grappling with how best to study virtual environments, use computational tools in their research, and engage audiences with their results. Classic work in science and technology studies (STS) has played a central role in how these fields analyze digital technologies, but many of its key examples do not speak to today's computational realities. This groundbreaking collection brings together a world-class group of contributors to refresh the canon for contemporary digital scholarship. In twenty-five pioneering and incisive essays, this unique digital field guide offers innovative new approaches to digital scholarship, the design of digital tools and objects, and the deployment of critically grounded technologies for analysis and discovery. Contributors cover a broad range of topics, including software development, hackathons, digitized objects, diversity in the tech sector, and distributed scientific collaborations. They discuss

methodological considerations of social networks and data analysis, design projects that can translate STS concepts into durable scientific work, and much more. Featuring a concise introduction by Janet Vertesi and David Ribes and accompanied by an interactive microsite, this book provides new perspectives on digital scholarship that will shape the agenda for tomorrow’s generation of STS researchers and practitioners.
