Dal Yong Jin

Social Media in Northern Chile Nell Haynes, 2016-06-06 Based on 15 months of ethnographic research in the city of Alto Hospicio in northern Chile, this book describes how the residents use social media, and the consequences of this use in their daily lives. Nell Haynes argues that social media is a place where Alto Hospicio's residents – or Hospiceños – express their feelings of marginalisation that result from living in city far from the national capital, and with a notoriously low quality of life compared to other urban areas in Chile. In actively distancing themselves from residents in cities such as Santiago, Hospiceños identify as marginalised citizens, and express a new kind of social norm. Yet Haynes finds that by contrasting their own lived experiences with those of people in metropolitan areas, Hospiceños are strengthening their own sense of community and the sense of normativity that shapes their daily lives. This exciting conclusion is illustrated by the range of social media posts about personal relationships, politics and national citizenship, particularly on Facebook

Dismantling Cultural Borders Through Social Media and Digital Communications Emmanuel K. Ngwainmbi, 2022-02-18 This book explores how social media and its networked communities dismantles, builds, and shapes identity. Social media has been instrumental, sometimes dangerously so, in binding together different communities; with thirteen original chapters by leading academics in the field, the volume investigates how belonging, togetherness, and loyalty is created in the digital sphere, in a way that transcends, and even dismantles, ethnic and national borders around the world. In tandem, the volume analyses the further threats to identity presented by the ease with which fabricated news and information spreads on social media, resulting in many users becoming unable to distinguish credible data from junk data. Social media is both creative and destructive in its influence on identity, and therefore the growing fake news crisis threatens the very stability of the world's communities. This book provides relevant theoretical frameworks and the latest empirical research findings in the area, including diverse case studies and analyses of social media experiences in indigenous and urban communities around the world, including China, Africa, and Central and South America.

The Routledge Handbook of Digital Media and Globalization Dal Yong Jin, 2021-05-12 In this comprehensive volume, leading scholars of media and communication examine the nexus of globalization, digital media, and popular culture in the early 21st century. The book begins by interrogating globalization as a critical and intensely contested concept, and proceeds to explore how digital media have influenced a complex set of globalization processes in broad international and comparative contexts. Contributors address a number of key political, economic, cultural, and technological issues relative to globalization, such as free trade agreements, cultural imperialism, heterogeneity, the increasing dominance of American digital media in global cultural markets, the powers of the nation-state, and global corporate media ownership. By extension, readers are introduced to core theoretical concepts and practical ideas, which they can apply to a broad range of contemporary media policies, practices, movements, and technologies in different geographic regions of the world—North America, Europe, Africa, the Middle East, Latin America, and Asia. Scholars of global media, international communication, media industries, globalization, and popular culture will find this to be a singular resource for understanding the interconnected relationship between digital media and globalization.

Disinformation in the Global South Herman Wasserman, Dani Madrid-Morales, 2022-04-19 A timely and incisive exploration of disinformation and its impact in the Global South In Disinformation

in the Global South, media and communications scholars Herman Wasserman and Dani Madrid-Morales deliver a unique and geographically diverse collection of perspectives on the phenomenon of disinformation as it manifests in the Global South. In many parts of the Global South, coordinated political disinformation campaigns, rumor, and propaganda have long been a part of the social fabric, even before disinformation has become an area of scholarship in the Global North. The way disinformation manifests in this region, and responses to it, can therefore be highly instructive for readers around the world. Through case studies and comparative analyses, the book explores the impact of disinformation in Africa, Latin America, the Arab World and Asia. The chapters in this book discuss the similarities and differences of disinformation in different regions and provide a broad thematic overview of the phenomenon as it manifests across the Global South. After analyzing core concepts, theories and histories from Southern perspectives, contributors explore the experiences of media users and the responses to disinformation by various social actors drawing on examples from a dozen countries. Disinformation in the Global South also includes: A thorough introduction to Southern perspectives on national histories, theories of disinformation, and research methods in disinformation studies Global case studies of cultures of disinformation, including ethnographic insights into how audiences engage with disinformation Comprehensive explorations of responses to online and offline disinformation, including discussions of news literacy and the management of disinformation A valuable resource for scholars of disinformation everywhere, as well as senior undergraduate and graduate students in courses covering transnational or global perspectives to communication studies, Disinformation in the Global South is also an ideal reference for anyone studying or working in media or journalism.

Translating Blackness Lorgia García Peña, 2022-08-29 In *Translating Blackness* Lorgia García Peña considers Black Latinidad in a global perspective in order to chart colonialism as an ongoing sociopolitical force. Drawing from archives and cultural productions from the United States, the Caribbean, and Europe, García Peña argues that Black Latinidad is a social, cultural, and political formation—rather than solely a site of identity—through which we can understand both oppression and resistance. She takes up the intellectual and political genealogy of Black Latinidad in the works of Frederick Douglass, Gregorio Luperón, and Arthur Schomburg. She also considers the lives of Black Latina women living in the diaspora, such as Black Dominicana guerrillas who migrated throughout the diaspora after the 1965 civil war and Black immigrant and second-generation women like Mercedes Frías and Milagros Guzmán organizing in Italy with other oppressed communities. In demonstrating that analyses of Black Latinidad must include Latinx people and cultures throughout the diaspora, García Peña shows how the *vaivén*—or, coming and going—at the heart of migrant life

reveals that the nation is not a sufficient rubric from which to understand human lived experiences.

Routledge Handbook of Political Advertising Christina Holtz-Bacha,Marion R. Just,2017-02-24 This Handbook provides the most comprehensive overview of the role of electoral advertising on television and new forms of advertising in countries from all parts of the world currently available. Thematic chapters address advertising effects, negative ads, the perspective of practitioners and gender role. Country chapters summarize research on issues including political and electoral systems; history of ads; the content of ads; reception and effects of ads; regulation of political advertising on television and the Internet; financing political advertising; and prospects for the future. The Handbook confirms that candidates spend the major part of their campaign budget on television advertising. The US enjoys a special situation with almost no restrictions on electoral advertising whereas other countries have regulation for the time, amount and sometimes even the content of electoral advertising or they do not allow television advertising at all. The role that television advertising plays in elections is dependent on the political, the electoral and the media context and can generally be regarded as a reflection of the political culture of a country. The Internet is relatively unregulated and is the channel of the future for political advertising in many countries

Encyclopedia of Social Media and Politics Kerric Harvey, 2013-12-20 The Encyclopedia of Social Media and Politics explores how the rise of social media is altering politics both in the United States and in key moments, movements, and places around the world. Its scope encompasses the disruptive technologies and activities that are changing basic patterns in American politics and the amazing transformations that social media use is rendering in other political systems heretofore resistant to democratization and change. In a time when social media are revolutionizing and galvanizing politics in the United States and around the world, this encyclopedia is a must-have reference. It reflects the changing landscape of politics where old modes and methods of political communication from elites to the masses (top down) and from the masses to elites (bottom up) are being displaced rapidly by social media, and where activists are building new movements and protests using social media to alter mainstream political agendas. Key Features This three-volume A-to-Z encyclopedia set includes 600 short essays on high-interest topics that explore social media's impact on politics, such as “Activists and Activism,” “Issues and Social Media,” “Politics and Social Media,” and “Popular Uprisings and Protest.” A stellar array of world renowned scholars have written entries in a clear and accessible style that invites readers to explore and reflect on the use of social media by political candidates in this country, as well as the use of social media in protests overseas. Unique to this book is a detailed appendix with material unavailable anywhere else tracking and

illustrating social media usage by U.S. Senators and Congressmen. This encyclopedia set is a must-have general, non-technical resource for students and researchers who seek to understand how the changes in social networking through social media are affecting politics, both in the United States and in selected countries or regions around the world.

Social Media in Trinidad Jolynna Sinanan, 2017-11-21 Drawing on 15 months of ethnographic research in one of the most under-developed regions in the Caribbean island of Trinidad, this book describes the uses and consequences of social media for its residents. Jolynna Sinanan argues that this semi-urban town is a place in-between: somewhere city dwellers look down on and villagers look up to. The complex identity of the town is expressed through uses of social media, with significant results for understanding social media more generally. Not elevating oneself above others is one of the core values of the town, and social media becomes a tool for social visibility; that is, the process of how social norms come to be and how they are negotiated. Carnival logic and high-impact visuality is pervasive in uses of social media, even if Carnival is not embraced by all Trinidadians in the town and results in presenting oneself and association with different groups in varying ways. The study also has surprising results in how residents are explicitly non-activist and align themselves with everyday values of maintaining good relationships in a small town, rather than espousing more worldly or cosmopolitan values.
