Local Social Innovation to Combat Poverty and Exclusion Oosterlynck, Stijn,Novy, Andreas,2019-11-27 Based on more than thirty case studies in eight different countries, this book explores the governance dynamics of local social innovations in the field of poverty reduction. The diverse team of contributors reflect on the trajectory of social innovation in European governance. They illustrate how different governance dynamics and welfare mixes enable or hinder poverty reduction strategies and analyse how they involve a diversity of actors, instruments and resources at different spatial scales. The contributions are based on research motivated by the standstill in the fight against poverty in Europe and the anxiety that conventional macro-social policies are insufficient to deal with the current challenges.

Socially Responsible Higher Education Budd L. Hall,Rajesh Tandon,2021-05-03 Listen to the podcast! Is the university contributing to our global crises or does it offer stories of hope? Much recent debate about higher education has focussed upon rankings, quality, financing and student mobility. The COVID-19 pandemic, the climate crisis, the calls for decolonisation, the persistence of gender violence, the rise of authoritarian nationalism, and the challenge of the United Nations Sustainable Development Goals have taken on new urgency and given rise to larger questions about the social relevance of higher education. In this new era of uncertainty, and perhaps opportunity, higher education institutions can play a vital role in a great transition or civilisational shift to a newly imagined world. Socially Responsible Higher Education: International Perspectives on Knowledge Democracy shares the experiences of a broadly representative and globally dispersed set of writers on higher education and social responsibility, broadening perspectives on the democratisation of knowledge. The editors have deliberately sought examples and viewpoints from parts of the world that are seldom heard in the international literature. Importantly, they have intentionally chosen to achieve a gender and diversity balance among the contributors. The stories in this book call us to take back the right to imagine, and ‘reclaim’ the public purposes of higher education.

In the Nature of Cities Nik Heynen,Maria Kaika,Erik Swyngedouw,2006-03-23 The social and material production of urban nature has recently emerged as an important area in urban studies, human/environmental interactions and social studies. This has been prompted by the recognition that the material conditions that comprise urban environments are not independent from social, political, and economic processes, or from the cultural construction of what constitutes the ‘urban’ or the ‘natural’. Through both theoretical and empirical analysis, this groundbreaking collection offers an integrated and relational approach to untangling the interconnected processes involved in forming urban landscapes. The essays in this book attest that the re-entry of the ecological agenda into urban theory is vital both in terms of understanding contemporary urbanization processes, and of engaging in a meaningful environmental politics. They debate the central themes of whose nature is, or becomes, urbanized, and the uneven power relations through which this socio-metabolic transformation takes place. Including urban case studies, international research and contributions from prominent urban scholars, this volume will enable students, scholars and researchers of geographical, environmental and urban studies to better understand how interrelated, everyday economic, political and cultural processes form and transform urban environments.

A History of Socially Responsible Business, c.1600–1950 William A Pettigrew,David Chan Smith,2017-10-26 This book examines the changing reciprocal relationships between corporations and their various social obligations over the very long term - from the seventeenth to the twentieth century. Chapters from emerging and established business historians assess the full range of social obligations that corporations held historically. By adopting an innovative methodological approach that is long-term and comparative, this book offers a challenge to the literature on corporate history and will be of interest to researchers and academics in the field of finance and business history.

University Engagement With Socially Excluded Communities Paul Benneworth,2012-11-13 This volume provides insightful analysis of the way higher education engages with socially excluded communities. Leading researchers and commentators examine the validity of the claim that universities can be active facilitators of social mobility, opening access to the knowledge economy for formerly excluded groups. The authors assess the extent to which the ‘Academy’ can deliver on its promise to build bridges with communities whose young people often assume that higher education lies beyond their ambitions. The chapters map the core dynamics of the relationship between higher education and communities which have bucked the more general trend of rapidly rising student numbers. Contributors also take the opportunity to reflect on the potential impact of these dynamics on the evolution of the university’s role as a social institution. The volume was inspired by a symposium attended by a wide spectrum of participants, including government, senior university managers, academic researchers and community groups based in areas suffering from social exclusion. It makes a substantive contribution to an under-researched field, with authors seeking to both shape solutions as well as better diagnose the problem. Some chapters include valuable contextual analysis, using empirical data from North America, Europe and Australia to add substance to the debates on policy and theory. The volume seeks to offer a defining intellectual statement on the interaction between the concept of a ‘university’ and those communities historically missing from higher education participation, the volume deepens our understanding of what might characterise an ‘engaged’ university and strengthens the theoretical foundations of the topic.

Socio-Environmental Regimes and Local Visions Minerva Arce Ibarra,Manuel Roberto Parra Vázquez,Eduardo Bello Baltazar,Luciana Gomes de Araujo,2020-09-13 This book presents oral histories, collective dialogues, and analyses of rural and indigenous livelihoods facing global socio-environmental regime change in Latin America (LA). Since the late twentieth century, rural and indigenous producers in LA, including agriculturists, coffee-growers, as well as small-scale farmers/fishers, and others, have had to resist, cope with, or adapt to a range of neoliberal socio-environmental regimes that impact their territories and associated resources, including water, production systems and ultimately their cultural traditions. In response, rural producers are using local visions and innovation niches to decide what, when, and how to resist, cope with uncertainty, and still be successful in using their customary laws to retain their land rights and livelihoods. This book presents a range of ethnically diverse case studies from LA, which addresses socio-environmental, educational, and law regimes’ effects using transdisciplinary research approaches in rural, traditional and indigenous production systems. Based on both, the results and insights gained into how producers are resisting and adapting to these regimes, as well as decades of research carried out in LA rural territories by the participating authors, the book puts forward a baseline for devising new public policies that are better suited to the real challenges of livelihoods, poverty, and environmental degradation in LA. These recommendations are rooted in post-development thinking; they promote territorial public policy with social inclusion and a human’s rights approach. The book draws on over 20 years of research carried out by LA’s academics and their undergraduate and graduate

students who have addressed collaborative work, participatory research, and transdisciplinary approaches with rural commons and communities in LA. It features 19 case studies, with contributions from Argentina, Bolivia, Brazil, Colombia, Cuba, Honduras, and Mexico.

Socially Responsible Consumption and Marketing in Practice Jishnu Bhattacharyya, M. S. Balaji, Yangyang Jiang, Jaylan Azer, Chandana R. Hewege, 2022-01-31 The book provides an overview of socially responsible consumption and marketing, as well as a collection of teaching cases that discuss and emphasize how 21st-century organizations, both for-profit and non-profit, are addressing socially responsible consumers and meeting their changing needs while remaining profitable. Consumers, governments, academics, and practitioners are becoming more interested in promoting positive social changes through consumption. As a result, this book aims to understand the practice of marketing in bringing about positive social change through real-life case studies. Consumption by socially responsible consumers who care about the social good is unique, not only because of its inter-disciplinary and substantive subject matter but also because it presents challenges and pushes organizations to make significant changes in the ways they have been accomplishing organizational activities in the twenty-first century, from procurement to production to sales and services. The book goes beyond individual consumers and their lifestyles to promote the scope of discussing marketing strategies. It seeks to comprehend how people consume and how socially responsible consumption is conceived. The case studies present and pursue integrated solutions for more sustainable consumption. This is a must-read for marketers who want to reach out to socially responsible consumers.

Socially Engaged Art after Socialism Isabel Galliera, 2017-05-30 Reclaiming public life from the ideologies of both communist regimes and neoliberalism, their projects have harnessed the politically subversive potential of social relations based on trust, reciprocity and solidarity. Drawing on archival material and exclusive interviews, in this book Isabel Galliera traces the development of socially engaged art from the early 1990s to the present in Bulgaria, Hungary and Romania. She demonstrates that, in the early 1990s, projects were primarily created for exhibitions organized and funded by the Soros Centers for Contemporary Art. In the early 2000s, prior to Bulgaria, Hungary and Romania entering into the European Union, EU institutions likewise funded socially-conscious public art in the region. Today, socially engaged art is characterised by the proliferation of independent and often self-funded artists' initiatives in cities such as Sofia, Bucharest and Budapest. Focusing on the relationships between art, social capital and civil society, Galliera employs sociological and political theories to reveal that, while social capital is generally considered a mechanism of exclusion in the West, in post-socialist contexts it has been leveraged by artists and curators as a vital means of communication and action.

Placing the Social Economy Ash Amin, Angus Cameron, Ray Hudson, 2002-05-09 In recent years there has been a great deal of discussion about the social economy and the term 'the third way' has attained a level of household recognition, especially in America and Britain. Academics and commentators have debated the usefulness of the social economy as a restraint on capitalist excesses with some arguing that the 'third way' is

Dealing with Socially Responsible Consumers Jishnu Bhattacharyya, 2023-01-01 This book contains a collection of teaching cases that study and emphasise how twenty-first-century businesses address and satisfy the needs and wants of socially conscious consumers while remaining profitable. This book explores the practise of marketing for societal benefit through real-life case studies. It provides a critical understanding of marketing approaches such as social marketing, sustainability marketing, and other practises of a similar nature. Socially Engaged Art History and Beyond Cindy Persinger, Azar Rejaie, 2021-02-04 What is socially engaged art history? Art history is typically understood as a discipline in which academics produce scholarship for consumption by other academics. Today however, an increasing number of art historians are seeking to broaden their understanding of art historical praxis and look beyond the academy and towards socially engaged art history. This is the first book-length study to focus on these growing and significant trends. It presents various arguments for the social, pedagogical, and scholarly benefits of alternative, community-engaged, public-facing, applied, and socially engaged art history. The international line up of contributors includes academics, museum and gallery curators as well as arts workers. The first two sections of the book look at socially engaged art history from theoretical, pedagogical, and contextual perspectives. The concluding part offers a range of provocative case studies that highlight the varied and rigorous work that is being done in this area and provide a variety of inspiring models. Taken together the chapters in this book provide much-needed disciplinary recognition to socially engaged art history, while also serving as a springboard to further theoretical and practical work.

Locally Played Benjamin Stokes, 2020-04-07 How games can make a real-world difference in communities when city leaders tap into the power of play for local impact. In 2016, city officials were surprised when Pokémon GO brought millions of players out into the public space, blending digital participation with the physical. Yet for local control and empowerment, a new framework is needed to guide the power of mixed reality and pervasive play. In

Locally Played, Benjamin Stokes describes the rise of games that can connect strangers across zip codes, support the “buy local” economy, and build cohesion in the fight for equity. With a mix of high- and low-tech games, Stokes shows, cities can tap into the power of play for the good of the group, including healthier neighborhoods and stronger communities. Stokes shows how impact is greatest when games “fit” to the local community—not just in terms of culture, but at the level of group identity and network structure. By pairing design principles with a range of empirical methods, Stokes investigates the impact of several games, including Macon Money, where an alternative currency encouraged people to cross lines of socioeconomic segregation in Macon, Georgia; Reality Ends Here, where teams in Los Angeles competed to tell multimedia stories around local mythology; and Pokémon GO, appropriated by several cities to serve local needs through local libraries and open street festivals. Locally Played provides game designers with a model to strengthen existing networks tied to place and gives city leaders tools to look past technology trends in order to make a difference in the real world.
