**Understanding and Using Theory in Social Work** Juliette Oko, 2012-06-28 Written in an accessible style, this title introduces theory as an explanatory framework that is drawn upon by the social worker to inform their decision-making process, by helping to 'make sense' of what is going on.

**The Socially Responsive Self** Larry May, 1996-11 Larry May argues that socially responsive individuals need not be self-sacrificing or overly conscientious. According to May, a person's integrity and moral responsibility are shaped and limited not just by conscience but also by socialization and moral support from the communities to which he or she belongs. Applying his theory of responsibility to professional ethics, May contends that current methods of professional socialization should be changed so that professionals are not expected to ignore considerations of personal well-being, family, or community. For instance, lawyers should not place client loyalty above concerns for the common good; doctors should not place the physical well-being of patients above their mental and spiritual well-being; scientists and engineers should not feel obliged to blow the whistle on fraud and corruption unless their professional groups protect them from retaliation. This book should prove provocative reading for philosophers, political scientists, social theorists, professionals of many stripes, and ethicists.

Authors Geoffrey and Renate N. Caine have dedicated more than 20 years to researching how people learn naturally. that schools, colleges, and universities are having in response to the profound moral conflicts and personal questions facing professionals today: What should we teach our students? What values should we communicate and nurture? What should be the role of the traditional liberal arts in professional education? How should schools and colleges respond to the demands of women and minorities for a more inclusive curriculum? The authors explore ongoing theoretical and practical considerations of graduate professional education through the ethical and social issues facing professionals in public service. Administrators, teachers, counselors, nurses, or lawyers are recognizing that they face similar questions about their personal and professional lives: Is it possible to sustain a set of fully human values as a practicing professional? As a member of a public organization, how does one deal with dilemmas involving conflicting priorities and ambiguous goals?
