**Treatment of Petroleum Refinery Wastewater with Constructed Wetlands** Hassana Ibrahim Mustapha,2018-07-11 Pollution of waterbodies and the environment by petroleum industry is of particular concern in Nigeria. This problem can be addressed by the application of constructed wetlands (CWs) which is a nature-based system that is simple to construct, have low operational and maintenance costs in terms of supply of energy and its periodic maintenance. The application of CWs in Nigeria for polishing of petroleum refinery wastewater is an unprecedented research. This PhD thesis focused on some specific objectives which were characterization of treated secondary refinery wastewater, design, construction, operation and monitoring of planted (*T. latifolia*, *C. alternifolius* and *C. dactylon*) and unplanted vertical subsurface flow, horizontal subsurface flow and hybrid CWs for the removal of suspended solids, nutrients, heavy metals, organic matter and organic pollutants. The CWs effectively treated the petroleum contaminated wastewater to effluent compliance limits. In this study, *T. latifolia* planted CWs had consistently higher removal efficiencies for all the measured parameters than *C. alternifolius* and *C. dactylon* planted CW systems. Therefore, in order to improve the wastewater quality discharged by Kaduna Refining and Petrochemical Company (KRPC) Nigeria, meet stringent guidelines and protect the recipient streams, installation of CWs at the effluent discharge point of KRPC is strongly recommended.

*Britain and the Arab-Israeli Conflict, 1948-51* Ilan Pappé,1988-07-26 In an analysis of Britain's policy towards Palestine in the post-mandatory era, the author examines the circumstances which led to the formulation of Britain's policy - the partition of mandatory Palestine between Israel and Jordan - and the stages of its implementation. A major theme emerges: that Britain's Middle East policy was a function of two main features: Britain's close alliance with Transjordan; and its pragmatic adaptability to developments in the area. Based on primary sources made available only recently in British, Israeli and American archives, the book offers new insights into a policy which was to have far reaching-effects.

*Enemies Within* Scott Radnitz,2022-07-29 The invocation of fifth columns in the political arena -- whether contrived or based on real fears -- has recurred periodically throughout history and is experiencing an upsurge in our era of democratic erosion and geopolitical uncertainty. Fifth columns accusations can have baleful effects on governance and trust, as they call into question the loyalty and belonging of the targeted populations. They can cause human rights abuses, political repression, and even ethnic cleansing. *Enemies Within* is the first book to systematically investigate the roots and implications of the politics of fifth columns. In this volume, a multidisciplinary group of leading scholars address several related questions: When are actors likely to employ fifth-column claims and against whom? What accounts for changes in fifth-column framing over time? How do the claims and rhetoric of governments differ from those of societal groups? How do accusations against ethnically or ideologically defined groups differ? Finally, how do actors labeled as fifth columns respond? To answer these questions, the contributors apply a common theoretical framework and work within the tradition of qualitative social science to analyze cases from three continents, oftentimes challenging conventional wisdom. *Enemies Within* offers a unique perspective to better understand contemporary challenges including the rise of populism and authoritarianism, the return of chauvinistic nationalism, the weakening of democratic norms, and the persecution of ethnic or religious minorities and political dissidents.
