*My Little Soho Kitchen* Michelle Tchea,2013-08-15 Space may dictate the menu for many home cooks, but it can also inspire creative cooking. Join Michelle Tchea on an exciting exploration of dishes that you can whip up in your own cosy kitchen. Inspired by the chic SoHo streets of New York, Michelle developed a wide range of meals, desserts and snacks that you can enjoy on your own or with friends. Prepare a simple meal of Savoury Seafood Rice on a busy day, enjoy afternoon tea with friends over Chocolate Cake with Toasted Marshmallows, create a bit of Paris at home with Apple Frangipane Tart and indulge in Mango and Lime Daiquiri at a party. With 60 recipes to choose from, you'll be spoilt for choice. Simple, appealing and fun, this book will be a delightful addition to your home kitchen. About the Author: Michelle Tchea was born in Melbourne, Australia. She graduated with a Bachelor of Biomedical Science and Masters in Physical Chemistry, and worked as a Research and Development Chemist in product innovation. Her love for food began in her grandpa's tiny Chinese restaurant in California, famed for its delicious dumplings, hand-pulled noodles and Chinese pancakes. She was raised with a rolling pin in her hand, helping out at the restaurant during peak hours. Michelle gathers her inspiration from artisan bakers, local farmers and talented chefs she meets on her travels. She writes for various international publications, covering food, health and nutrition, as well as luxury travel.

Fascination Astronomy Arnold Hanslmeier,2023-01-05 In this work, Prof. Arnold Hanslmeier provides modern and fascinating astronomical knowledge. The book begins with a description of the origin of the universe and goes on to dark matter, black holes and the formation of the solar system. Finally, it is rounded off at the end by the exciting question: Are we alone in the universe? In this book, which originated from a lecture given at the University of Graz for students of all faculties, the author explains the interrelationships clearly and in a generally understandable way with the help of many colourful pictures, without demanding too much basic knowledge of mathematics and physics. Somewhat deeper formulas and text passages are separated from the rest of the text and can be skipped without losing the context. This third edition incorporates new findings such as the spectacular direct discovery of gravitational waves, fascinating images and data from Pluto, and the first landing on a comet. Numerous new photographs and illustrations have been added to aid understanding. The latest data in the field of exoplanet research has also been incorporated. The book is intended not only for students, but also for interested laymen as well as for all those who deal with modern findings of natural science. Physics, especially astrophysics, can be extremely exciting, I hope my readers gain just that impression by reading this book! A. Hanslmeier

**Legacies of Fukushima** Kyle Cleveland,Scott Gabriel Knowles,Ryuma Shineha,2021-04-02 This book is about the 2011 Fukushima disaster in Japan. The disaster comprised a triple punch that began with an earthquake, which caused a tsunami, which triggered a meltdown at a nuclear plant--

**Nilsson** Alyn Shipton,2013-06-19 Paul McCartney and John Lennon described him as the Beatles' favorite group, he won Grammy awards, wrote and recorded hit songs, and yet no figure in popular music is as much of a paradox, or as underrated, as Harry Nilsson. In this first ever full-length biography, Alyn Shipton traces Nilsson's life from his Brooklyn childhood to his Los Angeles adolescence and his gradual emergence as a uniquely talented singer-songwriter. With interviews from friends, family, and associates, and material drawn from an unfinished autobiography, Shipton probes beneath the enigma to discover the real Harry Nilsson. A major celebrity at a time when huge concerts and festivals were becoming the norm, Nilsson shunned live performance. His venue was the studio, his stage the dubbing booth, his greatest triumphs masterful examples of studio craft. He was a gifted composer of songs for a wide variety of performers, including the Ronettes, the Yardbirds, and the Monkees, yet Nilsson's own biggest hits were almost all written by other songwriters. He won two Grammy awards, in 1969 for Everybody's Talkin' (the theme song for Midnight Cowboy), and in 1972 for Without You, had two top ten singles, numerous album successes, and wrote a number of songs--Coconut and Jump into the Fire, to name just two--that still sound remarkably fresh and original today. He was once described by his producer Richard Perry as the finest white male singer on the planet, but near the end of his life, Nilsson's career was marked by voice-damaging substance abuse and the infamous deaths of both Keith Moon and Mama Cass in his London flat. Drawing on exclusive access to Nilsson's papers, Alyn Shipton's biography offers readers an intimate portrait of a man who has seemed both famous and unknowable--until now.

*Matthew Boulton* Sally Baggott,2016-05-13 Matthew Boulton was a leading industrialist, entrepreneur and Enlightenment figure. Often overshadowed through his association with James Watt, his Soho manufactories put Birmingham at the centre of what has recently been termed 'The Industrial Enlightenment'. Exploring his many activities and manufactures-and the regional, national and international context in which he operated-this publication provides a valuable index to the current state of Boulton studies. Combining original contributions from social, economic, and cultural historians, with those of historians of science, technology and art, archaeologists and heritage professionals, the book sheds new light on the general culture of the eighteenth century, including patterns of work, production and consumption of the products of art and industry. The book also extends and enhances knowledge of the Enlightenment, industrialization and the processes of globalization in the eighteenth century.

**Handbook of Big Geospatial Data** Martin Werner,Yao-Yi Chiang,2021-05-07 This handbook covers a wide range of topics related to the collection, processing, analysis, and use of geospatial data in their various

forms. This handbook provides an overview of how spatial computing technologies for big data can be organized and implemented to solve real-world problems. Diverse subdomains ranging from indoor mapping and navigation over trajectory computing to earth observation from space, are also present in this handbook. It combines fundamental contributions focusing on spatio-textual analysis, uncertain databases, and spatial statistics with application examples such as road network detection or colocation detection using GPUs. In summary, this handbook gives an essential introduction and overview of the rich field of spatial information science and big geospatial data. It introduces three different perspectives, which together define the field of big geospatial data: a societal, governmental, and governance perspective. It discusses questions of how the acquisition, distribution and exploitation of big geospatial data must be organized both on the scale of companies and countries. A second perspective is a theory-oriented set of contributions on arbitrary spatial data with contributions introducing into the exciting field of spatial statistics or into uncertain databases. A third perspective is taking a very practical perspective to big geospatial data, ranging from chapters that describe how big geospatial data infrastructures can be implemented and how specific applications can be implemented on top of big geospatial data. This would include for example, research in historic map data, road network extraction, damage estimation from remote sensing imagery, or the analysis of spatio-textual collections and social media. This multi-disciplinary approach makes the book unique. This handbook can be used as a reference for undergraduate students, graduate students and researchers focused on big geospatial data. Professionals can use this book, as well as practitioners facing big collections of geospatial data.

**Soho on Screen** Jingan Young,2022-05-13 Despite Soho’s rich cultural history, there remains an absence of work on the depiction of the popular neighbourhood in film. Soho on Screen provides one of the first studies of Soho within postwar British cinema. Drawing upon historical, cultural and urban studies of the area, this book explores twelve films and theatrically released documentaries from a filmography of over one hundred Soho set productions. While predominantly focusing on low-budget, exploitation films which are exemplars of British and international filmmaking, Young also offers new readings of star and director biographies, from Laurence Harvey to Emeric Pressburger, and in so doing enlivens discussion on filmmaking in a time and place of intense social transformation, technological innovation and growing permissiveness.
