Recent and Coming Eclipses Sir Norman Lockyer,1897

Totality Mark Littmann,Fred Espenak,Ken Willcox,2008 'Totality: Eclipses of the Sun' takes you to eclipses of the past, present and future, and lets you see - and feel - why people travel to the ends of the Earth to observe them. The book explains how to observe eclipses, how to photograph them, why they occur, their history and mythology, and when and where to see future eclipses.

Observations of the Total Solar Eclipse of January 24, 1925 Consolidated Edison Company of New York, inc,1925

Solar Eclipse Thomas Crump,1999 Published in preparation for the total eclipse of the sun due on 11 August 1999, this book sets out the rules of motion of planets and their moons and describes the influence of solar eclipses on people and their actions.'

The Conditions of Observation of the Zodiacal Light During a Solar Eclipse Vasiliĭ Grigor'evich Fesenkov,1968 The expected luminance of the zodiacal light in the vicinity of the sun is evaluated by two different methods. It is shown that the corresponding polarization is rather great and is oriented toward the sun. It makes it possible to analyze the observed integral luminance of the sky background during the solar eclipse and to distinguish the zodiacal component.

Theoretical and Observational Problems Related to Solar Eclipses Z. Mouradian,Magda Stavinschi,2012-12-06 The NATO ARW on the problems of ground-based observations of Solar Eclipses was held in Sinaia (Romania) between 1 and 5 June 1996. The Workshop was divided into seven sessions, in which 17 papers were given, by key speakers, along with 30 oral presentations. Additionally, 30 posters were presented. This issue contains only the invited and oral papers. The posters are to be published in a special issue of the Romanian Astronomical Journal. The contributions were based on our present knowledge of solar corona physics and on the perspectives for future total eclipse observations, focussing especially on that of August 11, 1999, which will be the last eclipse of the century. The workshop sessions reviewed the results of past eclipse observations, coronal hot and cold structures, coronal heating, public education, and instrumental problems. At the end of the meeting a fruitful general discussion drew out problems to be studied and techniques to be used for forthcoming observations. Posters completed the workshop contributions.

Eclipse and Revelation Henrike Lange,Tom McLeish,2024-02-06 Two questions guide this seven-year project: First, how can we approach the phenomenon, representation, and interpretation of total solar eclipses? Second, how can we heal the historical divide separating the natural sciences from the humanities, arts, history, and theology? The result of this interdisciplinary investigation into eclipses is an exciting look behind the scenes - into labs, archives, and museums, as well as around fieldwork in astronomy, meteorology, animal behaviour, and ecophysiology. Carefully prepared for readers from all backgrounds, these voices invite us to imagine a liberated mode of discovery, perception, creativity, and knowledge-production across the traditional academic divisions. A uniquely prismatic representation of total solar eclipses emerges, itself rising to a model of communal thinking, together, across disciplinary borders. This book is Tom McLeish's final project and scholarly testament. Dedicated to him and to astrophysicist Jay M. Pasachoff (contributing author of a chapter about the solar corona, also Pasachoff's final piece of writing), the volume is a friendly companion to the chase of knowledge, encouraging its readers to embark upon their own interdisciplinary journey of discovery.

Totality Mark Littmann,Fred Espenak,2017 A guide to solar eclipses for the general public with detailed coverage of the 2017 and 2024 total eclipses over the U.S, discussing how, when, and where to see the coming total solar eclipses, how to photograph and video record them, and how to do so safely.

Visual Informatics: Bridging Research and Practice Halimah Badioze Zaman,Peter Robinson,Maria Petrou,Patrick Olivier,Heiko Schröder,2009-11-14 Visual informatics is a field of interest not just among the information technology and computer science community, but also other related fields such as engineering, medical and health informatics and education starting in the early 1990s. Recently, the field is gaining more attention from researchers and industry. It has become a multi-disciplinary and trans-disciplinary field related to research areas such as computer vision, visualization, information visualization, real-time image processing, medical image processing, image information retrieval, virtual reality, augmented reality, -pressive visual mathematics, 3D graphics, multimedia-fusion, visual data mining, visual ontology, as well as services and visual culture. Various efforts have been invested in different research, but operationally, many of these systems are not prominent in the mass market and thus knowledge and research on these phenomena within the mentioned areas need to be shared and disseminated. It is for this reason that the Visual Informatics Research Group from Universiti - bangsaan Malaysia (UKM) decided to spearhead this initiative to bring together experts in this very diversified but important research area so that more concerted efforts can be undertaken not just within the visual informatics community in Malaysia but from other parts of the world, namely, Asia, Europe, Oceania, and USA. This first International Visual Informatics Conference (IVIC 2009) was conducted collaboratively, by the visual informatics research community from the various public and private institutions of higher learning in Malaysia, and hosted by UKM.

Pale Blue Dot Carl Sagan,Ann Druyan,2011-07-06 "Fascinating . . . memorable . . . revealing . . . perhaps the best of Carl Sagan's books."—The Washington Post Book World (front page review) In *Cosmos*, the late astronomer Carl Sagan cast his gaze over the magnificent mystery of the Universe and made it accessible to millions of people around the world. Now in this stunning sequel, Carl Sagan completes his revolutionary journey through space and time. Future generations will look back on our epoch as the time when the human race finally broke into a radically new frontier—space. In *Pale Blue Dot*, Sagan traces the spellbinding history of our launch into the cosmos and assesses the future that looms before us as we move out into our own solar system and on to distant galaxies beyond. The exploration and eventual settlement of other worlds is neither a fantasy nor luxury, insists Sagan, but rather a necessary condition for the survival of the human race. "Takes readers far beyond *Cosmos* . . . Sagan sees humanity's future in the stars."—Chicago Tribune
