Strategic Climate Change Communications Jasper Colin

Fessmann,2019-10-01 For over 30 years the science on climate change has been clear: it is happening, we humans caused it, and it puts all our futures at risk. Global warming can still be reversed, or at least the worst prevented, if we act in time. However, despite valiant efforts by scientists, activists and science reporters, little meaningful change has occurred. This is largely the result of well-funded professional strategic communication efforts by vested interests. They have been highly successful in achieving their central goal: protecting the profitable status quo by creating gridlock to slow down meaningful action on climate change. *Strategic Climate Science Communications: Effective Approaches to Fighting Climate Denial* analyzes some of the communication strategies employed by deniers and the psychological mechanisms behind how they work. Several experts offer specific counter-strategies to change the conversation and foster meaningful societal change on global warming. The book helps environmental journalists to build up resistance against being manipulated by highly effective public relations techniques often successfully used against them. It can also help scientists and activists to become more effective communicators. An effective strategy is best countered by even better strategy.

Trekking the Planet Sandy Van Soye,2016-03-14 In 2011, 25-year corporate veteran Sandy Van Soye had a dream to travel with a purpose. Out of this vision came the *Trekking the Planet* expedition. Sandy and her husband Darren left their jobs and traveled 14 months to 53 countries on six continents, bringing the subject of geography to life through stories, pictures, and videos from the road. Following their travels were 55,000 students in 20 countries. Darren and Sandy

traveled to such places as the Phongsali province of Laos, the countries of Kyrgyzstan and Uzbekistan, the Tigray region of Ethiopia, and the Amazon Rainforest of Brazil. An integral part of their journey was a goal to complete 500 miles of demanding trekking in 12 of the most remote locations on the planet. More than just about their expedition, *Trekking the Planet* is the story of Sandy's perseverance in making her dream come true. This was put to the test while trekking in difficult conditions, narrowly missing a plane crash in Nepal, and being bitten by a vampire bat in Brazil. This book not only details these challenges, but how the dream of traveling with a purpose ended up giving back in its own special way, changing her life forever.

In Beauty May She Walk Leslie Mass,2005 In 2000, inspired by her father, Leslie Mass decided she would turn a lifelong fantasy into reality. At the age of 59 she began to train for a grueling journey ? a thru-hike of the 2,000-mile Appalachian Trail. In Beauty May She Walk chronicles Leslie's struggles and triumphs during her hike. On the trail, Leslie struggles with how to balance the needs of her family and friends while making the trail a priority; how to shed years of social conditioning that dictate how a woman should act; and how to know when to ask for help, while understanding that sometimes, help has to come from within. For the first few weeks, Leslie learns how to pitch a tent in the rain, keep animals out of her food, and lighten the load on her back. As the terrain toughens, she struggles to physically keep up with the trail community she depends on socially

to keep going, and realizes the difficulty of maintaining her obligations to family and friends while focusing her efforts on putting one foot in front of the other, every day. And after September 11, 2001, she copes with being seemingly the only hiker on the trails for miles, eventually forcing her to change her definition of "hiking her own hike." A suburban college professor, Leslie is just like any other woman you might pass on the grocery aisle. Her story is an inspiring physical and mental journey to reach the goal of a lifetime.

Appalachian Trials Zach Davis, 2012-02-08 I really loved it...Appalachian Trials is full of specific tactical tips for mental preparation, which is key well beyond the AT. - Tim Ferriss, author of New York Times Best Selling *The 4-Hour Workweek* and *The 4-Hour Body* Each year, it is estimated that more than 2,000 people set out to thru-hike the Appalachian Trail, yet seven in ten ultimately fall short of their goal. Given the countless number of how-to books and websites offering information about logistics, gear, and endurance training, one would think that more people would finish this 2,200

mile trek. Why then, do so many hikers quit prematurely? After successfully thru-hiking the AT in five months with zero prior backpacking experience, author, Zach Davis, is convinced he's discovered the answer. Aspiring thru-hikers, Davis tells readers, are preparing the wrong way- sweating on the StairMaster, meticulously plotting each re-supply box, or obsessing over the a synthetic or down sleeping bag or perfect pair of socks. While the AT undoubtedly presents extraordinary physical challenges, it is the psychological and emotional struggles that drive people off the trail. Conquering these mental obstacles is the key to success. This groundbreaking book focuses on the most important and overlooked piece of equipment of all- the gear between one's ears. Filled with first-hand, touching yet humorous vignettes and down-to-earth advice that both instructs and inspires, Appalachian Trials gives readers the mental road map they'll need to hike from Springer Mountain to Mt.Katahdin. In Appalachian Trials readers will learn: Goal setting techniques that will assure hikers reach Mt. Katahdin The common early stage pitfalls and how to avoid them How to beat the Virginia Blues The importance of and meaning behind hiking your own hike 5 strategies for unwavering mental endurance The most common mistake made in the final stretch of the trail Tips for enjoying rather than enduring each of the five million steps along the journey Strategies for avoiding post-trail depression and weight gain In addition, the Bonus Section of Appalachian Trials includes: A thorough chapter on gear written by thru-hiker of the AT and Pacific Crest Trail, and professional backpack gear reviewer Information about the trail's greatest and most unknown risk and how to guard against it 9 tips for saving money before and during your thru-hike A thorough FAQ section including information ranging from how to obtain sponsorship, to the best stove

for the trail, to avoiding chafing, and much more

Solar Ian McEwan, 2010-03-30 NATIONAL BESTSELLER • From the Booker Prize winner and bestselling author of *Atonement*, this “totally gripping and entirely hilarious” novel (*The Wall Street Journal*) traces the arc of a Nobel Prize-winning physicist’s ambitions and self-deception. Dr. Michael Beard’s best work is behind him. Trading on his reputation, he speaks for enormous fees, lends his name to the letterheads of renowned scientific institutions, and halfheartedly heads a government-backed initiative tackling global warming. Meanwhile, Michael’s fifth marriage is floundering due to his incessant womanizing. When his professional and personal worlds collide in a freak accident, an opportunity presents itself for Michael to extricate himself from his marital problems, reinvigorate his career, and save the world from environmental disaster. But can a man who has made a mess of his life clean up the messes of humanity? Don’t miss Ian McEwan’s new novel, *Lessons*.
