International Conference on Science Education 2012 Proceedings Baohui Zhang,Gavin W. Fulmer,Xiufeng Liu,Weiping Hu,Shujin Peng,Bing Wei,2014-05-06 This book contains papers presented at the International Conference on Science Education 2012, ICSE 2012, held in Nanjing University, Nanjing, China. It features the work of science education researchers from around the world addressing a common theme, Science Education: Policies and Social Responsibilities. The book covers a range of topics including international science education standards, public science education and science teacher education. It also examines how STEM education has dominated some countries' science education policy, ways brain research might provide new approaches for assessment, how some countries are developing their new national science education standards with research-based evidence and ways science teacher educators can learn from each other. Science education research is vital in the development of national science education policies, including science education standards, teacher professional development and public understanding of science. Featuring the work of an international group of science education researchers, this book offers many insightful ideas, experiences and strategies that will help readers better understand and address challenges in the field.

Musical Life in Guyana Vibert C. Cambridge,2015-05-21 *Musical Life in Guyana* is the first in-depth study of Guyanese musical life. It is also a richly detailed description of the social, economic, and political conditions that have encouraged and sometimes discouraged musical and cultural creativity in Guyana. The book contributes to the study of the interactions between the policies and practices by national governments and musical communities in the Caribbean. Vibert C. Cambridge explores these interactions in Guyana during the three political eras that the society experienced as it moved from being a British colony to an independent nation. The first era to be considered is the period of mature colonial governance, guided by the dictates of "new imperialism," which extended from 1900 to 1953. The second era, the period of internal self-government and the preparation for independence, extends from 1953, the year of the first general elections under universal adult suffrage, to 1966, the year when the colony gained its political independence. The third phase, 1966 to 2000, describes the early postcolonial era. Cambridge reveals how the issues of race, class, gender, and ideology deeply influenced who in Guyanese multicultural society obtained access to musical instruction and media outlets and thus who received recognition. He also describes the close connections between Guyanese musicians and Caribbean artists from throughout the region and traces the exodus of Guyanese musicians to the great cities of the world, a theme often neglected in Caribbean studies. The book concludes that the practices of governance across the twentieth century exerted disproportionate influence in the creation, production, distribution, and consumption of music.

Australia's Few and the Battle of Britain Kristen Alexander,2015-04-30 During the summer and autumn of 1940, the Germans launched their Luftwaffe campaign to gain superiority over the RAF, especially Fighter Command. They were not successful, and this defeat marked a turning point in the Allies' favour. This is the story of eight Australian fighter pilots engaged in the Battle of Britain, the first major battle of World War II (or any war) fought entirely in the air. Jack Kennedy, Stuart Walch, Dick Glyde, Ken Holland, Pat Hughes, Bill Millington, John Crossman and Des Sheen – only one of them came home. – A story we take for granted, here told afresh with insight and empathy. – Professor Peter Stanley, UNSW Canberra – In telling the stories of some of the Australians who flew in the Battle of Britain, Kristen Alexander has combined academic rigour with compelling personal detail. She has demonstrated that the 'Unknowns' of the Battle are as fascinating as those who gained celebrity status. This is a book for those who know much about what happened in 1940 and those who don't.... Geoff Simpson, Trustee, Battle of Britain Memorial Trust – The lives of eight Australian fighter pilots, from backyard to cockpit and beyond, lovingly and expertly told.... Flying Among Heroes Norman Franks,Simon Muggleton,2012-05-01 Following the extraordinary career of a Second World War bomber pilot, *Flying Among Heroes* brings together adventure and human daring with the harsh realities of being a member of the wartime Royal Air Force. Tom Cooke, like hundreds of other young men in 1939, joined up to the RAF just a few days before war began aged 18, being selected for pilot training. Just five years later, he had flown fifty-one operations, taken part in the Berlin bombings and three 1,000-bomber raids, and had even taken part in special operations in conjunction with the SOE. Not only did Cooke volunteer for an optional second and third tour of operations, but he was also shot down over France on his thirteenth special operation, survived the bale out with his crew and evaded capture. Helped by the French Resistance, he managed to make his way into Spain and was taken back to England from Gibraltar. Unsurprisingly,

considering Cooke's outstanding bravery and patriotism, he was decorated multiple times in his career. Franks and Muggleton make use of primary documentation, including Cooke's own words, and contemporary images to put together a poignant story of wartime duty. In an effort to portray the situation for many young men like Cooke, much information is included on other squadrons and operations, as well as on Bomber Command itself. In all, 55,000 men of Bomber Command gave their lives to the cause of the Second World War; this is the tale of just one of those remarkable young men who survived the hardships of war, returning victorious to a nation of heroes.

Racing Chassis and Suspension Design Carroll Smith,2004-05-21 Hand-selected by racing engineer legend Carroll Smith, the 28 SAE Technical Papers in this book focus on the chassis and suspension design of pure racing cars, an area that has traditionally been - farmed out - to independent designers or firms since the early 1970s. Smith believed that any discussion of vehicle dynamics must begin with a basic understanding of the pneumatic tire, the focus of the first chapter. The racing tire connects the racing car to the track surface by only the footprints of its four tires. Through the tires, the driver receives most of the sensory information needed to maintain or regain control of the race car at high force levels. The second chapter, focusing on suspension design, is an introduction to this complex and fascinating subject. Topics covered include chassis stiffness and flexibility, suspension tuning on the cornering of a Winston Cup race car, suspension kinematics, and vehicle dynamics of road racing cars. Chapter 3 addresses the design of the racing chassis design and how aerodynamics affect the chassis, and the final chapter on materials brings out the fact that the modern racing car utilizes carbon construction to the maximum extent allowed by regulations. These technical papers, written between 1971 and 2003, offer what Smith believed to be the best and most practical nuggets of racing chassis and suspension design information.
