Marine Big Data Huang Dongmei, Song Wei, Zou Guoliang, 2019-07-08 As the volume of marine big data has increased dramatically, one of the main concerns is how to fully exploit the value of such data in the development of marine economy and marine science and technology. The book covers data acquisition, feature classification, processing and applications of marine big data in evaluation and decision-making, using case studies such as storm surge and marine oil spill disaster.

High-resolution Seafloor Survey and Applications Ziyin Wu, Fanlin Yang, Yong Tang, 2020-12-07 This book focuses on the survey technology, post-processing technology, mapping technology and scientific application of the submarine topography and geomorphology in detail. High-resolution submarine geomorphology is a frontier branch of marine geology and marine surveying and mapping, which provides a direct basis to study the seabed surface, to understand the tectonic movement and submarine evolution. In the past two decades, high-resolution submarine geomorphology with high-precision multi-beam echo sounding, side-scan sonar and sub-bottom profiler as the major techniques, is developing very quickly and is one of the frontiers of international marine science and technology. These high techniques promote the traditional submarine geomorphology to high-resolution and quantitative research. At present, high-resolution submarine geomorphology is widely used in the

delimitation of the continental shelf, the international seabed resources survey, marine engineering and marine military applications. In order to facilitate readers to understand how to acquire and apply scientific research based on submarine topographic data, it highlights the combination of theory, technology and scientific application. This book is useful as a reference for professional and technical personnel in related fields and also as a textbook for both graduate and undergraduate students as well.

Regulating Speech in Cyberspace Emily B.

Laidlaw, 2015-08-07 Private companies exert considerable control over the flow of information on the internet. Whether users are finding information with a search engine, communicating on a social networking site or accessing the internet through an ISP, access to participation can be blocked, channelled, edited or personalised. Such gatekeepers are powerful forces in facilitating or hindering freedom of expression online. This is problematic for a human rights system which has historically treated human rights as a government responsibility, and this is compounded by the largely light-touch regulatory approach to the internet in the West. Regulating Speech in Cyberspace explores how these gatekeepers operate at the intersection of three fields of study: regulation (more broadly, law), corporate social responsibility and human rights. It proposes an alternative corporate governance model for speech regulation, one that acts as a template for the increasingly common use of non-state-based models of governance for human rights.

Marketing Strategy and Competitive Positioning, 7th Edition Prof Graham Hooley, Brigitte Nicoulaud, John Rudd, Nick Lee, 2020-01-09 Marketing Strategy and Competitive Positioning 6e deals with the process of

developing and implementing a marketing strategy. The book focuses on competitive positioning at the heart of marketing strategy and includes in-depth discussion of the processes used in marketing to achieve competitive advantage. The book is primarily about creating and sustaining superior performance in the marketplace. It focuses on the two central issues in marketing strategy formulation – the identification of target markets and the creation of a differential advantage. In doing that, it recognises the emergence of new potential target markets born of the recession and increased concern for climate change; and it examines ways in which firms can differentiate their offerings through the recognition of environmental and social concerns. The book is ideal for undergraduate and postgraduate students taking modules in Marketing Strategy, Marketing Management and Strategic Marketing Management.

Mobile Communication Rich Ling, Jonathan

Donner, 2013-05-03 With staggering swiftness, the mobile phone has become a fixture of daily life in almost every society on earth. In 2007, the world had over 3 billion mobile subscriptions. Prosperous nations boast of having more subscriptions than people. In the developing world, hundreds of millions of people who could never afford a landline telephone now have a mobile number of their own. With a mobile in our hand many of us feel safer, more productive, and more connected to loved ones, but perhaps also more distracted and less involved with things happening immediately around us. Written by two leading researchers in the field, this volume presents an overview of the mobile telephone as a social and cultural phenomenon. Research is summarized and made accessible through detailed descriptions of ten mobile users from around the world. These illustrate popular debates, as well as deeper social forces at work. The book concludes by considering three themes: 1) the tighter interlacing of daily activities 2) a revolution of control in the social sphere, and 3) the arrival of a world where the majority of its inhabitants are reachable, anytime, anywhere.

Smarter Homes Alexandra Deschamps-Sonsino, 2018-07-15 Over the past 100 years, the home has been a battleground for ideas of future living. Fueled by the electrification of cities, the move from the country to cities, post-war recovery and the development of the internet, the way we live at home (alone or with others) has changed beyond recognition. Science fiction writing, the entertainment industry, art, and modern interior design and architecture movements have also contributed to defining our aspirations around a future and now more present and possible 'smart' home. From the decade-old smart fridge that tells you if you have run out of milk to smart speakers that let you shop hands-free, some visions of the 'smart' home are yet to excite us while others are becoming a reality and will shape how we will live at home very soon. This book breaks down the historical, societal and political context for the changes in focus of that 'smartness' from affordability, efficiency, convenience to recently experimentation. These key points in time include: The development and marketing of electrical appliances in early 20th century War-time design the impact of military ergonomics Modernist interior design and building practices of the 1920s The space race and new materials of the post-war era Compact urban living in the 1960s & 70s Connected home entertainment in the 1980s-90s Phones and mobility in the 90s Smart energy & utilities in the early 2000s The internet-connected fridge in 2000 Remote care

in a global world economy The sharing economy and new ways to shop at home Invisible 'smart' design in the home The second half of the book breaks down what current developments tell us about what our homes will look like in the next 10 years through the lens of spaces, services, appliances and behaviours in our homes. What You'll Learn Understand the historical context for current 'smart home' products Understand the social context of home product development Understand what in home technologies are being developed Understand what products are currently available Understand what behaviours are being constantly leveraged Understand how this may affect longer term market trends for consumer products Many new and innovative products are being developed in the consumer and industrial spaces with a copy-paste mindset based on following larger businesses such as Amazon, Google and Apple. Many opportunities in the homespace however will come from understanding the history and multiple players that have contributed to the development of the home in general. For everyone working in product design and development, in R&D or in trends research as well as for everyone interested in the IoT for the home, this book will be a valuable resource and an enjoyable read. This book will give product business owners ideas about what has been done before and and avenues for future development.
