The Rest Is Noise Alex Ross,2007-10-16 Winner of the 2007 National Book Critics Circle Award for Criticism A New York Times Book Review Top Ten Book of the Year Time magazine Top Ten Nonfiction Book of 2007 Newsweek Favorite Books of 2007 A Washington Post Book World Best Book of 2007 In this sweeping and dramatic narrative, Alex Ross, music critic for The New Yorker, weaves together the histories of the twentieth century and its music, from Vienna before the First World War to Paris in the twenties; from Hitler's Germany and Stalin's Russia to downtown New York in the sixties and seventies up to the present. Taking readers into the labyrinth of modern style, Ross draws revelatory connections between the century's most influential composers and the wider culture. The Rest Is Noise is an astonishing history of the twentieth century as told through its music.

Dimensions of Japanese Society K. Henshall,1999-06-23 Japan remains one of the most intriguing yet least understood nations. In a much needed, balanced and comprehensive analysis, among other remarkable revelations, this book presents for the first time a vital key to understanding the organisation of Japan's society and the behaviour of its people. The Japanese are not driven by a universal morality based on Good and Evil, but by broad aesthetic concepts based on Pure and Impure. What they include as 'impure' will surprise many readers.

Encyclopedia of Recorded Sound in the United States Guy A. Marco,Frank Andrews,1993 This alphabetical reference covers the entire spectrum of the recording of sound, from Edison's experimental cylinders to contemporary high technology. The major focus is on the recorded sound industry in the US, with additional material on Canada, Europe, Australia, and New Zealand. The coverage is particularly strong on the earliest periods of recorded sound history--1877-1948, the 78 rpm era and 1949-1982, the LP era. In addition to performers and their work, entries also cover important commercial organizations, individuals who made significant technical contributions, societies and associations, sound archives and libraries, magazines, catalogs, award winners, technical topics, special and foreign terms, copyright laws, and other areas of interest. Debugging Game History Henry Lowood,Raiford Guins,2024-02-06 Essays discuss the terminology, etymology, and history of key terms, offering a foundation for critical historical studies of games. Even as the field of game studies has flourished, critical historical studies of games have lagged behind other areas of research. Histories have generally been fact-by-fact chronicles; fundamental terms of game design and development, technology, and play have rarely been examined in the context of their historical, etymological, and conceptual underpinnings. This volume attempts to “debug” the flawed historiography of video games. It offers original essays on key concepts in game studies, arranged as in a lexicon—from “Amusement Arcade” to “Embodiment” and “Game Art” to “Simulation” and “World Building.” Written by scholars and practitioners from a variety of disciplines, including game development, curatorship, media archaeology, cultural studies, and technology studies, the essays offer a series of distinctive critical “takes” on historical topics. The majority of essays look at game history from the outside in; some take deep dives into the histories of play and simulation to provide context for the development of electronic and digital games; others take on such technological components of games as code and audio. Not all essays are history or historical etymology—there is an analysis of game design, and a discussion of intellectual property—but they nonetheless raise questions for historians to consider. Taken together, the essays offer a foundation for the emerging study of game history. Contributors Marcelo Aranda, Brooke Belisle, Caetlin Benson-Allott, Stephanie Boluk, Jennifer deWinter, J. P. Advanced Fluorescence Microscopy Peter J. Verveer,2016-08-23 This volume provides an overview of advanced fluorescence microscopy, covering a broad range of methods. Each chapter focuses on a different method and provides a practical guide for application in biological systems. Written in the highly successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and cutting-edge, Advanced Fluorescence Microscopy: Methods and Protocols seeks to provide scientists with methods for biological systems that are of interest.

Puella Magi Oriko Magica, Vol. 1 Magica Quartet,2015-05-19 Oriko, a magical girl with the gift of foresight, knows the fate that awaits all who accept Kyubey's offer of supernatural powers. But when she is struck with a terrible vision of the future-of the devastation caused by a single, powerful witch-she decides to prevent the girl from becoming a magical girl in the first place. To draw Kyubey away from the girl's potential, Oriko directs him instead to Yuma, an orphan who is all too eager to gain powers that will enable her to protect herself-powers that will ultimately lead to her own destruction...

Recent Advances in Spatial Equilibrium Modelling Jeroen C.J.M.van den Bergh,Peter Nijkamp,Piet Rietveld,2011-12-15 Prices and quantities of both stock and flow

variables in an economic system are decisively influenced by their spatial coordinates. Any equilibrium state also mirrors the underlying spatial structure and a tatonnement process also incorporates the spatial ramifications of consumer and producer behaviour. The recognition of the spatial element in the formation of a general equilibrium in a complex space-economy already dates back to early work of Losch, Isard and Samuelson, but it reached a stage of maturity thanks to the new inroads made by T. Takayama. This book is devoted to spatial economic equilibrium (SPE) analysis and is meant to pay homage to the founding father of modern spatial economic thinking, Professor Takayama. This book witnesses his great talents in clear and rigorous economic thinking regarding an area where for decades many economists have been groping in the dark. Everybody who wants to study the phenomenon of spatial economic equilibrium will necessarily come across Takayama's work, but this necessity is at the same time a great pleasure. Studying his work means a personal scientific enrichment in a field which is still not completely explored. The present volume brings together recent contributions to spatial equilibrium analysis, written by friends and colleagues of Takayama. The structure of the book is based on four main uses of spatial equilibrium models: (i) the imbedding of spatial flows in the economic environment, related to e.g.

Media Franchising Derek Johnson, 2013-03-22 Johnson astutely reveals that franchises are not Borg-like assimilation machines, but, rather, complicated ecosystems within which creative workers strive to create compelling 'shared worlds.' This finely researched, breakthrough book is a must-read for anyone seeking a sophisticated understanding of the contemporary media industry. —Heather Hendershot, author of *What's Fair on the Air?: Cold War Right-Wing Broadcasting and the Public Interest* While immediately recognizable throughout the U.S. and many other countries, media mainstays like X-Men, Star Trek, and Transformers achieved such familiarity through constant reincarnation. In each case, the initial success of a single product led to a long-term embrace of media franchising—a dynamic process in which media workers from different industrial positions shared in and reproduced familiar culture across television, film, comics, games, and merchandising. In *Media Franchising*, Derek Johnson examines the corporate culture behind these production practices, as well as the collaborative and creative efforts involved in conceiving, sustaining, and sharing intellectual properties in media work worlds. Challenging connotations of homogeneity, Johnson shows how the cultural and industrial logic of franchising has encouraged media industries to reimagine creativity as an opportunity for exchange among producers, licensees, and even consumers. Drawing on case studies and interviews with media producers, he reveals the meaningful identities, cultural hierarchies, and struggles for distinction that accompany collaboration within these production networks. *Media Franchising* provides a nuanced portrait of the collaborative cultural production embedded in both the media industries and our own daily lives.

The Conference on Computers in Physics Instruction Edward F. Redish, John S. Risley, 1990 Computers are revolutionizing activities in all areas of life. Physics researchers, accustomed to being at the forefront of technology, have been deeply affected by the computer revolution. This effect has serious implications for what is taught and how it is taught in the physics classroom. This conference was organized to allow physics teachers and software developers in physics education to come together and see the state of the art in using computers to teach physics. The conference included 39 invited lectures and 122 contributed presentations. It introduced a number of innovations in the hope of increasing interactions and stimulating future contacts. This document contains the text of the invited and contributed papers organized as follows: (1) The Computer's Impact on the Physics Curriculum; (2) Physics Computer Simulations; (3) Computers in the Physics Laboratory; (4) Physics Education Research and Computers; (5) Computational Physics and Spreadsheets; (6) Computer Tutorials in Physics; (7) Physics Lecture Demonstrations Using Computers; (8) Authoring Tools and Programming Languages; (9) Computer Utilities for Teaching Physics; (10) Computer Networking Workshops; (11) Publishing Physics Software; and (12) Videodiscs and Visualization for Physics. Appended are author and general indexes, a list of the contents of distributed software, and a software order form. (CW)

Enjoying Machines Barry Brown, Oskar Juhlin, 2015-04-03 An argument that pleasure is a fundamental part of why we use technology, and a framework for understanding the relationship between pleasure and technology. The dominant feature of modern technology is not how productive it makes us, or how it has revolutionized the workplace, but how enjoyable it is. We take pleasure in our devices, from smartphones to personal computers to televisions. Whole classes of leisure activities rely on technology. How has technology become such an integral part of enjoyment? In this book, Barry Brown and Oskar Juhlin examine the relationship between pleasure and technology, investigating what pleasure and leisure are, how they have come to depend on the many forms of technology, and how we might design technology to support enjoyment. They do this by studying the experience of enjoyment, documenting such activities as computer gameplay, deer hunting, tourism, and television watching. They describe technologies that support these activities, including prototype systems that they themselves developed. Brown and Juhlin argue that pleasure is

fundamentally social in nature. We learn how to enjoy ourselves from others, mastering it as a set of skills. Drawing on their own ethnographic studies and on research from economics, psychology, and philosophy, Brown and Juhlin argue that enjoyment is a key concept in understanding the social world. They propose a framework for the study of enjoyment: the empirical program of enjoyment.

Retail Marketing Management Helen Goworek, Peter McGoldrick, 2015-07-02 The unique approach of Retail Marketing combines theory with current retail concepts and international examples. It starts by looking at the nature of retailing as an activity and then introduces retail marketing, followed by a discussion of consumer behaviour, the retail marketing mix, and other important issues such as location strategies, branding, the application of IT and ethics. The author takes an integrated approach to explaining the process of internationalisation which is reinforced by a wealth of international examples. The book is ideal for undergraduate and postgraduate students taking courses in retail marketing as well as those studying for marketing and business degrees where retail marketing is a core module. Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Housing, Land, and Property Rights in Post-Conflict United Nations and Other Peace Operations Scott Leckie, 2009 This book is about the UN's role in housing, land, and property rights in countries after violent conflict.

Multisensory Landscape Design Daniel Roehr, 2022-05-03 The interaction of our bodies in space is intrinsically linked to the ways in which we design. In spatial design we tend to focus on solely the visual, often treating it as the dominant sense while ignoring the other four senses: touch, sound, smell, taste. While research has been carried out on the perception of multisensorial experiences and design in the last two decades, there is no combined resource on how to address multisensory design in landscape architecture, architecture, urban and environmental design. This is a textbook for design students, professionals, and educators to develop multisensorial literacy. This book is the first of its kind, providing introductions on each of the five senses, along with exercises that demonstrate how to observe, record, and visualize them. It explores current design school pedagogy, and how we might imagine a more mindful way of teaching. The book is a foundational resource for students, professionals, and instructors to understand and ultimately create multisensorial spaces that are inclusive for all. This book imagines a world where seeing is redefined in a way that encompasses all of the senses—not just the visual.
