127 Hours Aron Ralston,2011-02-03 On Sunday April 27, 2003, 27-year old Aron Ralston set off for a day's hiking in the Utah canyons. Dressed in a t-shirt and shorts, Ralston, a seasoned climber, figured he'd hike for a few hours and then head off to work. 40 miles from the nearest paved road, he found himself on top of an 800-pound boulder. As he slid down and off of the boulder it shifted, trapping his right hand against the canyon wall. No one knew where he was; he had little water; he wasn't dressed correctly; and the boulder wasn't going anywhere. He remained trapped for five days in the canyon: hypothermic at night, de-hydrated and hallucinating by day. Finally, he faced the most terrible decision of his life: bracing the bones in his wrist by snapping them against the boulder, he hacked through the skin, and finally succeeded in amputating his right hand and wrist. The ordeal, however, was only beginning. He still faced a 60-foot rappell to freedom, and a walk of several hours back to his car - along the way, he miraculously met a family of hikers, and with his arms tourniqued, and blood-loss almost critical, they heard above them the whir of helicopter blades; just in time, Aron was rescued and rushed to hospital. Since that day, Aron has had a remarkable recovery. He is back out on the mountains, with an artificial limb; he speaks to select groups on his ordeal and rescue; and amazingly, he is upbeat, positive, and an inspiration to all who meet him. This is the account of those five days, of the years that led up to them, and where he goes from here. It is narrative non-fiction at its most compelling.

**Spain's Sendero Historico: The GR1** John Hayes,2015-10-05 The GR1 (Sendero Historico) is a long traverse of northern Spain from west to east over 1250km of remote country and mountain walking. The waymarked route runs through the Pyrenean foothills from Puerto de Tarna at the western end to near L'Escala on the Mediterranean coast. Arguably one of Spain's best long-distance paths, it follows gently graded paths, making a long but easy walk suitable for a reasonably fit walker. The complete trail requires around 53 days to complete end to end, but the guidebook splits the route into 7 sections, each with a start or endpoint that can be easily reached by train or bus, allowing walkers to explore the route in manageable chunks. The guidebook also describes how to extend the route to Finisterre and the Atlantic using GR routes. Providing all the information you will need, the guide combines practical information about planning your own itinerary, when to go, cuisine and terrain with general information about the varied geology and history of the area. Route description is accompanied by contoured mapping and stage and section summary information, as well as detailed information about any accommodation available en route.

Faced with a Health and Safety closure, Charity has a week to appeal and the chances of success seem negligible: elections are imminent, and Kireba is due to become a showcase of President Josiah Nduka's 'slum rehabilitation program', backed by gullible foreign donors. But before taking on Nduka and the council, she has a promise to keep – to provide a supply of her famous sweet doughballs to a small army of street children, as voracious as they are malodorous . . . Michael Holman uses his witty satirical pen to brilliant effect in this affectionate portrait of a troubled region, targeting local politicians, western diplomats, foreign donors and journalists, puncturing pretensions and questioning the philosophy of aid.

**Modeling and Managing Interdependent Complex Systems of Systems** Yacov Y. Haimes,2018-10-02 A comprehensive guide to the theory, methodology, and development for modeling systems of systems Modeling and Managing Interdependent Complex Systems of Systems examines the complexity of, and the risk to, emergent interconnected and interdependent complex systems of systems in the natural and the constructed environment, and in its critical infrastructures. For systems modelers, this book focuses on what constitutes complexity and how to understand, model and manage it.Previous modeling methods for complex systems of systems were aimed at developing theory and methodologies for uncoupling the interdependencies and interconnections that characterize them. In this book, the author extends the above by utilizing public- and private- sector case studies; identifies, explores, and exploits the core of interdependencies; and seeks to understand their essence via the states of the system, and their dominant contributions to the complexity of systems of systems. The book proposes a reevaluation of fundamental and practical systems engineering and risk analysis concepts on complex systems of systems developed over the past 40 years. This important resource: Updates and streamlines systems engineering theory, methodology, and practice as applied to complex systems of systems Introduces modeling methodology inspired by philosophical and conceptual thinking from the arts and sciences Models the complexity of emergent interdependent and interconnected complex systems of systems by analyzing their shared states, decisions, resources, and decisionmakers Written for systems engineers, industrial engineers, managers, planners, academics and other professionals in engineering systems and the environment,this text is the resource for understanding the fundamental principles of modeling and managing complex systems of systems, and the risk thereto.

*Tales from the Big Trails* Martyn Howe,2021-09-02 'I am already planning the next adventure. The wanderlust that infected me has no cure.' It all started in Fishguard in the mid-1970s when, aged

fifteen, Martyn Howe and a friend set off on the Pembrokeshire Coast Path armed with big rucksacks, borrowed boots, a Primus stove and a pint of paraffin, and a thirst for adventure. After repeating the route almost thirty years later, Martyn was inspired to walk every National Trail in England and Wales, plus the four Long-Distance Routes (now among the Great Trails) in Scotland. His 3,000-mile journey included treks along the South West Coast Path, the Pennine Way, the Cotswold Way and the West Highland Way. He finally achieved his ambition in 2016 when he arrived in Cromer in Norfolk, only to set a new goal of walking the England and Wales Coast Paths and the Scottish National Trail. In Tales from the Big Trails, Martyn vividly describes the diverse landscapes, wildlife, culture and heritage he encounters around the British Isles, and the physical and mental health benefits he derives from walking. He also celebrates the people who enrich his travels, including fellow long-distance hikers, tourists discovering Britain's charm, farmers working the land, and the friendly and eccentric owners of hostels, campsites and B&Bs. And when he is asked 'Why do you do it?', the answer is as simple as placing one foot in front of the other: 'It makes me happy.'

Weber covers the hot spots and lesser known fisheries with personal experiences, history, effective techniques for both trout and anadromous species, appropriate gear and flies, access points, nearby fly shops, and much more. His stunning visuals paint the full picture of the fishing in this gorgeous state. Many more tributaries, lakes and reservoirs are covered. Weber is a veteran Oregon writer who has covered the state's flyfishing opportunities for years. This book comes standard with Wilderness Adventures Press' precise and detailed full-color maps, with GPS coordinates for all access points, boat ramps, and parking areas, along with access roads, public land and more.
