This charming picture book explores all of these questions in easy-to-understand and child-friendly language, offering a gentle introduction to how sound works. Kids are experts at making noise. Now they'll want to stop and listen, too!

Reset Your Child's Brain Victoria L. Dunckley, MD, 2015-06-23 Increasing numbers of parents grapple with children who are acting out without obvious reason. Revved up and irritable, many of these children are diagnosed with ADHD, bipolar illness, autism, or other disorders but don't respond well to treatment. They are then medicated, often with poor results and unwanted side effects. Based on emerging scientific research and extensive clinical experience, integrative child psychiatrist Dr. Victoria Dunckley has pioneered a four-week program to treat the frequent underlying cause, Electronic Screen Syndrome (ESS). Dr. Dunckley has found that everyday use of interactive screen devices — such as computers, video games, smartphones, and tablets — can easily overstimulate a child's nervous system, triggering a variety of stubborn symptoms. In contrast, she's discovered that a strict, extended electronic fast single-handedly improves mood, focus, sleep, and behavior, regardless of the child's diagnosis. It also reduces the need for medication and renders other treatments more effective. Offered now in this book, this simple intervention can produce a life-changing shift in brain function and help your child get back on track — all without cost or medication. While no one in today's connected world can completely shun electronic stimuli, Dr. Dunckley provides hope for parents who feel that their child has been misdiagnosed or inappropriately medicated, by presenting an alternative explanation for their child's difficulties and a concrete plan for treating them.

Dean the Bean Gets a Screen O. M. Redden, Bud Snapp, Ben Donley, 2021-03-20 Dean the Bean gets a Screen is an entertaining, fun, and engaging story with a purpose, written in a memorable Seuss-like rhyme. Perfect for children ages 4-10, this book offers an easy way for parents to introduce their kids to the vital issue of screen addiction through a likeable character named Dean the Bean. While written for kids, the book serves as a reminder to us all that we are human beings with lives worth living and opportunities to experience--not just Do-Nothing Beans addicted to our favorite virtual leash. The story: Dean is a cute, bored bean who wants excitement in his life. When he discovers the joys and encompassing fascination offered by various electronic platforms/screens (televisions, computers, cell phones, etc.), he forfeits his real life for life 'on the screen.' Dean soon

gets addicted to his screens and his real life suffers. At last he realizes that his virtual-world has lost its color, but he finds his way back to the beauty of real-life when he steps away from his screens and their 'make-pretend existence.' Dean encourages us all to put our screens in 'time-out' from time-to-time so we can experience the joys that await us when we unplug from their influence. Screens are fun and useful, but they can take over our lives if we're not careful. Dean the Bean is like The Social Dilemma for kids-it sounds the warning in a hilarious format that children can understand.

What's That Sound? Kristi Nielsen, 2020-11-16 What's that Sound? Animal Sounds Every child quickly learns to associate sounds with things they are familiar with as they start to learn language. A two-year-old may frequently ask What's that Sound? when they hear something they do not recognize. They are also excited about learning to mimic the sounds of things they are familiar with. Repetition and mimicking is an important part of learning language. A child copies the sound a kitten makes, or the sound of a dog. Knowing how beneficial this process is for toddlers is the impetus for writing this book. The author's 23 month old grandson, asked What's that sound? so many times every day, a grandmother did what a grandmother does. She wrote and illustrated What's that Sound? Animal Sounds and What's that Sound? Transportation Sounds in response to his love for learning sounds. He quickly learned to make the sounds that correspond to various animals and transportation and construction equipment. His environment was filled with new sounds. His

grandmother moved to a condo on a busy street and next door to his home a house was demolished and a new house was under construction. He, like most children at that stage of learning language, enjoyed learning the names the thing making the sound. Many times he could not see what was making the noise. For this reason a book supplies an opportunity to learn the vocabulary and phonetic expressions to match.

Sounds, Screens, Speakers Charles Fairchild, 2019-01-24 *Sounds, Screens, Speakers* provides a broadly comprehensive survey of the emerging field of music and media. Music has been present at the advent of nearly every new media form since the turn of the 20th century. Whether we look at the start of sound recording, film, television or the Internet, music has been a crucial participant in the social changes brought about by these new tools for making and listening to music. This book examines such changes starting in the late 19th century to the present. From the introduction of the microphone all the way through to music in reality television, the purpose of each section is not simply to move chronologically towards the present, but to focus especially on the tangible social relationships created through specific forms of mediation. With readings at the end of most chapters, key questions to facilitate additional discovery and research, and direction to additional readings and resources on popular websites and news sources, this text serves as the ideal introduction to popular music and media.
