Sound Switch Wonder Christine Ko,Owen Whang,2023-11-21 Inspired by the authors' real lives, this picture book shares what sound means for one young deaf boy as he experiences the world with cochlear implants. Most people either can or cannot hear sound . . . but some people can do both! Meet a deaf boy with cochlear implants as he moves about his day. Sometimes he prefers not to hear, but when he wants to connect with the hearing world, he puts on his cochlear implants. Can he explain to his hearing parents what the absence of sound is like? Suddenly he has an idea of how to share this part of him with those he loves. With whimsical, bright illustrations and lyrical words, Sound Switch Wonder is a tender story about sharing and embracing differences.

Assistive Technology: Shaping a Sustainable and Inclusive World D.

Archambault,G. Kouroupetroglou,2023-11-09 Caring about others and the future is part of what makes us human, and it can be argued that improving the lives of people with disabilities improves the lives of all human beings. Most of what we do as a society for people with disabilities also improves life for others, and if we consider a person's entire life, a disability of some kind will affect almost everybody at some point. This book, Assistive Technology: Shaping a Sustainable and Inclusive World, presents the proceedings of AAATE 2023, the 17th International Conference of the Association for the Advancement of Assistive Technology in Europe, held in Aubervilliers, France, from 30 August to 1 September 2023. For over 30 years, the biennial AAATE conference has focused on research aimed at improving the lives of people with a disability, and has become one of the main platforms for all stakeholders in the field. A total of 123 papers were submitted in the category intended for publication in these conference proceedings, and after a rigorous process involving review by at least three international reviewers, 74 were selected for inclusion here. Topics covered include service delivery of AT; AT for various groups such as older adults, children, and those with cognitive disabilities; mobility; privacy and security issues; and AT to promote inclusion and facilitate participation in education, culture, and work. Providing a comprehensive and current overview, the book will be of interest to researchers, practitioners, manufacturers, decision-makers and providers, users of AT, and anyone else working in the field.
