Space Case Stuart Gibbs, 2014-09-16

It's a murder mystery on the moon in this humorous and suspenseful space adventure from the author of *Belly Up* and *Spy School* that The New York Times Book Review called "a delightful and brilliantly constructed middle grade thriller." Like his fellow lunarnauts—otherwise known as Moonies—living on Moon Base Alpha, twelve-year-old Dashiell Gibson is famous the world over for being one of the first humans to live on the moon. And he's bored out of his mind. Kids aren't allowed on the lunar surface, meaning they're trapped inside the tiny moon base with next to nothing to occupy their time—and the only other kid Dash's age spends all his time hooked into virtual reality games. Then Moon Base Alpha's top scientist turns up dead. Dash senses there's foul play afoot, but no one believes him. Everyone agrees Dr. Holtz went onto the lunar surface without his helmet properly affixed, simple as that. But Dr. Holtz was on the verge of an important new discovery, Dash finds out, and it's a secret that could change everything for the Moonies—a secret someone just might kill to keep...

Space Base Mae Blacker Freeman, 1972-01-01

Describes what a space station of the future might look like, how it will operate, and the duties of the crew

members.

Moon Base E.C. Tubb, 2011-09-29 On the airless surface of the Moon the 'cold war' continues, with the bases of the major world powers watching each other and waiting . . . The dedicated personnel of Britain's Moon Base seemed well-adjusted to their peculiar existence despite a series of mysterious happenings. What bothers them most is the visit of a Royal Commission sent by an economically-worried British Government to investigate expenditure. Travelling with the Commission, but under separate and secret orders, is Felix Larsen, who's investigations are of quite a different nature. Larsen, alive to the possibilities of espionage, soon finds himself faced with the inexplicable. Why should one man fall a thousand feet and escape with minor bruises while another dies after falling a mere eighteen inches? Why does a desperate man, bent on suicide and with all the means at hand, find it absolutely impossible to kill himself? What are the strange messages emanating from the Base - and from whence do they come? And what is the fantastic thing that has been conceived in the research department?

Spaced Out Stuart Gibbs, 2017-04-04 In 2041 twelve-year-old Dashiell Gibson's a resident of Moon Base Alpha, and at the moment he's faced with a number of problems: coping with the nasty Sjoberg twins, finding out how the commander of the base has managed to disappear from a facility no bigger than a soccer field, and dealing with the alien Zan, who communicates with him telepathically from afar--and who's hiding a secret which may threaten the whole Earth.

Spacebase 2000 Stewart Cowley, 1984-01-01

Moon Base One Hugh Walters, 2020-10-15 In Operation Columbus a landing was made on the Moon. But the mystery of those sinister domes that had suddenly appeared there - and of the evil grey mist that gathered so unaccountably now and then - was as far from a solution as ever. There was only one possible course of action: to establish a permanent base. And once that was decided there wasn't much doubt that young Chris Godfrey would be sent to man it. But this time he isn't alone in his rocket. His old friends Serge and Norrey are with hi,' and he's got a new friend - young Tony whose very life may depend on the expedition's success. In charge of the whole fantastic project is Sir Leo Frayling, cold-blooded and ruthless as ever; and, of course, Sir George Benson and Whiskers Greatrex play their part too.
