*Futuristic Cars and Space Bicycles* Jeremy

Withers, 2020-06-04 Given the extensive influence of the 'transport revolution' on the past two centuries (a time when trains, trams, omnibuses, bicycles, cars, airplanes, and so forth were invented), and given science fiction's overall obsession with machines and technologies of all kinds, it is surprising that scholars have not paid more attention to transportation in this increasingly popular genre. *Futuristic Cars and Space Bicycles* is the first book to examine the history of representations of road transport machines in nineteenth-, twentieth-, and twenty-first-century American science fiction. The focus of this study is on two machines of the road that have been locked in a constant, often bitter, struggle with one another: the automobile and the bicycle. With chapters ranging from the early science fiction of the pulp magazine era in the 1920s and 1930s, to the postcyberpunk of the 1990s and more recent media of the 2000s such as web television, zines, and comics, this book argues that science fiction by and large perceives the car as anything but a marvelous invention of modernity. Rather, the genre often scorns and ridicules the automobile and instead promotes more sustainable, more benign, more restrained technologies of movement such as the bicycle.

Alien Hunters: A Space Opera Trilogy Daniel Arenson, 101-01-01 Got trouble with aliens? Call the Alien Hunters. This bundle includes all three novels in this fast-paced, sci-fi adventure. BOOK 1: Alien Hunters -- The skelkrins. Predators from deep space. Creatures of claws, fangs, and malice. Riff and his crew are the Alien Hunters, ragtag mercenaries who travel the galaxy, trapping and removing cosmic critters. They're just galactic pest controllers, not an army. When the skelkrins attack, will the Alien Hunters be the ones hunting aliens . . . or will aliens hunt them? BOOK 2: Alien Sky -- The Singularity. The day the machines gained awareness. The day they turned cruel. The robotic fleet swarms across the galaxy, slaying all in its path. The Alien Hunters--outgunned, outsmarted, outclassed--fly up to meet these killer robots. The battle between life and machine begins. BOOK 3: Alien Shadows -- On a dead planet orbiting a black hole, shadows stir. Some call them ghosts, others merely figments of the imagination. As these astral beings spread across the cosmos, the Alien Hunters stare into the darkness of deepest space . . . and find terror.

**You Can't Ride a Bicycle to the Moon** Harriet Ziefert,2018-07

**Living Off the Land in Space** C Bangs,Gregory Matloff,Les Johnson,2007-06-06 This book presents a visionary concept for future development of space travel. It describes the enabling technology for future propulsion concepts and demonstrates how mankind will 'live off the land in space' in migration from Earth. For the next few millennia at least (barring breakthroughs), the human frontier will include the solar system and the nearest stars. Will it be better to settle the Moon, Mars, or a nearby asteroid and what environments can we expect to find in the vicinity of nearby stars? These are questions that need to be answered if mankind is to migrate into space.

Bicycling Through Space and Time Mike Sirota,1991 There's not much to distinguish ordinary Jack Miller from the millions of other thirtysomething divorced guys in southern California--except his new lottery prize: a 21-gear mountain bike that has a 22nd gear. When Jack uses that particular gear, it shifts him onto the cosmic expressway that cuts across the universe.
