Space Invaders Nona Fernández, 2019-11-05

Longlisted for the National Book Award for Translated Literature A dreamlike evocation of a generation that grew up in the shadow of a dictatorship in 1980s Chile *Space Invaders* is the story of a group of childhood friends who, in adulthood, are preoccupied by uneasy memories and visions of their classmate Estrella González Jepsen. In their dreams, they catch glimpses of Estrella's braids, hear echoes of her voice, and read old letters that eventually, mysteriously, stopped arriving. They recall regimented school assemblies, nationalistic class performances, and a trip to the beach. Soon it becomes clear that Estrella's father was a ranking government officer implicated in the violent crimes of the Pinochet regime, and the question of what became of her after she left school haunts her erstwhile friends. Growing up, these friends—from her pen pal, Maldonado, to her crush, Riquelme—were old enough to sense the danger and tension that surrounded them, but were powerless in the face of it. They could control only the stories they told

one another and the “ghostly green bullets” they fired in the video game they played obsessively. One of the leading Latin American writers of her generation, Nona Fernández effortlessly builds a choral and constantly shifting image of young life in the waning years of the dictatorship. In her short but intricately layered novel, she summons the collective memory of a generation, rescuing felt truth from the oblivion of official history.

Space Invaders Murray Oliver,1985

Space Invaders Michel van Pelt,2010-05-05 Manned space programs attract the most media attention, and it is not hard to understand why: the danger, the heroism, the sheer adventure we as earthbound observers can imagine when humans are involved. But robotic missions deserve a respectful and detailed history and analysis of their own, and this book provides it. Instead of describing one

specific spacecraft or mission, Michel van Pelt offers a behind the scenes look at the life of a space probe from its first conceptual design to the analysis of the scientific data returned by the spacecraft.
