Nefertiti, the Spidernaut - Amazing Animal Books - 6-8 Children's Picture Books Darcy Pattison, 2016-10-11 THE AMAZING VOYAGE OF NEFERTITI, THE SPIDERNAUT, Kids nonfiction picture book. Nonfiction science, animal biography. Most spiders spin a web and passively wait for prey to come to them. Jumping spiders, by contrast, actively hunt by jumping to catch their food. What if a jumping spider was sent to the International Space Station? When it jumped, it would simply float. No one knew if the spider could hunt in a weightless environment. This nonfiction picture book for elementary kids chronicles the amazing voyage of Nefertiti, the Spidernaut to the International Space Station and back. She's a *Phidippus johnsonii*, or Johnson jumping spider, native to western United States. Her colorful anatomy, black and teal, made for stunning photography and video. In 2012, Nefertiti clocked a record-breaking 100 days in space, during which time she circled Earth about 1584 times, traveling about 41,580,000 miles. Astronaut Sunita Williams, Captain U.S. Navy said, It was a suspense story for me as it happened. I didn't know if she would survive when I unpacked her for the first time, or when I packed her up and sent her back home to Earth. This is an astonishing story of change: through the dark and cold, in spite of being weightless and isolated, this incredible spider adapted and learned to hunt. Against all odds, she survived to return to Earth, where she had to re-adapt to Earth's gravity. Nefertiti's story of survival brings hope that we, too, can adapt to a changing world. Join Nefertiti in this inspiring journey into space. WHAT THEY ARE SAYING In this remarkable true story of a jumping spider sent on a mission to space, Darcy Pattison successfully weaves together life science, earth space science, engineering, and technology within a suspenseful narrative. Readers will be drawn to Nefertiti's resilience as she tackles a challenge no spider has ever faced before, to learn how to hunt in microgravity. This heartwarming and educational book will make a terrific addition to any classroom STEM library. - Karen Ansberry and Emily Morgan, science educators and authors of *Picture-Perfect Science Lessons* Nefertiti The Spidernaut is an accurate and step by step account of this spider's journey to and from the International Space Station. Having worked on invertebrates in space experiments with BioServe, Darcy Pattison truly caught the scope of the science while keeping you rooting for Nefertiti. His parents fight so much, they put the dis into dysfunctional. His brothers, Stinky and Weird, are impossible to get along with. And his neighborhood is a down-trodden tunnel community on Earth. It's supposed to be a short vacation—a trip up the Line, Earth's space elevator, and then home again. Halfway there, Chigger hits on a plan: if his parents can't find a way to work things out, why not just divorce them? The idea sounds crazy . . . until it works. But Chigger soon realizes he has much bigger problems: The people they meet on the Moon seem overly friendly and way too interested in his family. Suddenly, the quick pleasure trip takes a detour into danger as Chigger suspects they are targets of an interstellar manhunt. Their only hope may be to jump off the planet.

Moon Jump C. A. Hiddleston, 2019-05-31 What is it like to be trapped on a planet dying from the last heat of global warming? Experience it for yourself before it really happens to you. In this political satire about the prehistoric Moon government's failure to come to grips with the issue, feel the intense emotion of wanting to get off the little planet and go to the primitive Earth, see the interpersonal conflict and corruption that puts the little globe beyond the point of no return, and lift off with the younger generation who must deal with their immaturity in populating the new Earth. See the dramatic end of the old Moon government, as a scientist with common sense takes over and tries to save everything. He deploys the gigantic ACM, government-speak for the Atmospheric Cooling Machine. Can you predict how that idea turned out?

Magnificent Failure Craig Ryan, 2014-09-02 Locked in a desperate Cold War race against the Soviets to find out if humans could survive in space and live through a free fall from space vehicles, the Pentagon gave civilian adventurer Nick Piantanida's Project Strato-Jump little notice until May Day, 1966. Operating in the shadows of well-funded, high-visibility Air Force and Navy projects, the former truck driver and pet store owner set a new world record for manned balloon altitude. Rising more than 23 miles over the South Dakota prairie, Piantanida nearly perished trying to set the world record for the highest free fall parachute jump from that height. On his next attempt, he would not be so lucky. Part harrowing adventure story, part space history, part psychological portrait of an extraordinary risk-taker, this story fascinates and intrigues the armchair adventurer in all of us.
