Atari Design Raiford Guins, 2020-11-12 Drawing from deep archival research and extensive interviews, Atari Design is a rich, historical study of how Atari's industrial and graphic designers contributed to the development of the video game machine. Innovative game design played a key role in the growth of Atari - from Pong to Asteroids and beyond - but fun, challenging and exciting game play was not unique to the famous Silicon Valley company. What set it apart from its competitors was innovation in the coin-op machine's cabinet. Atari did not just make games, it designed products for environments. With “tasteful packaging”, Atari exceeded traditional locations like bars, amusement parks and arcades, developing the look and feel of their game cabinets for new locations such as fast food restaurants, department stores, country clubs, university unions, and airports, making game-play a ubiquitous social and cultural experience. By actively shaping the interaction between user and machine, overcoming styling limitations and generating a distinct corporate identity, Atari designed products that impacted the everyday visual and material culture of the late 20th century. Design was never an afterthought at Atari.

Islamic States in Java 1500–1700 Theodore Gauthier Th. Pigeaud, 2013-12-01 The growing interest in the history of Indonesia has made it desirable to have an English summary of the principal works of the Dutch historian Dr H. J. de Graaf, who in several books and articles published between 1935 and 1973 has given a description of the development of the Javanese kingdom of Mataram, based both on European and in digenous material. His works form a substantial contribution to the study of the national history of Indonesia. The Summary contains references to the paragraphs of the Dutch books and articles. This makes it easy for those readers who have a know ledge of Dutch to consult the original texts. The List of Sources for the study of Javanese history from 1500 to 1700 is composed of the lists in the summarized books and articles, and the Index of Names refers not only to the present Summary but also to the eight original texts. Many names of persons and localities in the Index have been provided with short explanatory notes and references to other lemmata as a quick way to give some provisional information on Javanese history.

Solarversia MR Toby Downton, 2015-08-18 It's the 29th February 2020 and Nova Negrahnu cannot wait to start playing Solarversia, a year-long game based in a virtual world that's modelled on the real world solar system. Given three lives, three vehicles, and told to master the Science of Solarversia to stand a chance of winning, players compete against 100 million people for the 10m grand prize, and a place in the history books. Solarversia starts three months before Nova's A-levels, the life-changing exams that could see her win a place at Nottingham, the university that Charlie attends, the second-year student she falls for on an open-day visit. As she strains to balance her addiction to the game with her mounting schoolwork, Nova's world is unexpectedly turned upside down when the Holy Order, a mysterious cult-like organisation sets its sights on the game and Spiralwerks, its creator. Told from three different perspectives - Nova the gamer, Artica Kronkite, the CEO of Spiralwerks, and Casey Brown, a newly-initiated member of the Holy Order - Solarversia is a game that author Toby Downton hopes to make for real, to launch in 2020, so that people can actually play it. From the initial press release: The world of virtual reality is about to fundamentally reshape the way in which we live, work and play. The Oculus Rift - the much-lauded and potentially transformational VR headset, which broke crowdfunding records in 2012, and was recently acquired by Facebook for \$2 billion - is scheduled to launch in early 2016. While its most obvious impact will hit the world's 700 million plus gamers, Facebook CEO Mark Zuckerberg believes the potential VR impact to be far more profound: Imagine enjoying a court side seat at a game, studying in a classroom of students and teachers all over the world or consulting with a doctor face-to-face - just by putting on goggles in your home. The relatively new genre of litRPG, or virtual reality inspired science fiction centred around the gaming industry, is booming, with Ernest Cline's bestseller Ready Player One already in production for a major movie adaptation with Spielberg directing. Downton is emerging as a driving force in the VR revolution. His novel Solaversia is just the first step in his thrillingly ambitious multi-platform story-telling experience that will explore the relationships between artificial intelligence, technology and the human spirit. Downton has incorporated his tech-company - Spiralwerks - in the real world, developing Solarversia as a commercially available game, ready to storm the games market in 2020. Accompanying the publication of Solarversia is the Golden Ticket promotion, which will enable readers to win one of a hundred specially reserved places within the Player's Grid, through a series of innovative competitions.

Playing the Past Zach Whalen, Laurie N. Taylor, 2008 Playing the Past brings together a group of interdisciplinary scholars to examine the complementary notions of history and nostalgia as they are expressed through video games and in gaming culture. The scope of these related concepts moves from the personal to the cultural, and essays in this collection address video game nostalgia as both an individual and societal phenomenon, connecting the fond memories many of us have of classic gaming to contemporary representations of historical periods and events in video games. From Ms. Pac-Man and Space Invaders to Call of Duty and JFK: Reloaded, the games many of us have played since childhood inform how we see the world today, and the games we make and play today help us communicate ideas about real world history. By focusing on specific games, historical periods and media ecologies, these essays collectively take an in depth look at the related topics of nostalgia for classic gaming, gaming and histories of other media, and representations of real history in video games.

Core Techniques and Algorithms in Game Programming Daniel Sánchez-Crespo Dalmau, 2004 To even try to keep pace with the rapid evolution of game development, you need a strong foundation in core programming techniques-not a hefty volume on one narrow topic or one that devotes itself to API-specific implementations. Finally, there's a guide that delivers! As a professor at the Spanish university that offered that country's first master's degree in video game creation, author Daniel Sanchez-Crespo recognizes that there's a core programming curriculum every game designer should be well versed in-and he's outlined it in these pages! By focusing on time-tested coding techniques-and providing code samples that use C++, and the OpenGL and DirectX APIs-Daniel has produced a guide whose shelf life will extend long beyond the latest industry trend. Code design, data structures, design patterns, AI, scripting engines, 3D pipelines, texture mapping, and more: They're all covered here-in clear, coherent fashion and with a focus on the essentials that will have you referring back to this volume for years to come.

Food Security for Papua New Guinea R. M. Bourke,2001 People have adequate food security when households have the capacity to access sufficient food at all times, either through self-production or through market purchases. Overall, food security is high in PNG as most rural people have access to land and can grow most of their food requirements. The food security situation is considerably better in PNG now than it was before the Pacific war. This is because high-yield staple crops have been adopted and people have access to cash income that can be used to purchase food. The adoption of new staple crops provided a once-off benefit, however, this phase is now ending in PNG. This proceedings contains the 120 papers presented at the Papua New Guinea Food and Nutrition 2000 Conference held at the PNG University of Technology in Lae from 26-30 June 2000.

Jacked tells the turbulent and mostly unknown story of GTA's wildly ambitious creators, Rockstar Games, the invention and evolution of the franchise, and the cultural and political backlash it has provoked. Explains how British prep school brothers Sam and Dan Houser took their dream of fame, fortune, and the glamor of American pop culture and transformed it into a worldwide videogame blockbuster Written by David Kushner, author of Masters of Doom and a top journalist on gaming, and drawn from over ten years of interviews and research, including firsthand knowledge of Grand Theft Auto's creators and detractors Offers inside details on key episodes in the development of the series, including the financial turmoil of Rockstar games, the infamous Hot Coffee sex mini-game incident, and more Whether you love Grand Theft Auto or hate it, or just want to understand the defining entertainment product of a generation, you'll want to read Jacked and get the real story behind this boundary-pushing game.
