Faster-Than-Light Space Travel Holly Duhig,2017-12-15 Whether it's hyperdrive in Star Wars or warp speed in Star Trek, most science-fiction lovers know that in order to travel anywhere in space in a timely manner, you've got to go faster than the speed of light. Much of that idea isn't possible, but space scientists have found many ways to speed up human space travel. Through easily understandable explanations and examples of real, cutting-edge technology, this book's main content guides readers from the fantasy of science fiction to the incredible reality of today's science fact.

Compendium on Light Speed Travel James Essig,2017-05-26 Some theoreticians contemplate and formulate the physics of tachyons, which are hypothetical particles, that would always travel faster than light but which could never slow down to the speed of light just as they anticipate sublight speed massive particles never being able to achieve light speed. So my theoretical work on the physics and kinematics of light-speed massive systems sets me apart from general trends in the theoretical field of relativistic astronautics. This book is a continuation of how and why we may be able to, at some future time, travel at the speed of light.

As a new generation of adventures prepares to cast its lot into space, challenging previously accepted models of space exploration, *Voyage to the Milky Way* explores the future of space travel from both the scientific and cultural points of view. It discusses not only our boldest and most romantic visions to date, but also the myths and illusions that have informed them and the technologies we will utilize to fulfill them. Award-winning astronomer and author Donald Goldsmith discusses and analyzes our impulse to colonize the solar system; early space-flight visionaries and rocket builders; space colony designs; rocket ship designs; robots and cyborgs; the role of private entrepreneurs in the future of space travel and development; faster-than-light travel; and the strong possibility of a twenty-first-century flight to a nearby star.
