An internet user is constantly confronted by mass emails containing undesired information. Spam, defined as bulk unsolicited emailing, generally commercial in nature, and predominately fraudulent. Spam causes high charges and damages. Nucleus Research announced that the spam epidemic is costing US businesses $712 per employee each year in lost worker productivity. As a result, users are spending 16 seconds identifying and deleting each spam e-mail, which translates into an annual cost of $70 bln to all US businesses. Looking at the total e-mail traffic, Nucleus estimates that at least 90% of e-mail reaching corporate servers is spam. The average user receives 21 spam messages to their inbox each day. (Moskalyuk 2007) Regardless of the inefficient time spent, there are further costs caused

by spam, such as (cf Filterpoint 2008): · Deleted emails remain stored in the trash folder. · Higher storage costs through higher server expenses. · Higher bandwith essential to store the spam mails. · Time spent by IT staff for anti-spam measures. · Recovery costs after a virus attack. Various experts provide a spam calculator that enables to determine the approximate annual costs for an enterprise created by spam. (Gibbs 2003, Commtouch 2007) The calculator introduced by Gibbs differentiates productivity, connectivity, storage and support costs. This Spam Cost Analysis Model can be found in appendix 1 of this work. In this work different types of spam in general and in specific will be pointed out and characterized. Measures against unsolicited emails will be reviewed. First I start with the definition of spam and where it comes from, followed with the spam history. Then I briefly list the most common categories and variants of spam used. I conclude with an overview of spam solutions offered and point out further research topics in the area.

Warhol-isms Andy Warhol,2022-05-10 A unique collection of brilliant quotations from the legendary Pop artist One of the most influential artists of his time and ours, Andy Warhol is nearly as renowned for what he said as for what he did. Indeed, he is so quotable that things he never said are endlessly and plausibly attributed to him, including, fittingly, the most celebrated fake Warhol saying—"In the future, everyone will be world-famous for 15 minutes." Warhol-isms separates legend from fact to present a unique and comprehensive collection of authentic quotations from the Pop artist. Gathered from interviews and other primary sources, these deadpan, droll, ironic, and sincere gems—in which a superficial embrace of superficiality often disguises provocative, unconventional ideas—provide compelling insights into the life and work of an artist who has left an indelible mark on art and popular culture. Select quotations from the book: I think an artist is anybody who does something well.I went to [a psychiatrist] once, and he never called me back.They always say that time changes things, but you actually have to change them yourself.I've never met a person I couldn't call a beauty.New things are always better than old things.I'm still a commercial artist. I was always a commercial artist.
