Using Annotated Discourse Information of a RST Spanish-Chinese Treebank for Translation and Language Learning Tasks Shuyuan Cao,2018 As one of the essential elements for Natural Language Processing (NLP), discourse has called much attention during recent years. Many studies explore the role of how discourse elements affect in different NLP research areas, such as parsing, sentiment analysis, machine translation evaluation, among others. Besides, along with the discourse analysis development, different treebanks annotated with discourse information for different languages form a great contribution for advancing the NLP researches. Spanish and Chinese are two of the most spoken languages in the world; the language pair occupy an important position for NLP studies. Therefore, this study aims to make a discourse analysis between the two languages in terms of annotating discourse similarities and differences under the theoretical framework of Rhetorical Structure Theory (RST) by Mann and Thompson (1988). Our goal, which is the main objective of this study, based on the annotation results, the study seeks to develop a protocol that includes recommendations for Spanish-Chinese translation. In addition, with a globalized context in the current society, the communication between Spanish and Chinese is more and more intensive. Therefore, another intention of our study is to develop some resources for the language learning between Spanish-Chinese. To achieve our goals, for the development of the protocol, we firstly establish a Spanish-Chinese parallel corpus and annotate the discourse information of the entire corpus. Then we evaluate the annotation results following a qualitative method to guarantee the high quality of the annotation results. Lastly, we conclude the discourse similarities and differences to make the protocol. Regarding the language learning between the two languages, we fully use the manually annotated discourse markers (DM) to develop a question-answering module. In recent years, there have been few contrastive works of Spanish and Chinese for discourse analysis. Therefore, this PhD study aims to partially fill a knowledge gap in the study between Spanish and Chinese.

Chinese Translation Studies in the 21st Century Roberto A. Valdeon,2018-11-09 Chinese Translation Studies in the 21st Century, which presents a selection of some of the best articles published in the journal Perspectives in a five-year period (2012-2017), highlights the vitality of Translation Studies as a profession and as a field of enquiry in China. As the country has gradually opened up to the West, translation academic programmes have burgeoned to cater for the needs of Chinese corporations and political institutions. The book is divided into four sections, in which authors explore theoretical and conceptual issues (such as the connection between translation and adaptation, multimodality, and the nature of norms), audiovisual translation (including studies on news translation and the translation of children's movies), bibliographies and bibliometrics (to assess, for example, the international visibility of Chinese scholars), and interpreting (analyzing pauses in simultaneous interpreting and sign language among other aspects). The book brings together well-established authors and younger scholars from universities in mainland China, Hong Kong, Macao and Taiwan. The chapters in this book were originally published in various issues of Perspectives: Studies in Translatology.

Corpus Methodologies Explained Meng Ji,Michael Oakes,Li Defeng,Lidun Hareide,2016-08-25 This book introduces the latest advances in Corpus-Based Translation Studies (CBTS), a thriving subfield of Translation Studies which forms an important part of both translator training and empirical translation research. Largely empirical and exploratory, a distinctive feature of CBTS is the development and exploration of quantitative linguistic data in search of useful patterns of variation and change in translation. With the introduction of textual statistics to Translation Studies, CBTS has geared towards a new research direction that is more systematic in the identification of translation patterns; and more explanatory of any linguistic variations identified in translations. The book traces the advances from the advent of language corpora in translation studies, to the new textual dimensions and shift towards a probability-variation model. Such advances made in CBTS have enabled in-depth analyses of translation by establishing useful links between a translation and the social and cultural context in which the translation is produced, circulated and consumed.

Introduction to Chinese-English Translation Zinan Ye,Lynette Xiaojing Shi,2009 Introduction to Chinese-English Translation is the first book published in the U.S. that addresses how to translate from Chinese into English. Part One discusses basic issues in translation. Part Two introduces ten essential skills with the help of actual translation examples. Part Three deals with more advanced issues such as metaphors, idioms, and text analysis. Part Four presents six texts of different types for translation practice. A sample translation is provided for each, and translation strategies are analyzed and discussed. --This unique book is the only resource on Chinese-English translation published in the U.S. --A practical, hands-on book for anyone involved in Chinese-English translation, including professional translators, interpreters, and advanced students --Full of examples, explanations, and exercises Zinan Ye has had a long career in translation, as a medical translator and as an educator at Hangzhou University and the Monterey Institute of International Studies. He has written books on translation and writes regularly for Chinese Translators Journal. Lynette Xiaojing Shi has been a translator and interpreter for 30 years, including at the United Nations. She has taught at the University of Hawaii and the Monterey Institute of International Studies. She has translated a novel and has consulted on Chinese-English dictionaries published in China.

An Encyclopaedia of Translation Sin-wai Chan,David E. Pollard,2001 Language-specific entries relate to the interaction between the Chinese-speaking and English-speaking communities of Hong Kong. At the same time, the work draws on Western knowledge and experience with translation studies in general. This book is a valuable reference for translators, scholars, and students of translation studies.

Translating China Xuanmin Luo,Yuanjian He,2009 The book is a collection of essays on translating various types of text (literary, religious, political, etc.) into and from Chinese. The focus is on how such translations have been produced and propagated from ancient to modern times, and their sociocultural impact on the evolution of Chinese history and Chinese translatology.

Introduction to Spanish Translation Jack Child,2012-07-10 Introduction to Spanish Translation is designed for a third or fourth year college Spanish course. It presents the history, theory and practice of Spanish-to-English translation (with some consideration of English-to-Spanish translation). The very successful first edition of the text evolved from the author's experiences in two decades of teaching translation in the Department of Language and Foreign Studies of The American University. The emphasis is on general material to be found in current journals and newspapers, although there is also some specialized material from the fields of business, the social sciences, and literature. The twenty-four lessons in the text form the basis for a fourteen-week semester course. This newly revised edition contains an index, a glossary, examples of cognates and partial cognates, and translation exercises for each lesson.

Where Theory and Practice Meet Laurence Wong,2016-08-17 Where Theory and Practice Meet is a collection of nineteen papers in translation studies. Unlike many similar books published in recent decades, which are mostly non-translation-oriented, veering to issues with little or no relevance to translation, this book focuses on the translation process, on theory formulation with reference to actual translation, on getting to grips with translation problems, and on explaining translation in language which can be understood by the general reader. Perceptive and wide-ranging, the book covers language pairs that include Chinese, English, French, German, Italian, Spanish, Latin, and Classical Greek, and discusses, among other things, translations of Dante's La Divina Commedia; translations of Shakespeare's Hamlet; Goethe's "Prometheus" as a case of untranslatability; the challenge of translating Garcilaso de la Vega's "Primera Égloga" into Chinese; John Minford's translation of martial arts fiction; and Lin Shu's translation of Alexandre Dumas's La Dame aux camélias.

Translation and Bilingual Dictionaries Chan Sin-wai,2013-02-06 Is the bilingual dictionary really the translator's best friend? Or is it the case that all translators hate all dictionaries? The truth

probably lies half-way. It is difficult to verify anyway, as the literature on the subject(s) is limited, not helped by the fact that Lexicography and Translation have stood apart for decades despite their commonality of purpose. Here is a volume, based on the proceedings of a successful conference at Hong Kong, that may at last provide some answers.

Translation and Translanguaging Mike Baynham, Tong King Lee, 2019-06-11 Translation and Translanguaging brings into dialogue translanguaging as a theoretical lens and translation as an applied practice. This book is the first to ask: what can translanguaging tell us about translation and what can translation tell us about translanguaging? Translanguaging originated as a term to characterize bilingual and multilingual repertoires. This book extends the linguistic focus to consider translanguaging and translation in tandem – across languages, language varieties, registers, and discourses, and in a diverse range of contexts: everyday multilingual settings involving community interpreting and cultural brokering, embodied interaction in sports, text-based commodities, and multimodal experimental poetics. Characterizing translanguaging as the deployment of a spectrum of semiotic resources, the book illustrates how perspectives from translation can enrich our understanding of translanguaging, and how translanguaging, with its notions of repertoire and the moment, can contribute to a practice-based account of translation. Illustrated with examples from a range of languages, including Spanish, Chinese, Japanese, Czech, Lingala, and varieties of English, this timely book will be essential reading for researchers and graduate students in sociolinguistics, translation studies, multimodal studies, applied linguistics, and related areas.

Hacking Chinese Olle Linge, 2016-03-26 Learning Chinese can be frustrating and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough. They show you the characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them! Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the difference between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn characters efficiently? How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a better way, but I can help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study. - Geoff van der Meer, VP engineering This publication is like a bible for anyone serious about Chinese proficiency. It's easy for anyone to read and written with scientific precision. - Zachary Danz, foreign teacher, children's theatre artist About me I started learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, Hacking Chinese, where I write regularly about how to learn Mandarin.

Francisco Varo's Grammar of the Mandarin Language (1703) W. South Coblin, Joseph A. Levi, 2000-09-15 Francisco Varo's *Arte de la Lengua Mandarina*, completed ca. 1680, is the earliest published grammar of any spoken form of Chinese and the fullest known description of the standard language of the seventeenth century. It establishes beyond doubt that this "Language of the Mandarins" was not Pekingese or Peking-based but had instead a Jiang-Huai or Nankingese-like phonology. It also provides important information about the nature and formation of pre-modern standard forms of Chinese and will lead to revisions of currently held views on Chinese koines and their relationship with regional speech forms and the received vernacular literature. Finally, it provides a wealth of information on stylistic speech levels, honorific usage, and social customs of the elite during the early Qing period. The book provides a full translation of the 1703 text of the *Arte*, an extensive introduction to the life and work of Varo, an index of Chinese characters inserted into the translation, and an index of linguistic terms and concepts. It should be of interest to a diverse readership of Chinese historical, comparative, and descriptive linguists, students of Qing history and literature, historiographers of linguistics, and specialists in early Western religious and cultural contact with China.

Dialogues on the Theory and Practice of Literary Translation Xu Jun, 2019-11-07 The book is a collection of the dialogues between Xu Jun, a well-known expert in French literary translation and eminent "Changjiang" scholar in translation studies in China, and some celebrated literary translators in contemporary China, some of whom are also literary scholars, linguists, poets, prose writers, and editors. It is a fundamental achievement of research on the literary translation in the 20th century in China, involving multiple literary types, such as novels, poetry, dramas, prose, and fairy tales; and multiple languages, such as English, French, German, Russian, Italian, Spanish, Japanese, and Sanskrit. The dialogues are centered on fundamental issues in the theory and practice of literary translation, such as re-creation in literary translation, the relationship between form and content in literary translation, the subjectivity of literary translators, literary translation standards and principles, the gains and losses in literary translation, the principles and methods of literary criticism, and so on. Those translation experts' experience and multiple strategies not only play an active role in guiding literary translators in practice but also benefit theoretical development in literary translation. Thus, the book will contribute to worldwide translation studies and get well recognized by

translation studies students, teachers, and scholars in the world.

Redefining Translation and Interpretation in Cultural Evolution Seel, Olaf Immanuel,2017-10-31 Culture has a significant influence on the emerging trends in translation and interpretation. By studying language from a diverse perspective, deeper insights and understanding can be gained. Redefining Translation and Interpretation in Cultural Evolution is a pivotal reference source for the latest scholarly research on culture-oriented translation and interpretation studies in the contemporary globalized society. Featuring coverage on a range of topics such as sociopolitical factors, gender considerations, and intercultural communication, this book is ideally designed for linguistics, educators, researchers, academics, professionals, and students interested in cultural discourse in translation studies.

Francisco Varo's Glossary of the Mandarin Language W South Coblin,2021-08-01 Western missionaries contributed largely to Chinese lexicography. Their involvement was basically a practical rather than a theoretical one. In order to preach and convert, it was necessary to speak Chinese. A missionary on post needed to learn at least two languages, the national Guanhua, the language of the officials or Mandarin, and the local vernacular. The first lexicographical work by missionaries was a Portuguese-Chinese dictionary compiled in the late 1500s by Francisco Varo (1627-1687), a Spanish Dominican based in the province of Fujian, was legendary for his superb mastery in Mandarin. His Vocabulario de la Lengua Mandarina, a Spanish-Chinese dictionary, is made available to modern readers in the present study, which is based on two manuscripts held in Berlin and London. Volume 1 contains the text of Varo's glossary, with English translations offered for all Spanish glosses and Chinese characters added for all Chinese forms. Volume 2 includes a pinyin index to all Chinese forms in the text and a selective index to the English translations of the Chinese glosses. The Vocabulario is mainly devoted to the spoken language, but includes literary forms as well. Varo was also sensitive to other matters of usage, e.g., questions of style, new expressions coined by the missionaries, specific expressions in Chinese and in European culture, Chinese customs and beliefs, and aspects of grammar. The Vocabulario is recommended for readers interested in Chinese linguistics, lexicography, Sino-Western cultural relations and the history of Christianity in China.

Less Translated Languages Albert Branchadell,Lovell Margaret West,2005 This is the first collection of articles devoted entirely to less translated languages, a term that brings together well-known, widely used languages such as Arabic or Chinese, and long-neglected minority languages with power as the key word at play. It starts with some views on English, the dominant language in Translation as elsewhere, considers the role of translation for minority languages both a source of inequality and a means to overcome it, takes a look at translation from less translated major languages and cultures, and ends up with a closer look at translation into Catalan, a paradigmatic case of less translated language, in a final section that includes a vindication of six prominent Catalan translators. Combining sound theoretical insight and accurate analysis of relevant case studies, the contributors to this collection make a convincing case for a more thorough examination of less translated languages within the field of Translation Studies.
