Knowledge-based Software Engineering Enn Tõugu, Ënn Kharal'dovich Tyugu, Takahira Yamaguchi, 2006 This publication addresses the research in theoretical foundations, practical techniques, software tools, applications and / or practical experiences in knowledge-based software engineering. The book also includes a new field: research in web services and semantic web. This is a rapidly developing research area promising to give excellent practical outcome, and interesting for theoretically minded as well as for practically minded people. The largest part of the papers belongs to a traditional area of applications of artificial intelligence methods to various software engineering problems. Another traditional section is application of intelligent agents in software engineering. A separate section is devoted to interesting applications and special techniques related in one or another way to the topic of the conference.--Publisher's website.

Documentation and User Guides for SPBLOB ,2009 Stand types (e.g., plantations derived from seedlings or from clonally generated materials) can be compared in terms of average total merchantable volume of timber per acre at time of harvest and/or by average proportions of surviving trees. Average stand yields in the presence of beetles can also be compared with those when beetles are absent, thus providing a basis for estimating the real cost of beetle damage in loblolly stands. In this Documentation we briefly describe the model, then outline the concepts and structure upon which the SPBLOB simulation source

code is based. The included User Guides specify the input information regarding a loblolly stand and its environment required to run two executable Simulation Codes --

Migration Hugh Dingle, 2014-07-17 Migration, broadly defined as directional movement to take advantage of spatially distributed resources, is a dramatic behaviour and an important component of many life histories that can contribute to the fundamental structuring of ecosystems. In recent years, our understanding of migration has advanced radically with respect to both new data and conceptual understanding. It is now almost twenty years since publication of the first edition, and an authoritative and up-to-date sequel that provides a taxonomically comprehensive overview of the latest research is therefore timely. The emphasis throughout this advanced textbook is on the definition and description of migratory behaviour, its ecological outcomes for individuals, populations, and communities, and how these outcomes lead to natural selection acting on the behaviour to cause its evolution. It takes a truly integrative approach, showing how comparisons across a diversity of organisms and biological disciplines can illuminate migratory life cycles, their evolution, and the relation of migration to other movements. Migration: The Biology of Life on the Move focuses on migration as a behavioural phenomenon with important ecological consequences for organisms as diverse as aphids, butterflies, birds and whales. It is suitable for senior undergraduate and graduate level students taking courses in behaviour,

spatial ecology, 'movement ecology', and conservation. It will also be of interest and use to a broader audience of professional ecologists and behaviourists seeking an authoritative overview of this rapidly expanding field.

Wandering Workers Juri Plusnin, Yana Zausaeva, Natalia Zhidkevich, Artemy Pozanenko, 2014-06-01 This timely book offers a fresh perspective on the issue of contemporary migratory labor, otkhodnichestvo, in Russia -- the temporary departure of inhabitants from small towns and villages for short-term jobs in the major cities of Russia. Although otkhodnichestvo is a mass phenomenon, it is not reflected in official economic statistics. Based on numerous interviews with otkhodniks and local experts, this stunningly original work focuses on the central and northern regions of European Russia. The authors draw a social portrait of the contemporary otkhodnik and offer a sociological assessment of the economic and political status these 'wandering workers' live with.

Migration and Hybrid Political Regimes Rustamjon Urinboyev, 2020-12-01 A free open access ebook is available upon publication. Learn more at www.luminosoa.org. While migration has become an all-important topic of discussion around the globe, mainstream literature on migrants' legal adaptation and integration has focused on case studies of immigrant communities in Western-style democracies. We know relatively little about how migrants adapt to a new legal environment in the

ever-growing hybrid political regimes that are neither clearly democratic nor conventionally authoritarian. This book takes up the case of Russia—an archetypal hybrid political regime and the third largest recipients of migrants worldwide—and investigates how Central Asian migrant workers produce new forms of informal governance and legal order. Migrants use the opportunities provided by a weak rule-of-law and a corrupt political system to navigate the repressive legal landscape and to negotiate—using informal channels—access to employment and other opportunities that are hard to obtain through the official legal framework of their host country. This lively ethnography presents new theoretical perspectives for studying immigrant legal incorporation in similar political contexts.

Movements, Migrants, Marginalisation Heiko Pleines, Sabine Fischer, Hans-Henning Schröder, 2012-02-24 The end of socialism posed a historical challenge to European societies. The former socialist Central and East European countries were faced with what has been called a triple transformation: Mutually dependent changes in the political, economic, and social spheres. At the same time, the old EU member states had to develop strategies to react to these developments and integrate former socialist societies. This post-socialist transformation of Europe coincided with a number of broader trends in the political, economic, and social spheres which are often collectively referred to as globalisation. Success or failure to adapt to these changes creates winners and losers. The focus of this edited

volume is on various groups of losers and the challenges they face as a result of their marginalisation. This book presents the results of the Changing Europe Summer School on Justice as a societal and political matter. Equality, social and legal security as conditions for democracy and the market that took place in Berlin in July 2006. The Summer School brought together more than 30 young scholars from all over the world who work on issues related to Central and Eastern European societies and the enlarged EU.

Late Migrations Margaret Renkl, 2019-07-09 From the New York Times columnist, a portrait of a family and the cycles of joy and grief that mark the natural world: "Has the makings of an American classic." —Ann Patchett Growing up in Alabama, Margaret Renkl was a devoted reader, an explorer of riverbeds and red-dirt roads, and a fiercely loved daughter. Here, in brief essays, she traces a tender and honest portrait of her complicated parents—her exuberant, creative mother; her steady, supportive father—and of the bittersweet moments that accompany a child's transition to caregiver. And here, braided into the overall narrative, Renkl offers observations on the world surrounding her suburban Nashville home. Ringing with rapture and heartache, these essays convey the dignity of bluebirds and rat snakes, monarch butterflies and native bees. As these two threads haunt and harmonize with each other, Renkl suggests that there is astonishment to be found in common things: in what seems ordinary, in what we

all share. For in both worlds—the natural one and our own—“the shadow side of love is always loss, and grief is only love’s own twin.” Gorgeously illustrated by the author’s brother, Billy Renkl, *Late Migrations* is an assured and memorable debut. “Magnificent . . . Readers will savor each page and the many gems of wisdom they contain.”

Development and Gender Capital in India Shoba Arun, 2017-09-06 The Indian state of Kerala has invoked much attention within development and gender debates, specifically in relation to its female capital- an outcome of interrelated historical, cultural and social practices. On the one hand, Kerala has been romanticised, with its citizenry, particularly women, being free of

social divisions and uplifted through educational well-being. On the other hand, its realism is stark, particularly in the light of recent social changes. Using a Bourdieusian frame of analysis, *Development and Gender Capital in India* explores the forces of globalisation and how they are embedded within power structures. Through narratives of women's lived experiences in the private and public domains, it highlights the 'anomie of gender' through complexities and contradictions vis-à-vis processes of modernity, development and globalisation. By demonstrating the limits placed upon gender capital by structures of patriarchy and domination, it argues that discussions about the empowered Malayalee women should move from a mere 'politics of rhetoric and representation' to a more embedded 'politics of transformation', meaningfully taking into account women's changing roles and identities. This book will be of interest to scholars and students of Development Studies, Gender Studies, Anthropology and Sociology.

Adult Language Education and Migration James Simpson, Anne Whiteside, 2015-03-27 *Adult Language Education and Migration: Challenging Agendas in Policy and Practice* provides a lively and critical examination of policy and practice in language education for adult migrants around the world, showing how opportunities for learning the language of a new country both shape and are shaped by policy moves. Language policies for migrants are often controversial and hotly contested, but at the same time innovative teaching practices are emerging in response to the

language learning needs of today's mobile populations. This book: analyses and challenges language education policies relating to adult migrants in nine countries; provides a comparative study with separate chapters on policy and practice in each country; focuses on Australia, Canada, Spain (Catalonia), Finland, France, Ireland, the Netherlands, the UK and the US. Adult Language Education and Migration is essential reading for practitioners, students and researchers working in the area of language education in migration contexts.

Logical Foundations of Computer Science S. I. Adiñan,1997-05-28 A Sobolev gradient of a real-valued functional is a gradient of that functional taken relative to the underlying Sobolev norm. This book shows how descent methods using such gradients allow a unified treatment of a wide variety of problems in differential equations. Equal emphasis is placed on numerical and theoretical matters. Several concrete applications are made to illustrate the method. These applications include (1) Ginzburg-Landau functionals of superconductivity, (2) problems of transonic flow in which type depends locally on nonlinearities, and (3) minimal surface problems. Sobolev gradient constructions rely on a study of orthogonal projections onto graphs of closed densely defined linear transformations from one Hilbert space to another. These developments use work of Weyl, von Neumann and Beurling.

Food Biotechnology Y. H. Hui,George G. Khachatourians,1996-12-17 This handbook discusses how microorganisms (bacteria, fungi, yeasts) can

be modified to various extents by means of molecular genetics or genetic engineering. Compiled and written by the world's leading experts and practitioners in food science and food technology, it presents the latest research and development in the discipline. It is easy-to-understand and can be used directly by readers interested in practical and commercial applications. So this book is important for researchers as a reference guide, and it can be used in various disciplines as microbiology, chemistry, biochemistry and engineering. 'Food Biotechnology' also is interesting for the industries, in addition to food processing, because commercial products and services affected include fine chemicals, enzymes, cultures, equipment and supplies.
