Slow Light Sidney Perkowitz,2011 Slow Light is a popular treatment of today's astonishing breakthroughs in the science of light. Even though we don't understand light's quantum mysteries, we can slow it to a stop and speed it up beyond its Einsteinian speed limit, 186,000 miles/sec; use it for quantum telecommunications; teleport it; manipulate it to create invisibility; and perhaps generate hydrogen fusion power with it. All this is lucidly presented for non-scientists who wonder about teleportation, Harry Potter invisibility cloaks, and other fantastic outcomes. Slow Light shows how the real science and the fantasy inspire each other, and projects light's incredible future. Emory physicist Sidney Perkowitz discusses how we are harnessing the mysteries of light into technologies like lasers and fiber optics that are transforming our daily lives. Science-fiction fantasies like Harry Potter's invisibility cloak are turning into real possibilities.

Light Stealer James Barclay,Edward Miller,2002-12-30 Septern chooses to ignore the war which rages outside his borders and continues to train Balaia's young mages. For his students it is the opportunity of a lifetime. For Septern, it is peace from the demands of the colleges of magic while he continues his research. He needs peace because he is close to creating the ultimate spell.

Soldier of Light John De Lancie,Tom Cool,2001-05 An evil force awakens from a million-year slumber inside Earth with the intention of destroying mankind. But its campaign is thwarted by a San Francisco sculptor and his family who are equipped with magic powers.

The Light/dark Universe James Martin Overduin,Paul S. Wesson,2008 Atomic Spectra and Radiative Transitions covers the systematics of atomic spectra, continuous spectrum radiation, and the excitation of atoms. This second edition has additional chapters on relativistic corrections in the spectra of highly charged ions, which rounds off the previous treatment. Extensive tables of oscillator strengths (both dipole and quadrupole), probabilities and cross sections of radiative transitions complete this textbook, making it invaluable also as a reference work.

Quantum Enhancement of a 4 km Laser Interferometer Gravitational-Wave Detector Sheon S. Y. Chua,2015-05-09 The work in this thesis was a part of the experiment of squeezed light injection into the LIGO interferometer. The work first discusses the detailed design of the squeezed light source which would be used for the experiment. The specific design is the doubly-resonant, traveling-wave bow-tie cavity squeezed light source with a new modified coherent sideband locking technique. The thesis describes the properties affecting the squeezing magnitudes and offers solutions which improve the gain. The first part

also includes the detailed modeling of the back-scattering noise of a traveling Optical Parametric Oscillator (OPO). In the second part, the thesis discusses the LIGO Squeezed Light Injection Experiment, undertaken to test squeezed light injection into a 4km interferometric gravitational wave detector. The results show the first ever measurement of squeezing enhancement in a full-scale suspended gravitational wave interferometer with Fabry-Perot arms. Further, it showed that the presence of a squeezed-light source added no additional noise in the low frequency band. The result was the best sensitivity achieved by any gravitational wave detector. The thesis is very well organized with the adequate theoretical background including basics of Quantum Optics, Quantum noise pertaining to gravitational wave detectors in various configurations, along with extensive referencing necessary for the experimental set-up. For any non-experimental scientist, this introduction is a very useful and enjoyable reading. The author is the winner of the 2013 GWIC Theses Prize.

Servants of the Light Kris Alexander, 2011-11 A brutal ambush in Iraq that threatens to wipe out his unit forces U.S. Army Ranger Jake McPherson to admit he possesses mental and physical powers most humans can only dream about. Using his powers exposes Jake to an ageless order of evil dedicated to spreading chaos to create a world they can rule.

Light of the Radiant Matthew Ward, 2016-11-26 Arrogance is more dangerous than a sword. At long last, there is peace between the Tressian Republic and the Hadari Empire. But it is not welcomed by all. Leaders from both realms watch their counterparts with suspicion, expecting the swift return of the centuries-long war. But mortals are not the only ones readying for strife. Deep below the Contested Lands, cultists labour to rouse ancient evils from slumber. In the skies above, the legendary serathi, handmaidens of the Radiant, have at last returned from their self-imposed exile. But why now? Once again, it falls to Edric Saran and his allies to unravel the mystery before it's too late. The Light of the Radiant has the power to change everything, but at what cost?

Light Wielder T Lait, 2013-09-01 With the Telirian light wielders growing in power the very fabric of the peace treaty between the humans and the spirits of the land was beginning to tear. As a consequence the Jelery light wielders enforcement of the law was becoming an impossible task and war once again seemed to be a foregone conclusion and hovered impatiently on the horizon. The anomaly and the keeper of the Earthen staff of knowledge was once again being forced to intervene as he had done in the past, but with his body being over two millennia old he knew that it was too frail for the task. So the time had finally come for the new anomaly to rise up and quell the unrest that was threatening to engulf the land.

Amazing Light Raymond Y. Chiao, 1996-06-13 This collection of essays by students, colleagues, and admirers of Charles Townes---who shared the Nobel Prize for Physics in 1964 for 'fundamental work in the field of quantum electronics, which has led to the construction of oscillators and amplifiers based on the laser-maser principle'--- reflects Towne's wide interests and influence, ranging from quantum optics to astrophysics, and from electrical engineering to medicine.
