**Assessment in Speech and Language Therapy** John R. Beech,Leonora Harding,2018-10-31 What assessment tests are available to speech therapists? How are they best used? Originally published in 1993, Assessment in Speech and Language Therapy was designed to guide speech therapists in choosing the most appropriate assessments for evaluation, monitoring and intervention at the time. By providing guidance on defining the issues in assessment, it shows how to make sure that the process will produce a result relevant to the therapist's own needs and those of his or her clients. The major issues involved are discussed in detail, in particular how to make sure that assessments are relevant to individual needs. This title will be invaluable to all speech therapists and clinical psychologists working in this area.

**A Guide to Evaluating Speeches** Wang Yip,2020-03-04 Evaluating speeches is not just an activity for those people that master toasts (i.e., Toastmasters) but also a way of practicing critical communication and leadership skills like listening, critical thinking and providing constructive feedback. This book will cover everything you need to know about evaluating speeches. For instance, what kind of things should you, as an evaluator, prepare before the speech? What kind of notes should you be jotting down? What percentage of the speech should you be listening to vs. writing notes about? How do you structure your evaluation effectively so that the speaker (and the audience) can learn as much as they can from your evaluation? Through speech evaluations, you will find that it can be a unique way of reflecting on your own communication and leadership abilities and a fantastic way of improving your own speeches by observing the techniques, structures and tactics that other speakers use in their speeches. You may not become a world-class speaker or presenter (or want to), but you will certainly take the first few steps to becoming a great speaker and presenter by reading this book.
