Word Play Peter Farb,2015-08-19 Why do certain words make us blush or wince? Why do men and women really speak different languages? Why do nursery rhymes in vastly different societies possess similar rhyme and rhythm patterns? What do slang, riddles and puns secretly have in common? This erudite yet irresistibly readable book examines the game of language: its players, strategies, and hidden rules. Drawing on the most fascinating linguistic studies—and touching on everything from the Marx Brothers to linguistic sexism, from the phenomenon of glossolalia to Apache names for automobile parts—Word Play shows what really happens when people talk, no matter what language they happen to be using.

Powers Ruth Herbert,Wendy Best,Julie Hickin,David Howard,Felicity Osborne,2013 The POWERS provides a quantitative means of measuring an individual's ability to produce meaningful words in natural conversation. It provides guidelines for collection of the conversation, and for analysis of the sample, scoresheets to be completed based on the analyzed sample, and worked examples of conversation data, including audio-files provided on CD. This is a versatile tool that can be used in both research and the clinical setting to analyze whether word-finding improves after a period of therapy.

Novel Techniques for Dialectal Arabic Speech Recognition
Mohamed Elmahdy,Rainer Gruhn,Wolfgang Minker,2012-02-10
Novel Techniques for Dialectal Arabic Speech describes approaches to improve automatic speech recognition for dialectal Arabic. Since speech resources for dialectal Arabic speech recognition are very sparse, the authors describe how existing Modern Standard Arabic (MSA) speech data can be applied to dialectal Arabic speech recognition, while assuming that MSA is always a second language for all Arabic speakers. In this book, Egyptian Colloquial Arabic (ECA) has been chosen as a typical Arabic dialect. ECA is the first ranked Arabic dialect in terms of number of speakers, and a high quality ECA speech corpus with accurate phonetic transcription has been collected. MSA acoustic models were trained using news broadcast speech. In order to cross-lingually use MSA in dialectal Arabic speech recognition, the authors have normalized the phoneme sets for MSA and ECA. After this normalization, they have applied state-of-the-art acoustic model adaptation techniques like Maximum Likelihood Linear

Regression (MLLR) and Maximum A-Posteriori (MAP) to adapt existing phonemic MSA acoustic models with a small amount of dialectal ECA speech data. Speech recognition results indicate a significant increase in recognition accuracy compared to a baseline model trained with only ECA data.

Speechwriting in Perspective Thomas A. Neale,2011-04 This report has been compiled for congressional speechwriters but will be informative for anyone writing a speech. Contents: (1) Intro.; (2) Writing for the Spoken Word: The Distinctive Task of the

Speechwriter; Repetition and Variation; Cadence and Balance; Sentence Variation; Imagery; (3) Audience Analysis; Demographics; Audience Size; Degree of Political Affiliation; (4) Occasion and Purpose; Persuasion; Entertainment; (5) Time of Day and Length of Speech; (6) Speech Research: (7) Resources; (8) Speech Preparation: Building Blocks: Suggested Principles; Speech Outline; Thematic Clarity; Structure; Style; Punctuation; Grammar and Syntax; (9) Speech Presentation; (10) Analysis of Lincoln¿s Farewell to His Neighbors; (11) General Observations.

Speechwriting in Perspective Thomas H. Neale,Jean M. Bowers,2003 Writing for the spoken word is a special discipline; it requires that speechwriters' products be written primarily, although not exclusively, to be heard, not read. Speeches are better cast in simple, direct and often short sentences that can be easily understood by listeners. Rhetorical devices such as repetition, variation, cadence and balance are available to, and should be used by, the speechwriter. It is important for speechwriters to analyse audiences according to factors such as age; gender; culture; profession and income level; size of audience; political affiliation, if any; and on the occasion for, or purpose of, the speech. Most effective speeches do not exceed 20 minutes in

length. After researching a topic, speechwriters must prepare an outline from which the speech will be developed. They should strive to maintain a clear theme throughout the speech. Most speeches will have a three-part structure consisting of an introduction, a body and a conclusion. The accepted style of contemporary American public address is natural, direct, low key, casual and conversational. This puts the listeners at ease and promotes a sense of community between the audience and speaker. Punctuation should reflect the sound structure of the speech, reinforcing the rhythm and pace of actual speech. Clarity of expression is as important a consideration in speech grammar as rigid adherence to the rules for written law. This book presents the essentials of speechwriting. Preface; Speechwriting in Perspective: A Brief Guide to Effective and Persuasive Communication (Thomas H. Neale); Public Speaking and Speechwriting: Selected References (Jean M. Bowers); Index.

Spoken Word Production and Its Breakdown in Aphasia Lyndsey Nickels,2015-06-12 This volume combines in-depth reviews of models of spoken word production and cognitive neuropsychological disorders of spoken word production. The first section provides a detailed discussion of the development and structure of current models of language production using data form normal subjects. It is these models that form the basis of the study and therefore the text attempts to explain their processing mechanisms and assumptions clearly. The evidence used for the development of these models is described including experimental studies and observation of patterns in naturally occurring speech errors.; The second section focuses on studies of aphasic naming disorders and discusses these disorders in terms of the model described in the first section. The emphasis is on single case

studies. These are reviewed in three chapters examining semantic errors and disorders, the range of symptoms attributed to disorders of lexical retriveal and deficits of phonological encoding. The text assumes that the reader has some familiarity with the linguistic and psychological terminology relevant to these areas and therefore is most suited to the graduate student or researcher/lecturer.

The Role of Talker Variability and Visual Speech on Word Learning in Adverse Listening Conditions Jasenia T. Hartman,2022 Word learning is a core language skill that is characterized by mapping sounds to meaning. To successfully acquire newly spoken words, listeners must accurately perceive the speech sounds found in the word form. Studies have shown that talker variability (learning from different talkers) and visual speech cues facilitate the acquisition of spoken words. While the benefits associated with talker variability and visual speech cues have been examined in ideal learning situations, it is unclear whether these cues can be useful in suboptimal learning settings, such as listening with a cochlear implant (CI) or in noise. Using two novel word learning tasks, one in quiet (Study 1) and one in noise (Study 2), this study examined the role of talker variability and visual speech on word learning in adverse listening conditions. Eighteen adults with CIs

and forty-nine adults with TH (N = 10 for Study 1, N = 39 for Study 2) were taught novel word-object associations spoken by a single talker or by six different talkers. Across both tasks, learners saw an image of the talker. However, the presence of visual cues were manipulated for Study 2. Learning was probed using a novel talker in a two-alternative force choice task. Learners' eye movements to the mouth (Study 1) and to the target object (Studies 1 and 2) were tracked over time. In both studies, talker variability did not enhance word learning for adult CI and NH listeners. Both groups were successful at acquiring newly learned words, regardless of whether they learned from the same talker or from different talkers. Compared to listeners with NH, listeners with CIs focused significantly more on the talker's mouth. In the presence of background noise, listeners with NH performed better when presented with audiovisual cues during learning than only audio cues. In summary, these outcomes suggest visual cues, but not talker variability, may facilitate learning under adverse listening conditions.

Word Play Vivian Lee Snodgrass,2013-02 Word Play is a riveting book regarding an interactive game played with words and God. Inside its pages are the clues to understanding the game.

The desired result from playing is to know God better. This book addresses confusion generated by the daily use of words without concern for their actual meanings, more specifically, the words used by Christians. It is a book about God and not religion. Some may discover the contents of Word Play strenuous. Word Play is designed to make readers think. There is a good chance your brain will hurt while reading Word Play. If so then I fulfilled my mission. Enlightenment from critical thinking opens the gateway to the heart. When there is clarity there is understanding and where there is understanding there is power. Word Play was written as a tool to access God's power through words. It is not a book to be taken lightly. Word Play has a new and different approach for understanding more regarding the power of words. Anyone who desires to know more about this power from God should read Word Play. The lessons learned took over two decades to receive. It took almost two years to write about them. Warning: The awareness resulting from reading Word Play may be overwhelming to some. This is not a book for children.
