Speed Limits Mark C. Taylor, 2014-10-28 A contemplation on “the durability of our fast-tracked, multitasked modern world . . . a stimulating cautionary report for the digital age.”—Kirkus Reviews We live in an ever-accelerating world: faster computers, markets, food, fashion, product cycles, minds, bodies, kids, lives. When did everything start moving so fast? Why does speed seem so inevitable? Is faster always better? Drawing together developments in religion, philosophy, art, technology, fashion, and finance, Mark C. Taylor presents an original and rich account of a great paradox of our times: how the very forces and technologies that were supposed to free us by saving time and labor now trap us in a race we can never win. The faster we go, the less time we have, and the more we try to catch up, the farther behind we fall. Connecting our speed-obsession with today’s global capitalism, he composes a grand narrative showing how commitments to economic growth and extreme competition, combined with accelerating technological innovation, have brought us close to disaster. Psychologically, environmentally, economically, and culturally, speed is taking a profound toll on our lives. By showing how the phenomenon of speed has emerged, Taylor offers us a chance to see our pace of life as the product of specific ideas, practices, and policies. It’s not inevitable or irreversible. He courageously and movingly invites us to imagine how we might patiently work towards a more deliberative life and sustainable world. “With panache and flashes of brilliance, Taylor, a Columbia University religion professor and cultural critic, offers a philosophically astute analysis of how time works in our era.” —Publishers Weekly

No Speed Limit Frank Owen, 2013-09-24 Hells Angels and fallen televangelist Ted Haggard. Cross-country truckers and suburban mothers. Trailer parks, gay sex clubs, college campuses, and military battlefields. In this fascinating book, Frank Owen traces the spread of methamphetamine—meth—from its origins as a cold and asthma remedy to the stimulant wiring every corner of American culture. Meth is the latest epidemic to attract the attention of law enforcement and the media, but like cocaine and heroin its roots are medicinal. It was first synthesized in the late nineteenth century and applied in treatment of a wide range of ailments; by the 1940s meth had become a wonder drug, used to treat depression, hyperactivity, obesity, epilepsy, and addictions to other drugs and alcohol. Allied, Nazi, and Japanese soldiers used it throughout World War II, and the returning waves of veterans drove demand for meth into the burgeoning postwar suburbs, where it became the mother's helper for a bored and lonely generation. But meth truly exploded in the 1960s and '70s, when biker gang cooks using burners, beakers, and plastic tubes brought their expertise from California to the Ozarks, the Southwest, and other remote rural areas where the drug could be manufactured in kitchen labs. Since then, meth has been the target of billions of dollars in federal, state, and local anti-drug wars. Murders, violent assaults, thefts, fires, premature births, and AIDS—rises in all of these have been blamed on the drug that crosses classes and subcultures like no other. Acclaimed journalist Frank Owen follows the users, cooks, dealers, and law enforcers to uncover a dramatic story being played out in cities, small towns, and farm communities across America. *No Speed Limit* is a panoramic, high-octane investigation by a journalist who knows firsthand the powerful highs and frightening lows of meth.

No Speed Limit Steven Shaviro, 2015-01-30 Accelerationism is the bastard offspring of a furtive liaison between Marxism and science fiction. Its basic premise is that the only way out is the way through: to get beyond capitalism, we need to push its technologies to the point where they explode. This may be dubious as a political strategy, but it works as a powerful artistic program. Other authors have debated the pros and cons of accelerationist politics; *No Speed Limit* makes the case for an accelerationist aesthetics. Our present moment is illuminated, both for good and for ill, in the cracked mirror of science-fictional futurity. Forerunners: Ideas First is a thought-in-process series of breakthrough digital publications. Written between fresh ideas and finished books, Forerunners draws on scholarly work initiated in notable blogs, social media, conference plenaries, journal articles, and the synergy of academic exchange. This is gray literature publishing: where intense thinking, change, and speculation take place in scholarship.

Following an executive summary, the report is presented in six chapters and five appendices.

The Life-saving Benefits of the 55 Mph National Speed Limit, 1980 An update is provided of key legislative changes that have taken place concerning the fifty-five miles-per-hour National Maximum Speed Limit (NMSL). Summary statistics through the 1978 time period are followed by summaries of the literature reviewed on the

benefits of the NMSL. An annotated bibliography of 16 studies represents various points of view and interests of the traffic safety community, and a supplementary list of references is provided. Findings of the Task Force are presented with the range of estimates for conclusions drawn. Since the 1973-4 decreases in fatalities, travel, and speed, there have been small increases for 1976-8, but the level of fatalities has not returned to pre-55 mph NMSL levels. In spite of a shortage of reliable data, it was concluded that 20,000 to 30,000 lives were saved in the 1974-1978 period.
