**Need for Speed** Brian Kelleher, 2014-02-25 Buckle up . . . Tobey Marshall is a mechanic struggling to save his family-owned garage. While he and his team skillfully build and race muscle cars on the side, it's not enough to keep the doors open. He reluctantly partners with his longtime rival, a wealthy, arrogant ex-professional racer, Dino Brewster. But just as a major sale to car broker Julia Bonet looks as though it will save Tobey's business, a disastrous, unsanctioned race results in Dino framing Tobey for manslaughter. Two years later, Tobey is fresh out of prison and eager for revenge. To take Dino down, he plans to enter the high-stakes De Leon race—the biggest contest of underground racing in the world—to get the money to reclaim his family business and expose Dino's deception. But getting there won't be easy, as Tobey must run a high-octane, pedal-to-the-floor

gauntlet, dodging cops coast to coast and dealing with fallout from a dangerous bounty on his car. Luckily, with his team—and the surprisingly resourceful Julia—on his side, he just might defy the odds . . .

Ultimate Speed Samuel Hawley, Craig Breedlove, 2018-10-02 An L.A. hot rodder with a high school education, a family to support and almost no money, Craig Breedlove set out in the late 1950s to do something big: harness the thrust of a jet in a car. With a growing obsession that would cost him his marriage, he started building in his dad's garage. The car's name: Spirit of America. Through perseverance and endless hard work, Craig completed Spirit and broke the land speed record on the Bonneville Salt Flats, setting a new mark of 407 mph in 1963. In the early 1970s he turned to rockets and set an acceleration record at Bonneville that stands to this day. He built a jet car in the 1990s, Spirit of

America—Sonic Arrow, to go head-to-head against Britain's ThrustSSC to be the first to Mach One. Craig's subsequent crash at 675 mph remains the fastest in history. Even today, at the age of 80, he is going strong with plans for yet another Spirit of America racer. The ultimate goal: 1,000 mph. *Ultimate Speed* is the authorized biography of Craig Breedlove, a candid revelation of one of motorsports' most interesting figures based primarily on countless hours of interviews with Craig and dozens of people connected to his life.

*Balance and Ageing* Kimberley Van Schooten, Sjoerd M. Bruijn, 2021-07-01

The Physics of Nascar Diandra Leslie-Pelecky, 2008-02-14 A physicist explores the science of speed racing and the #1 spectator sport in America in the perfect gift for both NASCAR and science fans. Every NASCAR fan—at one time or another—asks the same question: Why isn't my favorite driver winning? This is your chance to discover how much more there is to NASCAR than "Go fast, turn left and don't crash." If you've ever wondered why racecars don't have mufflers, how "bump drafting" works, or what in the world "Let's go up a pound on the right rear and add half a round of wedge" means, *The Physics of NASCAR* is for you. In this fast-paced investigation into the adrenaline-pumping world of NASCAR, a physicist with a passion uncovers what happens when the rubber hits the road and 800-horsepower vehicles compete at 190 miles per hour only inches from one another. Diandra Leslie-Pelecky tells her story in terms anyone who drives a car—and maybe occasionally looks under the hood--can understand.

How do drivers walk away from serious crashes? How can two cars travel faster together than either car can on its own? How do you dress for a 1800°F gasoline fire? In simple yet detailed, high-octane prose, this is the ultimate thrill ride for armchair speed demons, auto science buffs, and NASCAR fans at every level of interest. Readers, start your engines.

*Winning Autocross Techniques* Ross Bentley, Per Schroeder, 2009-01-10 MOTOR RALLYING / RALLY DRIVING. Autocross is the easiest, safest, and least expensive way to get into motorsports. Anyone with a helmet and a car can do it. Of course, it doesn't hurt to have some driving skills, which is where this book comes in. As a veteran racer and professional driving coach, Ross Bentley knows what it takes to compete and to win, and he gives readers the benefit of that knowledge in *Winning Autocross Techniques*. The first in the *Speed Secrets* series to address a specific form of racing, this volume focuses on the skills critical to autocross success: car handling and driver skill at high speeds on unique courses. Bentley clearly details the steps and techniques that help autocross drivers maintain control and dominate a course at speed. Though specific to autocross, and essential to mastering its particular challenges, his advice and instruction in this book will prove invaluable to drivers who go on to road racing as well.

**Speed Secrets 6** Ross Bentley, 2007-01-15 With racing, as with almost any pursuit, being the best entails having a clear idea of what the best is--having a mental model that instructs and motivates and inspires. That's where Speed Secrets 6 comes in. Drawing on his extensive experience as a competitive driver and coach, author Ross Bentley helps the aspiring professional and the ambitious amateur develop the mental model that is essential for successful racing. His book reviews the techniques needed to drive fast, win races, and build a career as a professional race driver--and then, more importantly, schools readers in the process of turning this clear mental picture into racing perfection.

**Mad for Speed** Elsa A. Nystrom, 2013-06-06 This book covers Joan Newton Cuneo's life, and her roles (from 1905 to 1915) as the premier female racer in the United States and spokeswoman for women drivers and good roads. Beginning with her family history and marriage to Andrew Cuneo, it traces her life in New York society, the birth of her children, and Joan's growing interest in automobile touring and racing and partnership with Louis Disbrow, her racing mechanic. The book covers Joan's experiences in three Glidden Tours, including her notes on the 1907 tour, her first races, and her rivals. It also looks at the growth

and change of automobile culture and the battles for control of racing among the American Automobile Association, the Automobile Club of America, and the American Automobile Manufacturers Association—which ended in banishing women racers shortly after Joan’s greatest racing victories at New Orleans (in 1909). The book then follows Joan’s attempts to continue racing, the end of her marriage, her move to the Upper Peninsula, and her remarriage and death. The book also includes a chapter on her female rivals in racing and touring.

**Start Your Engines** Jim Parker, 2005 Start Your Engines: Developing Driving and Racing Games is a unique book that will teach readers everything they need to set up different types of road conditions, create opponents, set up road hazards, generate weather conditions, manage collisions,

and much more. Not only will readers end up with the knowledge and tools they need to create driving and racing games, they get a full-featured, playable racing game that they can expand and customize with the skills learned in the book. The book shows readers how to develop live-action, interactive racing games with a unique three-tiered approach. Readers will start off by learning how to build a model for a racing game and then apply the physics to create a simple 2D (flat) game while learning how to create a variety of vehicles, race opponents, and terrain. In tier two, readers learn how to go from 2D to 3D with the same game concepts illustrating how to take the same basic idea for a game (and gameplay) and use modeling tips and tricks to begin customizing features. In the final tier, the author takes the concepts of 3D driving games to Mars with data modeled from real Mars terrain. Readers will create a dune buggy race on the planet of Mars and learn to create cool racing action at a bizarre and treacherous location.
