Coates's Herd Book Henry Strafford,1907

American Pandemic Nancy Bristow,2012-05-01 Between the years 1918 and1920, influenza raged around the globe in the worst pandemic in recorded history, killing at least fifty million people, more than half a million of them Americans. Yet despite the devastation, this catastrophic event seems but a forgotten moment in our nation's past. American Pandemic offers a much-needed corrective to the silence surrounding the influenza outbreak. It sheds light on the social and cultural history of Americans during the pandemic, uncovering both the causes of the nation's public amnesia and the depth of

the quiet remembering that endured. Focused on the primary players in this drama--patients and their families, friends, and community, public health experts, and health care professionals--historian Nancy K. Bristow draws on multiple perspectives to highlight the complex interplay between social identity, cultural norms, memory, and the epidemic. Bristow has combed a wealth of primary sources, including letters, diaries, oral histories, memoirs, novels, newspapers, magazines, photographs, government documents, and health care literature. She shows that though the pandemic caused massive disruption in the most basic patterns of American life, influenza did not create long-term social or cultural change, serving instead to reinforce the status quo and the differences and disparities that defined American life. As the crisis waned, the pandemic slipped from the nation's public memory. The helplessness and despair Americans had suffered during the pandemic, Bristow notes, was a story poorly suited to a nation focused on optimism and progress. For countless survivors, though, the trauma never ended, shadowing the remainder of their lives with memories of loss. This book lets us hear these long-silent voices, reclaiming an important chapter in the American past.

The Smile of Tragedy: Nietzsche and the Art of Virtue ,

Eating Grass Feroz Khan,2012-11-07 The history of Pakistan's nuclear program is the history of Pakistan. Fascinated with the new nuclear science, the young nation's leaders launched a nuclear energy program in 1956 and consciously interwove nuclear developments into the broader narrative of Pakistani nationalism. Then, impelled first by the 1965 and 1971 India-Pakistan Wars, and more urgently by India's first nuclear weapon test in 1974, Pakistani senior officials tapped into the country's pool of young nuclear scientists and engineers and molded them into a motivated cadre committed to building the 'ultimate weapon.' The tenacity of this group and the central place of its mission in Pakistan's national identity allowed the program to outlast the perennial political crises of the next 20 years, culminating in the test of a nuclear device in 1998. Written by a 30-year professional in the Pakistani Army who played a senior role formulating and advocating Pakistan's security policy on nuclear and conventional arms

control, this book tells the compelling story of how and why Pakistan's government, scientists, and military, persevered in the face of a wide array of obstacles to acquire nuclear weapons. It lays out the conditions that sparked the shift from a peaceful quest to acquire nuclear energy into a full-fledged weapons program, details how the nuclear program was organized, reveals the role played by outside powers in nuclear decisions, and explains how Pakistani scientists overcome the many technical hurdles they encountered. Thanks to General Khan's unique insider perspective, it unveils and unravels the fascinating and turbulent interplay of personalities and organizations that took place and reveals how international opposition to the program only made it an even more significant issue of national resolve. Broken Trust Samuel P. King, Randall W. Roth, 2006-01-31 Princess Bernice Pauahi Bishop was the largest landowner and richest woman in the Hawaiian kingdom. Upon her death in 1884, she entrusted her property--known as Bishop Estate--to five trustees in order to create and maintain an institution that would benefit the children of Hawai'i: Kamehameha Schools. A century later, Bishop Estate controlled nearly one out of every nine acres in the state, a concentration of private land ownership rarely seen anywhere in the world. Then in August 1997 the unthinkable happened: Four revered kupuna (native Hawaiian elders) and a professor of trust-law publicly charged Bishop Estate

trustees with gross incompetence and massive trust abuse. Entitled Broken Trust, the statement provided devastating details of rigged appointments, violated trusts, cynical manipulation of the trust's beneficiaries, and the shameful involvement of many of Hawai'i's powerful. No one is better qualified to examine the events and personalities surrounding the scandal than two of the original Broken Trust authors. Their comprehensive account together with historical background, brings to light information that has never before been made public, including accounts of secret meetings and communications involving Supreme Court justices.

Lignins ,2012-06-25 Lignins are nature's aromatic polymers and are the second most abundant organic constituent of the biosphere next to cellulose. Lignification mainly occurs in the walls of terrestrial vascular plants, mainly in the secondarily thickened cells of supportive or conductive tissues, which thus acquire novel properties. This new volume of Advances in Botanical Research gives a special emphasis to the bioengineering of these enigmatic polymers. It is divided in nine chapters containing up-to-date reviews by expert groups in their field. The Socratic Classroom Sarah Davey Chesters,2012-09-13 This book provides a framework for a collaborative inquiry-based approach to teaching and learning suitable not only for formal educational settings such as the school

classroom but for all educational settings. For teachers, educationalists, philosophers and philosophers of education, The Socratic Classroom presents a theoretical as well as practical exploration of how philosophy may be adopted in education. The Socratic Classroom captures a variety of philosophical approaches to classroom practice that could be broadly described as Socratic in form. There is an exploration of three distinct approaches that make significant contributions to classroom practice: Matthew Lipman's Community of Inquiry, Leonard Nelson's Socratic Dialogue, and David Bohm's Dialogue. All three models influence what is termed in this book as 'Socratic pedagogy'. Socratic pedagogy is multi-dimensional and is underpinned by 'generative, evaluative, and connective thinking'. These terms describe the dispositions inherent in thinking through philosophical inquiry. This book highlights how philosophy as inquiry can contribute to educational theory and practice, while also demonstrating how it can be an effective way to approach teaching and learning. Audience This publication is suited to educators, teacher educators, philosophers of education and philosophers in general. It has a theoretical and practical focus, making it truly interdisciplinary.
