*The Rock, the Curse, and the Hub* Randy Roberts, 2005 The Rock, the Curse, and the Hub is a collection of original essays about the people and places of Boston sports that live in the minds and memories of Bostonians and all Americans. Each chapter focuses on the games and the athletes, but also on which sports have defined Boston and Bostonians.

Hub Heroes: Revealing Profiles of Boston Sports Legends...and More Christopher Daly, 2018-07-24 For anyone who writes biographically about these heroes, it's vital to provide some little-known, surprising facts to give the reader a better idea of what they were really like and give a fuller picture of their lives. I hope I have succeeded in that regard. This book is a collection of no-holds-barred profiles and commentary drawn mostly from my interviews--many one-on-one--with legendary athletes, as well as one iconic broadcaster. I have added interesting facts gleaned from historical research to bring these heroes into sharper focus. In summary, this book is a combination of memoir, biography, and sports history. --from the Introduction to Hub Heroes

in the context of sport. Managing Sport Facilities and Major Events Eric C. Schwarz,Hans

This Is Our City Tony Massarotti,2023-08-22 A celebration of the last two decades of sports success in Boston from the co-host of the #1 sports radio show in New England Boston is a unique sports city. Unlike New York, Los Angeles, or Chicago, New Englanders' loyalties are not divided among competing franchises; in the four major American sports, the city has one team each: the Red Sox, the Celtics, the Bruins, and the Patriots. And, as any Boston fan will tell you, that loyalty runs deep. Sports just seem to mean more in New England. Over the last 20 years, those fans have been blessed with an extraordinary run of success, including 12 championships, six runners-up, and many more years of heated contention. In the 21st century, Boston became Titledtown. According to Tony Massarotti, longtime Boston sports columnist and host of the #1 sports radio show in New England for the past ten years, this is not a coincidence. Massarotti's *This Is Our City* paints a portrait of the last 20 years in Boston sports, showing how one team's success has led to the next--how they have fed off each other, tried to one-up one another, and have supported each other. This is an account of an era where successes and failures stitched together the region, all playing out against major events such as 9/11 and the devastating Boston Marathon--which led to a memorably profane speech by David Ortiz, who declared, This is our f@#king city! Massarotti's *This Is Our City* is a valentine to Boston sports and will be loved by those fans, wherever they now live.

Living in Smart Cities Thomas Menkhoff,Siew Ning Kan,Hans-Dieter Evers,Yue Wah Chay,2017-12-28 Cities around the world are becoming increasingly popular as economic powerhouses and magnets for migrants from rural and suburban areas. All big cities in First and Third World countries as well as emerging markets such as New York, London, Tokyo, Paris, Shanghai, Hong Kong, Singapore, New Dehli, Jakarta etc. have to cope with high population density and serious challenges such as air pollution or traffic congestion.

How do we pack more people into big cities and yet continue to realise a high quality of life? How do we plan, create and manage 'good cities' which are safe, spacious, green, connected, fair and resilient? How can cities create economic wealth while still fulfilling the vision of sustaining our Green Planet? What are best practice designs and innovative technical smart city solutions which could be leveraged to tackle these challenges and how can they be successfully commercialised? These are some of the questions the reader addresses from a multi-disciplinary perspective with special reference to Singapore whose development from regional entrepôt to First World Metropolis continues to impress business and societal leaders around the world. The book's contents are broadly structured according to the following aspects: (i) definition and taxonomy of innovative & sustainable cities, including its core characteristics and how they create value in terms of innovativeness and sustainability; (ii) governance, planning and selected design principles of innovative & sustainable cities and how they pan out with regard to livability and sustainability; and (iii) in-depth study of selected smart city dimensions such as governance, clustering, connectivity, mobility, ageing, water, sports, and safety.

**Rebound!** Michael Connelly, 2010-11-10 In the mid-1970s, the city of Boston entered a period of upheaval on both its historic cobblestone streets and its legendary parquet basketball court. The Boston Celtics' long dominance of the NBA came to an abrupt end, and the city's image as a hub of social justice was shaken to its core. When the federal courts declared, in 1974, that the city was in violation of school desegregation rulings and would need to institute a busing program, Boston became deeply polarized. Then, just as the city was struggling to pull itself out of economic and social turmoil, the Boston Celtics drafted a forward from Indiana State named Larry Bird. Upon the arrival of the "Hick from French Lick" to Boston in 1979, the fates of team and city were reborn. Pride, championships, reduced crime, and an economic boom re-emerged in Boston. In *Rebound!*, author Michael Connelly chronicles these parallel but intertwining worlds. It is an account of a city in financial, moral, and social decline brought back to life by the re-emergence of the Boston Celtics dynasty and the return of hope, purpose, and pride to "Hub of the Universe." Interviews with city officials, former players, and others on the frontlines provide a fascinating exploration into this tumultuous time.

**The Routledge Handbook of Sport and Sustainable Development** Brian P. McCullough, Timothy Kellison, E. Nicole Melton, 2022-01-29 The Routledge Handbook of Sport and Sustainable Development is a comprehensive and powerful survey of the ways in which sport engages with its social, environmental, and ethical responsibilities. It considers how sport can use its unique profile and platform to influence the attitudes of sport fans and consumers to promote positive social and environmental action around the world and to contribute to sustainable development, perhaps the most important issue of our time. The book is structured around the 17 UN Sustainable Development Goals, with a section devoted to each goal that contains chapters reviewing key theory and current research, measurement and evaluation issues, and the application of current knowledge in real-world development situations. Drawing on research and expertise from management,

sociology, development studies, psychology, and other disciplines, the book examines the role that sport must play in areas such as health and well-being, poverty, education, gender equality, decent work, responsible consumption, and climate action. Representing a keynote work on the wider social responsibilities of sport as both an industry and sociocultural activity, this is essential reading for any advanced student or researcher working in sport development, sport management, sport sociology, event studies, development studies, or environmental studies, and for any development practitioner or sport management professional looking to understand how to achieve positive social change in and through sport.

**Thirty Years Hundred Stories** Liu Fook Thim, 2016-04-29 Engineers play a vital role in nation building. Since independence, they have been driving Singapore's efforts in industrialisation. Their vision, creativity and resilience gave Singapore a competitive edge, enabling a meteoric rise from Third World to First in one generation. Going forward, the government wants to make Singapore a e;Smart Nation; - a nation where people live meaningful and fulfilled lives, enabled seamlessly by technology, offering exciting opportunities for all. Engineers are vital in making this happen. This book captures 100 stories of engineering accomplishments in Singapore over a span of 30 years as told by the Nanyang Technological Institute (now known as NTU) Pioneer Engineering Class of 85. They demonstrate the breadth and depth of the engineering landscape in our nation. If this book inspires some to take up an engineering career, it will have achieved its purpose.

Sport Science and Studies in Asia Michael Chia, Jasson Chiang, 2010 Sport Science and Studies in Asia encourages readers to be reflective practitioners, as students or researchers, or thinkers of sports, to be independent seekers of future sport knowledge, and yet mindful and grounded in a full knowledge and awareness of the social, cultural and country-specific nuances of sports. It invites discussions and debates on a diversity of topics covered, and is suitable text for undergraduate and graduate study of sports in Asia. This publication hopes to ?light the fuse? that will fuel enthusiasm of sports-associated outcomes as well as heighten sport interest among the more discerning consumers of sport, result in more extensive research and development in sports, generate greater spin-offs in sport innovation in terms of new training approaches and sport products, and a greater appreciation that sports and human kind are inseparable.

The second part investigates a wide range of managerial aspects including the bidding process, finance, the prominent role of young people on the organising committees and as volunteers, the role of media and sponsors, and the distinctive competition structure. *Sport, Events, Tourism and Regeneration* Nicholas Wise, John Harris, 2017-02-17 Investments in sport, events and tourism in cities and wider regions are part of nascent regeneration strategies linked to transitioning economic bases and place images. While it is important to consider physical regeneration, there is a range of subsequent benefits and opportunities brought about through regeneration that considers social impacts, communities and how investments and developments influence how people interact in transformed spaces. This book brings together a collection focusing on the diverse range of approaches and perspectives of regeneration. Twelve chapters outline and bring together critical perspectives of regeneration from scholars in different parts of the world. This collection critically assesses some of the key factors impacting upon regeneration initiatives in relation to sport, events and tourism. By doing so, this book assesses if new opportunities have arisen from developments, increasing the demands and needs of locals and tourists, or if transformations result in exclusion - thus challenging who regeneration is for. This book will be valuable reading for students and academics interested in tourism studies, events planning, sport and leisure studies or development studies, as well as the wider social sciences.
