Japanese Imperialism: Politics and Sport in East Asia J.A. Mangan, Peter Horton, Tianwei Ren, Gwang Ok, 2017-10-11 This cutting edge collection presents a political reading of the power of modern sport in Asia. Providing an interdisciplinary study of political and cultural tensions in Asia, past and present, through the key case-study of sport, it illuminates the complex practices and legacies of Japanese imperialism across East and Southeast Asia through the 20th century and beyond. Focusing on the deep background to contemporary dynamics of intraregional tensions, it examines sport both as a tool of imperialism and as an agent of reconciliation as the region gears up to the 2020 Olympics in Tokyo. Offering a unique contribution to East Asian Studies, Colonial and Postcolonial Studies and Sport Studies, this work represents key reading for students and scholars of East Asian studies, International Politics and Sports Diplomacy.

Modern Sports in Asia Younghan Cho, Charles Leary, 2016-04-14 Modern sports were introduced to Asia in the late nineteenth century as an innovation from the West, concurrently with the development of modern society in Asia. This book traces the historical developments of sporting cultures in Asia in specific local contexts – including Singapore, China, Myanmar, Taiwan, the Philippines, and India – and their intersections with larger social developments of colonialism, postcolonialism, nationalism, and the building of modern Asia and its place in a globalized world. The case studies herein present the social history of modern team sports with standardized rules such as basketball and cricket, and less familiar sports such as fives and chinlone, as they vacillate between global and local perspectives. This book also shows that modern sports have had an important influence on the makeup of everyday life in Asia, and the essays here also consider sports' impact on gender, body culture, and celebrity culture, among other concerns. This book painstakingly bridges the gaps between Asian Studies and Sports Studies in a way that reflects the historicity and multiplicity of sports in Asian societies. By adopting multi-disciplinary approaches, this book innovatively offers significant intersection between sociology, cultural studies and Asian studies of sport in Asia. This book was published as a special issue of *Sport in Society*.

Asian American Sporting Cultures Stanley I. Thangaraj, Constancio Arnaldo, Christina B. Chin, 2016-04-05 Delves into the long history of Asian American sporting cultures, considering how identities and communities are negotiated on sporting fields. Through a close examination of Asian American sporting cultures ranging from boxing and basketball to spelling bees and wrestling, the contributors reveal the intimate connection between sport and identity formation. Sport plays a special role in the processes of citizen-making and of the policing of national and diasporic bodies. It is thus one key area in which Asian American stereotypes may be challenged, negotiated, and destroyed as athletic performances create multiple opportunities for claiming American identities. This volume incorporates work on Pacific Islander, South Asian, and Southeast Asian Americans as well as East Asian Americans, and explores how sports are gendered, including examinations of Asian American men's attempts to claim masculinity through sporting cultures as well as the "Orientalism" evident in discussions of mixed martial arts as practiced by Asian American female fighters. This American story illuminates how marginalized communities perform their Americanness through co-ethnic and co-racial sporting spaces.

Sport in South Asian Society Boria Majumdar, J. A. Mangan, 2005 Linking sport to the emergence and growth of modern Asian society this collection of articles offers a clear, original and highly readable history of politics, culture and sport in the world's most populous region.

Media, Sport, Nationalism Tianwei Ren, Keiko Ikeda, Chang Wan Woo, 2019-03-01 East Asia is increasingly prominent within global sport. In the short period between 2018 and 2022 it will have held two Winter and one Summer Olympics, and the Rugby World Cup for good measure. This is not a sudden development. It has been in train for some time, although many scholars, especially in Europe and North America, have been focussed primarily on sport in their own countries and regions. J.A. Mangan, who for decades has been looking closely at sport in East Asia while encouraging others to do likewise, has made a major contribution to knowledge and understanding of a once under-appreciated subject. This excellent collection in his honour analyses the key interwoven elements of sport, media and nation in China, Japan and South Korea. It demonstrates how the structure and practice of sport connects in myriad ways with its representation, not least with regard to national narratives, international rivalries and transnational trends. It is a book that does signal justice both to East Asian Studies and to the academic who recognised the importance of sport to that field, and who has done so much to ensure that the region is centrally placed within any contemporary analysis of the world of sport. David Rowe, Emeritus Professor of Cultural Research, Institute for Culture and Society, Western Sydney University Professor Mangan is the master dissector of the connections between sport and politics, geopolitics and nationalism across multiple Asian contexts. A collection of essays in honour of his long service to academic understandings of these fields is well deserved, and the editors and contributors to this volume have served up a worthy tribute. Showcasing new work by a stellar cast of China, Japan and Korea experts, in combination the papers collected here yield valuable insights into the issues of nation building, identity, media representation and sport which have been the subject of Professor Mangan's pioneering work over the past several decades. No one has done more to put East Asia on the map in terms of academic research on the manifold socio-political dimensions of sport, and this superbly constructed volume orchestrated by rising Tianwei Ren confirms that we neglect this fascinating, complex region at our peril. Jonathan Sullivan, Director of China Policy Institute and China Soccer Observatory, Associate Professor, School of Politics and IR. University of Nottingham

The Ideals of Global Sport Barbara J. Keys,2019-02-15 Sport has the power to change the world, South African president Nelson Mandela told the Sporting Club in Monte Carlo in 2000. Today, we are inundated with similar claims—from politicians, diplomats, intellectuals, journalists, athletes, and fans—about the many ways that international sports competitions make the world a better place. Promoters of the Olympic Games and similar global sports events have spent more than a century telling us that these festivals offer a multitude of goods: that they foster friendship and mutual understanding among peoples and nations, promote peace, combat racism, and spread democracy. In recent years boosters have suggested that sports mega-events can advance environmental protection in a world threatened by climate change, stimulate economic growth and reduce poverty in developing nations, and promote human rights in repressive countries. If the claims are to be believed, sport is the most powerful and effective form of idealistic internationalism on the planet. *The Ideals of Global Sport* investigates these grandiose claims, peeling away the hype to reveal the reality: that shockingly little evidence underpins these endlessly repeated assertions. The essays, written by scholars from many regions and disciplines and drawn from an exceptionally diverse array of sources, show that these bold claims were sometimes cleverly leveraged by activist groups to pressure sports bodies into supporting moral causes. But the essays methodically debunk sports organizations' inflated proclamations about the record of their contributions to peace, mutual understanding, antiracism, and democracy. Exposing enduring shortcomings in the newer realm of human rights protection, from the 1980 Moscow Olympic Games to Brazil's 2014 World Cup and the 2016 Rio Olympics, *The Ideals of Global Sport* suggests that sport's idealistic pretensions can have distinctly non-idealistic side effects, distracting from the staggering financial costs of hosting the events, serving corporate interests, and aiding the spread of neoliberal globalization.
