The Economics of Intercollegiate Sports Randy R. Grant, John Leadley, Zenon X. Zygmunt, 2008 Does the National Collegiate Athletic Association (NCAA) exploit student athletes? Should athletes be paid? Does Title IX unfairly discriminate against men's sports? Are the salaries of head coaches excessive? Why is there so much cheating in college sports? Should the sports department be subsidized by the university? Why do universities place so much emphasis on athletics? The above are just some of the questions raised in this sports economics textbook specially designed to teach undergraduate students about the college sports industry. The book focuses on the unique cartel structure of the NCAA and its member institutions to shed light on the labor market for college athletes and coaches; the tension between athletics and academics; the finance of athletic departments; the role of the media and commercialization of college sports; race, gender, and legal issues; and the desirability and plausibility of reform. The book reinforces the economic analysis with a variety of examples of recent events and can be used as either a primary or secondary text.

Waterbrook,Matthew Gammons,2020-04-16 This exciting, user-friendly text covers everything sports medicine and emergency clinicians need to know when encountering sports-related injuries and trauma, whether on the field or in the office. Divided into eight thematic sections, all aspects of musculoskeletal and other trauma care are described in detail, with each chapter including key points for quick reference. The opening section presents general approaches to sports-related trauma, from initial evaluation and acute management to stabilization, anesthesia and imaging. The different types of fractures and dislocations, as well as musculoskeletal healing complications, are covered in part two. The next three sections then take in-depth looks at bone and joint trauma in the upper extremity, lower extremity and axial skeleton, respectively. Soft tissue and other sports-related trauma comprise parts six and seven - from tendons, ligaments, nerves and more to chest, head and facial injuries. The final and largest section presents sports-specific injuries, covering more than 30 individual and team activities from baseball, basketball and hockey to swimming, sailing and triathlon. Throughout, copious figures, photographs and tables enhance and advance the content for a complete, well-rounded examination of the field. Comprehensive but not complex, Sports-related Fractures, Dislocations and Trauma is a practical, high-yield manual for sports medicine and emergency care specialists, primary care physicians and any other professionals caring for athletes both on the field and in the office.

Challenged by Coeducation Leslie Miller-Bernal,Susan L. Poulson,2007-01-22

Challenged by Coeducation details the responses of women's colleges to the most recent wave of Women's colleges originated in the mid-nineteenth century as a response to women's exclusion from higher education. Women's academic successes and their persistent struggles to enter men's colleges resulted in coeducation rapidly becoming the norm, however. Still, many prestigious institutions remained single-sex, notably most of the Ivy League and all of the Seven Sisters colleges. In the mid-twentieth century colleges'

concerns about finances and enrollments, as well as ideological pressures to integrate formerly separate social groups, led men's colleges, and some women's colleges, to become coeducational. The admission of women to practically all men's colleges created a serious challenge for women's colleges. Most people no longer believed women's colleges were necessary since women had virtually unlimited access to higher education. Even though research spawned by the women's movement indicated the benefits to women of a room of their own, few young women remained interested in applying to women's colleges. Challenged by Coeducation details the responses of women's colleges to this latest wave of coeducation. Case studies written expressly for this volume include many types of women's colleges-Catholic and secular; Seven Sisters and less prestigious; private and state; liberal arts and more applied; northern, southern, and western; urban and rural; independent and coordinated with a coeducational institution. They demonstrate the principal ways women's colleges have adapted to the new coeducational era: some have been taken over or closed, but most have changed by admitting men and thereby becoming coeducational, or by offering new programs to different populations. Some women's colleges, mostly those that are in cities, connected to other colleges, and prestigious with a high endowment, still enjoy success. Despite their dramatic drop in numbers, from 250 to fewer than 60 today, women's colleges are still important, editors Miller-Bernal and Poulson argue. With their commitment to enhancing women's lives, women's colleges and formerly women's colleges can serve as models of egalitarian coeducation.
