K Morrison

Fractal Analysis for Natural Hazards Giuseppe Cello, Bruce D. Malamud, 2006 In the Earth Sciences, the concept of fractals and scale invariance is well-recognized in many natural objects. However, the use of fractals for spatial and temporal analyses of natural hazards has been less used (and accepted) in the Earth Sciences. This book brings together twelve contributions that emphasize the role of fractal analyses in natural hazard research, including landslides, wildfires, floods, catastrophic rock fractures and earthquakes. A wide variety of spatial and temporal fractal-related approaches and techniques are applied to 'natural' data, experimental data, and computer simulations. These approaches include probabilistic hazard analysis, cellular-automata models, spatial analyses, temporal variability, prediction, and self-organizing behaviour. The main aims of this volume are to present current research on fractal analyses as applied to natural hazards, and to stimulate the curiosity of advanced Earth Science students and researchers in the use of fractals analyses for the better understanding of natural hazards.

Indian Army List January 1919 - Volume 3 Army Headquarters, India, 2012-02-06 Volume 3 of 4. The January and July issues of the Indian Army List contain not only the distribution of officers on the active list of the Army in India, including officers of British army regiments, battalions etc stationed in India, but are supplemented by the addition of Orders of Knighthood, Honours and Awards, including Foreign Orders, by the non-effective officer list and the War Services of officers of the Indian Army. Details of each officer include dates of birth (except for wartime commissioned officers), date of first commission, of appointment to the Indian Army and dates of promotion. Officers are grouped according to their rank and by seniority within that rank, and are again shown under their regiments/battalions. In the case of British units, their date of arrival in India is shown, and with Indian units their date of formation and changes in title since, plus details of the backgrounds of men recruited, e.g. Sikhs, Punjabis, Dogras, Rajputs, etc. This army list also includes all native Viceroy Commissioned Officers - Subadar Majors, Subadars and Jemadars - and their war services, Major HQs and their staffs, divisional and brigade commanders and their staffs, schools, colleges, Administrative Departments of the Army are all shown. Non-regular Indian Defence Force units such as 22nd Bengal and North-Western railway Battalion, and the Indian Army Reserve of Officers are all there, along with British Warrant Officers serving in departments of the Indian Army. In 1914 there were 116 Indian and 10 Gurkha Regiments, all with one battalion apart from the cavalry, 32 Indian and one Gurkha regiment had been formed and the majority of the original regiments had raised second and sometimes third battalions. This splendid four-volume work reflects the tremendous contribution made by the Indian Army to the Empire's war effort. A full index is included.

The End of the Concessionary Regime Brandon Wolfe-Hunnicut, 2011 This dissertation analyzes the historical process that culminated in the 1972 nationalization of the Iraq Petroleum Company (IPC) -- a consortium that included four of the world's largest and most powerful corporations. I draw on IPC archives, recently declassified U.S. Government documents, and the Arab press to trace the impact of Iraq's 1958 Free Officers' Revolution on IPC interests in Iraq. I show that the Revolution set in motion a process of institutional development that resulted in the complete nationalization of the Iraqi oil industry at a relatively early date, and I emphasize the agency of a particular group of Western-trained Iraqi technical experts in producing this outcome. Moreover, I examine U.S and IPC efforts to counter Iraq's radical movements and offer an original interpretation of the relationship between the American government and the international oil industry. I show that the Iraqi challenge to the IPC undermined the stability of an implicit corporatist bargain between the U.S. State Department and the major American oil companies, and that the breakdown of this relationship was part of a larger crisis of American hegemony in the early 1970s. In so doing, I reveal powerful underlying factors that continue to drive the historical encounter between the U.S. and the Middle East.
