Shermit's Adventure to Sprinkle Island Painted Daisies Inc.

Staff, Katherine Borgatti, 2010-05 Shermit the hermit crab and his friend Primo the shrimp discover a treasure map that leads them to Sprinkle Island.

Pragmatics at Work María Pilar Navarro Errasti, Rosa Lorés Sanz, Silvia Murillo Ornat, 2004 This volume is a collection of eight articles on the general topic of translation. The common element running through them all is the analysis of samples of tourist literature and their translations, from a pragmatic point of view. The languages concerned are mainly English and Spanish, but examples of German and French texts are also included. The theoretical approaches are multifaceted. Relevance theory, systemic-functional linguistics and discourse analysis are some of the theoretical standpoints taken as a background. The book covers phenomena as varied as translation quality assessment, audience design and perlocutionary effects, dealing also with more specific features like thematic structure, inference and propositional meaning, discourse markers and grammatical metaphor in order to provide a wide range of analyses for the specialised reader.

Landscapes and Landforms of the Lesser Antilles Casey D.

Allen,2017-07-19 This book focuses on the highly touristed, but surprisingly under-researched Lesser Antilles region. After offering a brief overview of the region's geologic and tectonic history, as well as its basic climatology, subsequent chapters then discuss each island's (or island set's) geomorphology and geology, and how the settlement history, tourism, and hazards have affected their individual landscapes. Written by regional experts and replete with up-to-date information, stunning color imagery, and beautiful cartography (maps), it is the only comprehensive, scientific evaluation of the Lesser Antilles, and serves as the region's definitive reference resource. Accessible to non-experts and amateur explorers, the book includes in-depth discussions and reference sections for each island/island set. Usable as both a textbook and guidebook, it offers readers a straightforward yet detailed assessment of an interesting and intriguing – but often-overlooked and under-appreciated – locale.

Routledge Handbook of Memory and Reconciliation in East Asia Mikyoung Kim, 2015-10-05 Decades after the end of the World War II East Asia continues to struggle with lingering animosities and unresolved historical grievances in domestic, bilateral and regional memory landscapes. China, Japan and the Korea share a history of inter- and intra-violence, self-other identity construction and diametrically opposed interpretations of the past. Routledge Handbook of Memory and Reconciliation in East Asia offers a complete overview of the challenges of national memory and ideological rivalry for reconciliation in the East Asian region. Chapters provide authoritative analyses of contentious issues such as comfort women, the Nanjing massacre, history textbook controversies, shared heritage sites, colonial rule, territorial disputes and restitution. By interweaving memory, human rights and reconciliation the contributors actively explore real prospects of redressing past wrongs and achieving peaceful coexistence at personal as well as governmental levels. Bringing together an international team of experts, this book is an essential read for students and scholars of East Asian studies, anthropology, gender

studies, history, international relations, law, political science, and sociology, and for those interested in memory and reconciliation issues.

Historical Dictionary of Malaysia Ooi Keat Gin,2017-12-18

Malaysia is one of the most intriguing countries in Asia in many respects. It consists of several distinct areas, not only geographically but ethnically as well; along with Malays and related groups, the country has a very large Indian and Chinese population. The spoken languages obviously vary at home, although Bahasa Malaysia is the official language and nearly everyone speaks English. There is also a mixture of religions, with Islam predominating among the Malays and others, Hinduism and Sikhism among the Indians, mainly Daoism and Confucianism among the Chinese, but also some Christians as well as older indigenous beliefs in certain places. This second edition of *Historical Dictionary of Malaysia* contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 500 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture. This book is an excellent resource for students,

researchers, and anyone wanting to know more about Malaysia.

Sharktooth Island Susan Page Davis, Deborah Sprinkle, Linda Fulkerson, Elena Hill, 2022-05-31 A fabled island that no one dares to tame. This collection contains four novellas: Book 1 - Out of the Storm (1830) by Susan Page Davis Laura Bryant sails with her father and his three-man crew on his small coastal trading schooner. After a short stay in Jamaica, where she meets Alex Dryden, an officer on another ship, the Bryants set out for their home in New England. In a storm, they are blown off course east of Savannah, Georgia, to a foreboding island. Captain Bryant tells his daughter he's heard tales of that isle. It's impossible to land on, though it looks green and inviting from a distance. It has no harbor but is surrounded by dangerous rocks and cliffs. Pirates outrun the storm and decide to bury a cache of treasure on this island and return for it later. On board is Alex, whom the cutthroats captured in Jamaica and forced to work for them. Alex risks his own life to escape the pirates and tries to help Laura and Captain Bryant outwit them. Beneath the deadly struggle, romance blossoms for Laura. Book 2 - A Passage of Chance (1893) by Linda Fulkerson Orphaned at a young age, Melody Lampert longs to escape the loveless home of the grandmother who begrudgingly raised her.

Stripped of her inheritance due to her grandmother's resentments, Melody discovers her name remains on the deed of one property-an obscure island off the Georgia coast that she shares with her cousin. But when he learns the island may contain a hidden pirate treasure, he's determined to cheat her out of her share. Ship's mechanic Padric Murphy made a vow to his dying father-break the curse that has plagued their family for generations. To do so, he must return what was taken from Sharktooth Island decades earlier-a pair of rare gold pieces. His opportunity to right the wrong arrives when his new employer sets sail to explore the island. After a series of unexplainable mishaps occur, endangering Padric and his boss's beautiful cousin Melody, he fears his chance of breaking the curse may be ruined. But is the island's greed thwarting his plans? Or the greed of someone else? Book 3 - Island Mayhem (1937) by Elena Hill Louise Krause stopped piloting to pursue nursing, but when money got too tight she was forced to give up her dreams and start ferrying around a playboy who managed to excel during the Great Depression. When a routine aerial tour turns south, Louise is unable to save the plane. After crash landing, the cocky pilot is stranded. She longs to escape the uninhabited island, but her makeshift raft sinks, and she and her companions are in

even worse trouble. Can Louise learn to trust the others in order to survive, or will the island's curse and potential sabotage lead to her demise? Book 4 - After the Storm (present day) by Deborah Sprinkle Mercedes Baxter inherited two passions from her father-a love for Sharktooth Island, a spit of land in the middle of the ocean left to her in his will, and a dedication to the study of the flora and fauna on and around its rocky landscape. For the last five years, since graduating from college, Mercy led a peaceful, simple life on the island with only her cat, Hawkeye, for company. Through grant money she obtained from a conservancy in Savannah, she could live on her island while studying and writing about the plants and animals there. Life was perfect. But when a hurricane hits the island, Mercy's life changes for good. Her high school sweetheart, Liam Stewart, shows up to help her with repairs, and ignites the flame that has never quite died away. And if that's not enough, while assessing the damage to the island, they make a discovery that puts both their lives in danger.

Heat Islands Lisa Mummery Gartland, 2012-05-16 Heat islands are urban and suburban areas that are significantly warmer than their surroundings. Traditional, highly absorptive construction materials and a lack of effective landscaping are their main causes. Heat island problems, in terms of increased energy consumption, reduced air quality and effects on human health and mortality, are becoming more pressing as cities continue to grow and sprawl. This comprehensive book brings together the latest information about heat islands and their mitigation. The book describes how heat islands are formed, what problems they cause, which technologies mitigate heat island effects and what policies and actions can be taken to cool communities. Internationally renowned expert Lisa Gartland offers a comprehensive source of information

for turning heat islands into cool communities. The author includes sections on cool roofing and cool paving, explains their benefits in detail and provides practical guidelines for their selection and installation. The book also reviews how and why to incorporate trees and vegetation around buildings, in parking lots and on green roofs.
