This bundle offers books four, five and six in one convenient file, with over 250,000 words of reading. In TRAPPING ZERO, a terrorist cell in the Mideast gains a new, fanatic leader, one intent on orchestrating what would be the deadliest attack on American soil. Can Agent Zero uncover the plot and stop him in time? Although Agent Zero's daughters are home safely, the mental anguish from their experience weighs heavy on their small family. Zero, working to be a good father and to repair the damage, decides the time has come to undergo surgery to regain all of his memories. But will it work? In the midst of it all, he is again thrust into the line of duty as a U.S. embassy is destroyed in the Mideast and as an experimental new weapon is uncovered. But without his memories, with some of his own CIA allies intent on his destruction, who can he really trust? In FILE ZERO, Agent Zero's memory finally comes flooding back—and with it, shocking revelations about the CIA's secret plot to spark a war and to take his life. Disavowed and on the run, can he stop them in time? When an incident in the Strait of Hormuz threatens to mushroom into an all-out war, Agent Zero's memory comes rushing back, and with it, a chance to uncover the plot that caused his memory loss to begin with.

Discredited, with few friends left, Zero is on his own as he tries to stop the CIA while also saving his targeted family. Yet as he digs deeper, another, more nefarious, plot comes to surface, one which will require him to trust no one, and to risk it all to save the country he loves. In RECALL ZERO, the President's translator is the only one privy to a secret conversation that can change the world. She is targeted for assassination and hunted down, and Agent Zero, called back into the line of duty, may just be the only one who can save her. Agent Zero, trying to get his life back in order and to win back the trust of his girls, vows not to return to service. But when he is needed to save the life of this defenseless translator, he can't say no. Yet the translator, he realizes, is as intriguing as the secrets she keeps, and Zero, on the run with her, just might be falling for her. What secret is she keeping? Why are the most powerful organizations in the world trying to kill her for it? And will Zero be able to save her in time? Books #7-#12 are also now available!

**When Government Stumble** Ben Freeth, 2013-10-18  
Ben Freeth established his credentials to write on this topic through his courageous and successful resistance to the bullying tactics employed by the Mugabe regime in Zimbabwe to throw him and his family off their land, a story told in *Mugabe and the White African*. He now throws his net wider to ask: what response should Christians make to corruption and injustice when perpetrated by governments? Justice is a fundamental aspect of the Judeo-Christian faith. Ben explores this theme through his own experience of government oppression in Zimbabwe, and through contemporary instances where Christians have - or have not - stood up to be counted. He considers the Biblical injunction to obey your rulers, and examines the issues of fear and complacency: sometimes Christians are compromised by their relationship with the ruling group. What is our duty? Most Christians feel powerless. What can we actually do, as individuals, and as a group?

**Leopard Diaries** Sanjay Gubbi, 2022-10-10  
'Evolution is an exquisite artist, even if an unconscious one.' - Eric Dinerstein The leopard is perhaps one of the world's most beautiful

creatures. The spots on its body are even romantically called 'rosettes'. It is social but solitary, inconspicuous but significant in numbers, large but elusive, and does not fit any of the pigeonholes of large-cat conservation. In India, the leopard is a poster boy of the fight to preserve wildlife, but in many countries, it faces either ecological or local extinction. A worrying phenomenon, given that these cats carry out important ecosystem services that have not been fully understood yet. In *Leopard Diaries: The Rosette in India*, Sanjay Gubbi, who has studied and documented the leopard for nearly a decade, gives us a close look at this fascinating creature. From detailing its food habits to throwing new light on how the young are reared, from offering suggestions on tackling leopard-human conflict to imagining the future of this arresting animal, this book is a 360-degree view of the leopard, its ecological context, its fraught relationship with the human world, and how wildlife and human beings can find a way to co-exist.

**Chemical Signals in Vertebrates 15** Benoist Schaal, Diane Rekow, Matthieu Keller, Fabrice Damon, 2023-10-16 The 15th Meeting on Chemical Signals in Vertebrates (CSiV) reunited participants from 20 countries from 5 continents who electronically commuted to Dijon, France, during three days (3-5 November 2021). This virtual meeting was a great opportunity to share information on how amphibians, reptiles, birds, and mammals communicate through chemosignals and integrate their environment through chemical cues. Scientists from varied disciplines ranging from biology and psychology to chemistry and biostatistics attended the meeting to share their research on how vertebrates produce and release chemical cues and signals, how they detect, discriminate, process, and interpret them; how they respond to them behaviorally, physiologically, and/or neurally in adaptive ways; how the typical or atypical environment modulates such chemocommunication loops, and chemoreception in general. In total, this 2021 CSiV meeting presented important new findings, representative of the growing points in the rapidly expanding field of research on chemocommunication among vertebrates. As appreciated by D Müller-Schwarze (a well-known pioneer in the field and the founding father of the book series in question) in his foreword to the meeting, "Our field has broadened to new horizons: besides multicomponent cues, we now learn about multisource and multifunction chemical signals. The range of study animals and settings has become richer, and we have learned enough that practical applications are becoming realistic." This proceedings documents key presentations from this virtual conference.

**Reclaiming the Streets** Roy Coleman, 2012-12-06 In an age of mass camera surveillance people in the UK have become the most watched, catalogued and

categorised people in the western world, all with little public debate or opposition. Nor has there been much more critical research that understands CCTV within the broader social relations out of which it has grown and consolidated. The aim of this book is to analyse the use of CCTV within this broader social, political and ideological context, focusing on relations between surveillance, power and social order, using Liverpool as a case study. At the same time the book provides a study of social control in Liverpool city centre, exploring the development of, and meaning attributed to, social control practices by those at the centre of the implementation and management of these practices. As such the book is a study of the 'locally powerful', their organisation through the local state, and their perceptions of order and disorder in the city centre. Liverpool's CCTV network is thus seen as emblematic of the developments in social control which the book explores. The book makes a key contribution to theoretical debates around social control in four respects: it places the analysis of CCTV within an understanding of the social relations in which the technology emerged; it analyses CCTV as a normative tool of social control and not merely as a piece of crime prevention technology; it considers how social scientists and criminologists think about and understand social control in the contemporary setting; and finally it seeks to draw lessons from the Liverpool case study and considers their applicability to the study of CCTV more generally.

The Internet of Things Michael Miller,2015 The old Internet typically connected personal

computers. But a radically new Internet is emerging. Some call it an Internet of Things (IoT) or Internet of Everything (IoE). The IoT won't just connect people: it'll connect smart homes, appliances, cars, aircraft (a.k.a. drones)... offices, factories, cities... the world. By some estimates, the IoE will explode into a \$19 trillion market in just a few years. If that happens... when that happens... it will transform your life. ; You need to know what's coming. But, until now, most guides to the Internet of Everything have been written for technical experts. In *The Internet of Things*, Michael Miller reveals how a new generation of autonomously connected smart devices is emerging, and how it will enable people and devices to do more things, more intelligently, and more rapidly. ; Miller demystifies every type of smart device, both current and future. Each chapter ends with a special ...and You section, offering up-to-the-minute advice for using today's IoE technologies or preparing for tomorrow's. ; You'll also discover the potential downsides and risks associated with intelligent, automatic interaction. When all your devices can communicate with each other (and with the companies that sell and monitor them), how private is your private life? Do the benefits outweigh the risks? And what does a connected world do when the connections suddenly go down? Packed with scenarios and insider interviews, *The Internet of Things* makes our future utterly, vividly real.
