*Peter Weir's "The Truman Show": The Ultimate Hidden Camera Special* Nadine Klemens, 2007-07-16 Seminar paper from the year 2002 in the subject Communications - Movies and Television, grade: 1,0 (A), Technical University of Braunschweig (English Seminar), course: HS Documentary Film, 16 entries in the bibliography, language: English, abstract: Through a spy hole in a bathroom cabinet we see a man in pajamas talking to himself in the mirror. Or is he talking to us? After a while, we hear a voice of a woman, telling him that he will be late. With a sigh, the man turns around and leaves the bathroom. On a black screen, we read Day 10, 909- then we see the man through another spy hole, dressed in a business suit, leaving his house for work. He greets his neighbors with a wide grin, and the neighbors enthusiastically greet back. As he adds Oh, and in case I don't see ye: Good afternoon, good evening and good night , they react as though they think this was extremely funny. When the dog of his next-door neighbor comes to greet him, the man freezes, on his face an expression of terror. He waits till the dog moves back and is about to get in his car when the camera suddenly pans and we see a theatrical light falling out of the sunny sky. Suspiciously, the man goes to examine what has crashed down on the street in front of his house. He does not know what to think of the light, which has a tag on it, designating it as Sirius. In disbelief, he gazes into the sky- is this how stars look like? The

By confronting his audience with elements of its daily TV-programming, the docu-soap, Peter Weir establishes a satire of the media that leaves its viewers with the uneasy feeling that reality is not always what it appears to be. This work gives a short summary of the movie, as well as it depicts its style and structure. Furthermore, Peter Weir's thematic concerns are explained. The

*Spy Camera* Michael Pritchard, Douglas St. Denny, 1993 *Spy*, subminiature and detective cameras have long held a fascination for collectors and the general public alike, who often associate these cameras with the Cold War period of the 1950s. The desire to make small and disguised cameras, however, goes back much further, as far as the 1860s - although it was not until the more sensitive plates of the 1880s and, later, rollfilms were developed that subminiature cameras began to appear in all sorts of shapes and sizes. Many such cameras are still being made for covert use and industrial espionage -- Dust jacket.

Spycraft Robert Wallace,H. Keith Melton, Henry R. Schlesinger, 2008-05-29 An unprecedented history of the CIA's secret and amazing gadgetry behind the art of espionage In this look at the CIA's most secretive operations and the devices that made them possible, Spycraft tells gripping life-and-death stories about a group of spytechs—much of it never previously revealed and with images never before seen by the public. The CIA's Office of Technical Service is the ultrasecret department that grappled with challenges such as: What does it take to build a quiet helicopter? How does one embed a listening device in a cat? What is an invisible photo used for? These amazingly inventive devices were created and employed against a backdrop of geopolitical tensions—including the Cold War, the Cuban Missile Crisis, and continuing terrorist threats. Written by Robert Wallace, the former director of the Office of Technical Service, and internationally renowned intelligence historian Keith Melton, Spycraft is both a fantastic encyclopedia of gadgetry and a revealing primer on the fundamentals of high-tech espionage. “The first comprehensive look at the technical achievements of American espionage from the 1940s to the present.”—Wired “Reveals more concrete information about CIA tradecraft than any book.”—The Washington Times “This is a story I thought could never be told.”—JAMES M. OLSON, former chief of CIA counterintelligence
