A Spy's Resume Marc Anthony Viola,2008-09-29 Since the recent attacks of September 11, 2001, the intelligence community has been on a hiring binge. According to some estimates, over half of those currently employed in the agencies and departments that comprise the U.S. intelligence community have less than six years experience. Consequently, there are a lot of people 'learning the ropes' on how to become an intelligence professional. A Spy's RZsumZ describes what people can expect when they decide to leave government or military service. In this book, Marc Anthony Viola assists government and military professionals transitioning into the civilian world, using techniques from the U.S. intelligence community. While Viola includes advice on rZsumZ writing and interviewing, his book goes beyond 'how to find a job' to the challenge of conceptualizing a new vocation, as well as looking at the personal journey from the perspective of a former intelligence professional transitioning to the civilian sector. Viola uses experiences and observations from his own military intelligence career in ways that are of interest and of benefit to anyone thinking of changing careers or in transition with his or her own life.

Culture, Time and Publics in the Arab World Tarik Sabry,Joe F. Khalil,2019-04-18 In this revealing new study, Tarik Sabry and Joe Khalil preside over an original new exploration of Arab culture. They employ subjects as varied as anthropology, media studies, philosophy, political economy and cultural studies to illuminate the relationship between culture, time and publics in an Arab context, whilst also laying the foundations for a much more nuanced picture of Arab society. The diverse themes and locations explored include communities at borders, in rural and urban locations, Syrian drama audiences, Egyptian, Saudi and Tunisian artists and activists and historical and contemporary Arab intellectuals. This fresh empirical research and interdisciplinary analysis illuminate intricate experiences that transcend local, national and religious boundaries and expose how Arab publics combine the media and technology to create a rich experience that shapes their collective imagination and social structure. Providing a grounded orientation to key debates on time and what can be defined as public in modern Arab cultures, Sabry and Khalil address teachers, students and those concerned about the delicate structures that underpin the upheavals of the modern Arab world.

Corridors Stephen Hayes,2015-11-30 The fourth instalment in the epic Magic Crystals series, following the events of 'Hunt and Power'. A great war has enveloped the world, sweeping all before it and sending John and his friends, now wanted criminals scurrying for cover. While those who can must take the frontline to protect as many innocent lives as possible, the Hammerson family and their army of loyal Hammerhearts swiftly take control of two thirds of the world, using magic to impact the minds of those previously in power to make them cave. John must struggle on two fronts as his social and romantic lives become ever more complicated, and he must be mindful of his safety every time he leaves the shelter of the Woodward Sorcerers' headquarters. Several of his friends would learn this lesson at enormous cost. The only chance our heroes have of survival is in the shape of a jittery old man, who may have all the answers; but in order to find out, the Chopville teens must undergo a journey of discovery and understanding first.

Does State Spying Make Us Safer? Michael Hayden,Alan Dershowitz,Glenn Greenwald,Alexis Ohanian,2014-11-21 Does government surveillance make us safer? The thirteenth Munk Debate, held in Toronto on Friday, May 2, 2014, pitted Michael Hayden and Alan Dershowitz against Glenn Greenwald and Alexis Ohanian to debate whether state surveillance is a legitimate defence of our freedom – the democratic issue of the moment. In a risk-filled world, democracies are increasingly turning to large-scale state surveillance, at home and abroad, to fight complex and unconventional threats – but is it justified? For some, the threats more than justify the current surveillance system, and the laws and institutions of democracies are more than capable of balancing the needs of individual privacy with collective security. But for others, we are in peril of sacrificing to a vast and unaccountable state surveillance apparatus the civil liberties that guarantee citizens' basic freedoms and our democratic way of life. In this edition of the Munk Debates, former head of the CIA and NSA Michael Hayden and civil liberties lawyer Alan Dershowitz square off against journalist Glenn Greenwald and reddit co-founder Alexis Ohanian to debate the legitimacy of state surveillance. With issues of Internet privacy increasingly gaining prominence, the Munk Debate on the Surveillance State asks: Should government be able to monitor our activities in order to keep us safe?

Spying in America in the Post 9/11 World Ronald A. Marks,2010-11-02 This book examines the realities of living in the United States after the events of September 11th, 2001, and evaluates the challenges in gathering internal intelligence without severely compromising personal liberties. In the United States, there are a staggering number of agents of the CIA, FBI, and state, local, and tribal police, all authorized and empowered to collect intelligence. But is there a way to use these vast resources to gather intelligence in a socially tolerable fashion and still maintain our cherished civil liberties? This book presents a thorough investigation of intelligence

collection in the United States that examines the delicate balance of civil liberties with the effectiveness of intelligence collection. It contains a history of domestic intelligence in America, a description of the various threats against our nation, and a discussion of the complexities of deciding what kind of information needs to be collected— and against whom. The conclusion succinctly states the author's opinions on what needs to be done to best address the issue.

Perilous Policing Thomas Nolan,2019-03-04 Policing and police practices have changed dramatically since the 9/11 terrorist attacks and those changes have accelerated since the summer of 2014 and the death of Michael Brown at the hands of then-police officer Darren Wilson in Ferguson, Missouri. Since the November 2016 election of Donald Trump as president, many law enforcement practitioners, policy makers, and those concerned with issues of social justice have had concerns that there would be seismic shifts in policing priorities and practices at the federal, state, county, and local and tribal levels that will have significant implications for constitutional rights and civil liberties protections, particularly for people of color. *Perilous Policing: Criminal Justice in Marginalized Communities* provides a much-needed interrogatory to law enforcement practices and policies as they continue to evolve during this era of uncertainty and anxiety. Key topics include the police and marginalized populations, the use of technology to surveil individuals and groups, the emergence of the Black Lives Matter movement and the erosion of the police narrative, the use of force (particularly deadly force) against people of color, the role of the police in immigration enforcement, the war on cops, and police militarization. Thomas Nolan's critique of current practice and his preliminary conclusions as to how to navigate contemporary policing away from the pitfalls of discredited and counterproductive practices will be of interest to advanced undergraduates and graduate students in Policing, Criminology, Justice Studies, and Criminal Justice programs, as well as to researchers, law enforcement professionals, and police policy makers.

Surveillance Futures Emmeline Taylor,Tonya Rooney,2016-08-05 From birth to adulthood, children now find themselves navigating a network of surveillance devices that attempt to identify, quantify, sort and track their thoughts, movements and actions. This book is the first collection to focus exclusively on technological surveillance and young people. Organised around three key spheres of children's day-to-day life: schooling, the self and social lives, this book chronicles the increasing surveillance that children, of all ages, are subject to. Numerous surveillance apparatus and tools are examined, including, but not limited to: mobile phones, surveillance cameras, online monitoring, GPS and RFID tracking and big data analytics. In addition to chronicling the steady rise of such surveillance practices, the chapters in this volume identify and problematise the consequences of technological surveillance from a range of multidisciplinary perspectives. Bringing together leading scholars working across diverse fields – including sociology, education, health, criminology, anthropology, philosophy, media and information technology – the collection highlights the significant socio-political and ethical implications of technological surveillance throughout childhood and youth.

Samsung Rising Geoffrey Cain,2020-03-17 An explosive expose of Samsung that “reads like a dynastic thriller, rolling through three generations of family intrigue, embezzlement, bribery, corruption, prostitution, and other bad behavior” (The Wall Street Journal). LONGLISTED FOR THE FINANCIAL TIMES AND MCKINSEY BUSINESS BOOK OF THE YEAR AWARD Based on years of reporting on Samsung for The Economist, The Wall Street Journal, and Time, from his base in South Korea, and his countless sources inside and outside the company, Geoffrey Cain offers a penetrating look behind the curtains of the biggest company nobody in America knows. Seen for decades in tech circles as a fast follower rather than an innovation leader, Samsung today has grown to become a market leader in the United States and around the globe. They have captured one quarter of the smartphone market and have been pushing the envelope on every front. Forty years ago, Samsung was a rickety Korean agricultural conglomerate that produced sugar, paper, and fertilizer, located in a backward country with a third-world economy. With the rise of the PC revolution, though, Chairman Lee Byung-chul began a bold experiment: to make Samsung a major supplier of computer chips. The multimillion-dollar plan was incredibly risky. But Lee, wowed by a young Steve Jobs, who sat down with the chairman to offer his advice, became obsessed with creating a tech empire. And in Samsung Rising, we follow Samsung behind the scenes as the company fights its way to the top of tech. It is one of Apple’s chief suppliers of technology critical to the iPhone, and its own Galaxy phone outsells the iPhone. Today, Samsung employs over 300,000 people (compared to Apple’s 80,000 and Google’s 48,000). The company’s revenues have grown more than forty times from that of 1987 and make up more than 20 percent of South Korea’s exports. Yet their disastrous recall of the Galaxy Note 7, with numerous reports of phones spontaneously bursting into flames, reveals the dangers of the company’s headlong attempt to overtake Apple at any cost. A sweeping insider account, Samsung Rising

shows how a determined and fearless Asian competitor has become a force to be reckoned with.

Freedom's Sons H. A. Covington,2013-09-24 *Freedom's Sons* is the fifth and last in underground cult novelist H.A. Covington's series of Northwest Independence novels. In the first four novels--*A Distant Thunder*, *A Mighty Fortress*, *The Hill Of The Ravens*, and *The Brigade*--we followed the path of the War of Independence when in the not-so-distant future, the people of the Pacific Northwest fought a five-year guerrilla war against the overbearing tyranny of Washington, D.C., and finally established the Northwest American Republic as an independent nation. *Freedom's Sons* chronicles the first fifty years of the NAR's existence as a country and a new society, including the struggle against crushing economic sanctions imposed by the outside world, as well as an attempt by the enraged Americans to reconquer the Northwest with a military invasion. The novel follows the fortune of three families, one of former rebel guerrilla fighters from the Northwest Volunteer Army, one Unionist, and one refugee family who flees to the Republic from the collapsing U.S.A. *Freedom's Sons* is a story of redemption and the triumph of the human spirit over the darkness now engulfing the world.

Technologies of Speculation Sun-ha Hong,2020-07-28 An inquiry into what we can know in an age of surveillance and algorithms Knitting together contemporary technologies of datafication to reveal a broader, underlying shift in what counts as knowledge, *Technologies of Speculation* reframes today's major moral and political controversies around algorithms and artificial intelligence. How many times we toss and turn in our sleep, our voluminous social media activity and location data, our average resting heart rate and body temperature: new technologies of state and self-surveillance promise to re-enlighten the black boxes of our bodies and minds. But Sun-ha Hong suggests that the burden to know and to digest this information at alarming rates is stripping away the liberal subject that 'knows for themselves', and risks undermining the pursuit of a rational public. What we choose to track, and what kind of data is extracted from us, shapes a society in which my own experience and sensation is increasingly overruled by data-driven systems. From the rapidly growing Quantified Self community to large-scale dragnet data collection in the name of counter-terrorism and drone warfare, Hong argues that data's promise of objective truth results in new cultures of speculation. In his analysis of the Snowden affair, Hong demonstrates an entirely new way of thinking through what we could know, and the political and philosophical stakes of the belief that data equates to knowledge. When we simply cannot process all the data at our fingertips, he argues, we look past the inconvenient and the complicated to favor the comprehensible. In the process, racial stereotypes and other longstanding prejudices re-enter our newest technologies by the back door. Hong reveals the moral and philosophical equations embedded into the algorithmic eye that now follows us all.
