Facebook Nation Newton Lee,2012-09-15 President Barack Obama, in his 2011 State of the Union Address, called America the nation of Edison and the Wright brothers and of Google and Facebook. U.S. Chief Information Officer, Steven VanRoekel, said that America has become a Facebook nation that demands increased transparency and interactivity from the federal government. Facebook as a nation in 2012 would be the third largest country in the world with over 900 million citizens, after China and India. This book portrays the social media ecosystem as a world of increasing Total Information Awareness, which is essentially a civilian version of the controversial Total Information Awareness program unveiled in 2002 by the Defense Advanced Research Projects Agency (DARPA) at the U.S. Department of Defense. Back in the 60's, DARPA initiated and funded the research and development of Advanced Research Projects Agency Network (ARPANET) that went online in 1969. The success of ARPANET gave rise to the global commercial Internet in the 90's and the new generation of Fortune 500 companies today including Amazon.com, Google, eBay, and Yahoo!. As if life comes full circle in the 21st century, private businesses and the ubiquity of social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies and infrastructures necessary for the DARPA-proposed Total Information Awareness program. WikiLeaks founder Julian Assange called Facebook the most appalling spying machine that has ever been invented. Indeed, military and civilian technologies have interwoven into every fabric of our society, as Facebook co-founder and CEO Mark Zuckerberg said, We exist at the intersection of technology and social issues. This book offers discourse and practical advice on the privacy issue in the age of big data, the rise of Facebook nation, and Total Information Awareness. Opening with President Ronald Reagan's 1984 National Security Decision Directive and ending with George Orwell's novel 1984, the author takes us on a roller-coaster ride through Facebook's botched IPO, Carrier IQ, Kony 2012, SOPA/PIPA blackout, cyber bullying, crime fighting, and a host of other timely issues facing our Facebook nation. Social media strategists, information architects, social scientists, policymakers, and academic scholars in the Program in Science, Technology, and Society (STS) will find this book a valuable asset.

Developer's Guide to Social Programming Mark D. Hawker,2010-08-09 In The Developer's Guide to Social Programming, Mark Hawker shows developers how to build applications that integrate with the major social networking sites. You'll find practical solutions and code for addressing many common social programming challenges, from site registration to search, blog commenting to creating location-based applications. Hawker concludes by walking you through building a complete, integrated social application: one that works seamlessly across all leading platforms, and draws on powerful features from each. Coverage includes Working with the Twitter API, including the Search API, Lists API, and Retweets API Authenticating users with Twitter OAuth Mastering the Facebook API, FQL, and XFBML Utilizing the Facebook JavaScript Library for creating dynamic content, and animation Exploring the Google Friend Connect JavaScript API, and integrating with the OpenSocial API Using Facebook's tools for sharing, social commenting, stream publishing, and live conversation Using the PHP OpenSocial Client Library with Google Friend Connect Creating, testing, and submitting Google Friend Connect gadgets

The Fast Growing Twitter Jennifer Bullock,2015-01-03 this new phenomenon ranks right up there with facebook and linked in social contact.

Go Tweet Yourself Janelle Randazza,2009-10-18 Flip Twitter the bird. Tell Facebook to f#@% off. Lose it on LinkedIn. Somewhere between the advent of Facebook and launching Twitter to the masses, the Internet betrayed us. It allowed pages to be viewed by job interviewers, newsfeeds to be flooded by Aunt Julie, and for constant tweets about what color socks that random girl from the study group is going to wear today. This

book is the hilarious reply all that says: enough is enough. We don't want to see the pictures from your business trip to Omaha. We don't want a page-by-page account of what's going on in Twilight. We definitely don't want a virtual drink! When you can't fix the problem, fix the blame. And since there's no way in 2.0-hell that you can put an end to the bastardization of the Book, you may as well have a good laugh while pointing the finger at those who ruined their online experience.

2011 Social Media Directory Jeffery A. Riley,2010 One of the most acclaimed and original story collections of the last decade, Peter Orner's first book explores the brief but far-reaching occasions that haunt us. The discovery of a murdered man in a bathrobe by the side of a road, the destruction of a town's historic City Hall building, and the recollection of a cruel wartime decision are equally affecting in Orner's vivid and intimate gaze. The first half of the book concerns the lives of unrelated strangers across the American landscape, and the second introduces two very different Jewish families, one on the East Coast, the other in the Midwest. Yet Orner's real territory is memory, and this book of wide-ranging and innovative stories remains an important and unique contribution to the art of the American short story.
