Stardate Thomas Shepherd, 2014-10-29 Mark Bricchetti loves reading about dinosaurs and munching pizza. But his everyday life at Spirit Creek Middle School in Hepzibah, Georgia, is about to explode into far-flung adventure. At lunch in the eighth grade commons, Mark declares the new girl in town, Keshikka Grant, is totally hot. His best friend, Aaron, thinks she's radioactive. Mark, I'm telling you. She's an alien. Well, she did have red-blond hair and yellow eyes. When Keshikka whispers a phone number to him, Mark decides to risk alien abduction by taking her to a movie. It's a day which begins with great possibilities. But Mark has no idea the date will take him to worlds he could not imagine, where the fate of Earth lands in his hands. Of course, it will involve aliens. And dinosaurs. STARDATE is an action-adventure-science fiction-romance for young adults and anyone who wants to stay young at heart.

Stardate Tom Shepherd, 2018-10 Mark, I'm telling you. She's an alien! Mark Bricchetti is an ordinary, 21st century teenager. Excitement means playing MMOs, reading about dinosaurs, and munching pizza. That's about to change. It starts when best friend, Aaron Hooper, warns him about Keshikka Grant, the new hottie in school. Mark, I'm telling you. She's an alien! Well, she did have red-gold hair and yellow eyes. But when Keshikka whispers her phone number to him, Mark has no idea their date will take him to worlds he could not imagine, where the fate of planet Earth lands in his hands. Of course, he will encounter a vast array of aliens, starships, rampaging dinosaurs, and holographic MMOs where you can actually die. Stardate shanghaies readers from ordinary life and teleports them into a science fiction, action-driven, deep space adventure, punctuated with humor. For anyone who loves a good tale, middle school to retirement complex. If that girl is an alien, beam me aboard.

Gateways Book Seven: What Lay Beyond Diane Carey, Peter David, Keith R. A. DeCandido, Christie Golden, Robert Greenberger, Susan Wright, 2002-06-08 Created by the incalculably ancient Iconians, whose transcendent technology is quantum levels beyond that of the Federation and its allies, the Gateways offer instantaneous transport across unimaginable distances. Throughout the known galaxy, from Deep Space Nine™ to the New Frontier, from the Delta Quadrant to the bridge of the Starship Enterprise™, the sudden reactivation of the Gateways has destabilized interstellar relations between planets and cultures previously separated by countless light-years. Starfleet's finest have coped with the crisis as best they can, but circumstances have forced several valiant commanders to leap through separate Gateways into the unknown. Captain James T. Kirk of the original Starship Enterprise Captain Jean-Luc Picard of Star Trek: The Next Generation® Colonel Kira Nerys of Deep Space Nine Captain Kathryn Janeway of the U.S.S. Voyager™ Captains Calhoun and Shelby of Star Trek : New Frontier Commander Nick Keller of the U.S.S. Challenger All of these heroes, for their own reasons, have taken the ultimate gamble: hurling

themselves personally through a Gateway without any knowledge or forewarning of what lay beyond. Each must face their own unique challenge, struggling to find a way back to the ships and homes they left behind. And waiting behind at least one of the Gateways are the ageless Iconians themselves, the primordial architects of the mysterious portals causing chaos throughout the Milky Way galaxy. Where did they disappear to, many long eons ago, and what do they want now? The answer lies on the other side.... What Lay Beyond brings the Gateways saga to a spectacular finish, in an all-star collaboration by six popular, bestselling Star Trek authors. Among them, Diane Carey, Peter David, Keith R.A. Decandido, Christie Golden, Robert Greenberger, and Susan Wright have written dozens of Star Trek novels. This is their first mega-collaboration.

Why Would Anyone Want to Swing a Cat? Andy Simpson,2013-04-18 Why is bureaucracy known as red, not yellow or blue tape? What is haywire and why do we go it? Why is a yawn infection? Who was Parker and why is he so Nosy? These are just some of the burning issues that have been exercising the minds of Daily Mail readers in recent years, and 1001 of the most entertaining have

been reproduced in this bumper collection. Not all of the questions featured will have been nagging away at you for years - the scrap metal value of the Eiffel Tower, for example; and some of the answers throw up intriguing alternatives (does the expression peg out have its origins in the game of cribbage or in grave digging practices?); but for those who are inveterate devourers of trivia teasers and fascinating facts, The Daily Mail's Answers to Correspondents is a veritable feast.

Conceptual Information Retrieval Michael L. Mauldin, 2012-12-06 The information revolution is upon us. Whereas the industrial revolution heralded the systematic augmentation of human physical limitations by harnessing external energy sources, the information revolution strives to augment human memory and mental processing limitations by harnessing external computational resources. Computers can accumulate, transmit and output much more information and in a more timely fashion than more conventional printed or spoken media. Of greater interest, however, is the computer's ability to process, classify and retrieve information selectively in response to the needs of each human user. One cannot drink from the fire hydrant of information without being immediately flooded with irrelevant text. Recent technological advances such as optical character readers only exacerbate the problem by increasing the volume of electronic text. Just as steam and internal combustion engines brought powerful energy sources under control to yield useful work in the industrial revolution, so must we build computational engines that control and apply the vast information sources that they may yield useful knowledge. Information science is the study of systematic means to control, classify, process and retrieve vast amounts of information in electronic form. In particular, several methodologies have been developed to classify texts manually by armies of human indexers, as illustrated quite clearly at the National Library of Medicine, and many computational techniques have been developed to search textual data bases automatically, such as full-text keyword searches. In general.

The Legendary Myth II Richard Alexander Panter, 2020-01-20 Introduction Stardate: 2020-03-27..... 4 years after the finding of a World called Arcanus II, within the Exterio system, one of the oldest they say. Two unlikely souls found one another alone in a vast unknown universe. My name was Mr. Richards, a U.F.O specialist hired by the federal Government back when Elizabeth and I were both on earth, and that was over four years ago, to date. Elizabeth and I both vaguely remember those events which brought us out here. Our new lives had taken us from earth, and threw us out onto a lost and unforgiving World, filled with Cannibals, and Ancient deserted cities of a great race that once lived out here, among the stars. We had found a genuine flying Saucer, which was called the Myth. We then left Arcanus II, to go home back to earth, over 14 million light years away. So along the way we had found, and saved a few more, to help us operate the Myth. A Saucer ship, now with a half crew on board. Elizabeth and I started off as strangers on earth, and found ourselves thrust out into the fringes of an Unknown Universe. The Myth was equipped with experimental Stealth activators, lithium energy shielding, and Anti graviton Oscillating energy fields, as to land the Saucer ship down onto the surface, with a soft landing. We had as well a full complement of extraordinary alien weapons, and technology. Including six fully rotational Sonicion laser cannons. This is the legend of what became of two humans, who had found a flying Saucer, at the edge of an unforgiving Universe. My name is Captain Richards, of the legendary Myth.
